SELF δ , sêlf. pronoun. plur. selves. [silba, Gothick; rylf, rylfa, Sax.; self, selve, Dutch.] Its primary signification seems to be that of an adjective: very; particular; this above others; sometimes, one's own. *Shak*. It is united both to the personal pronouns, and to the neutral pronoun *it*, and is always added when they are used reciprocally, or return upon themselves: as, I did not hurt *him*, he hurt *myself*; The people hiss *me*, but I clap *myself*. *Milton*. It is sometimes used emphatically in the nominative case: as, *Myself* will decide *it*.

Compounded with *him*, a pronoun substantive, *self* is, in appearance, an adjective: joined to *my*, *thy*, *our*, *your*, pronoun adjectives, it seems a substantive. *Milton*. *Myself*, *himself*, *themselves*, and the rest, may, contrary to the analogy of *my*, *him*, *them*, be used as nominatives. *Dryden*. It often adds only emphasis and force to the pronoun with which it is compounded: as, He did *it himself*. It signifies the individual, as subject to his own contemplation or action. *Spenser*. It is much used in composition: as, *self-love*, *self-evident*, &c.

✂ I consider this word as having altered its original accent on the second syllable either by the necessity or caprice of the poets, or by its similitude to the general-ity of words of this form and number of syllables, 503, which generally have the accent on the first syllable Dr. Johnson tells us it is accented by Shakespeare and Milton on the second syllable, but by Jonson and Prior more properly, on the first, and he might have added, as Shakespeare has sometimes done:

"Ah me! this sight of death is as a bell

"That warns my old age to its sepulchre."

Shakespeare.

"Go to thy lady's grave, and call her thence;

"Or, at the least, in hers sepulchre thine."

Shakespeare.

"I am glad to see that time survive,

"Where merit is not sepulchred alive."

Ben Jonson.

"Thou so sepulchred in such pomp dost lie,

"That kings for such a tomb would wish to die."

Milton.

To accent this word on the second syllable, as *Shakespeare* and *Milton* have done, is agreeable to a very general rule, that, when we introduce into our own language a word from the Greek or Latin, and either preserve it entire, or the same number of syllables; in this case we preserve the accent on the same syllable as in the original word. This rule has some exceptions, as may be seen in the *Principles*, No. 503. (c.) but has still a very great extent. Now *sepulchrum*, from which this word is derived, has the accent on the second syllable; and *sepulchre* ought to have it on the same; while *sepulture*, on the contrary, being formed from *sepultura*, by dropping a syllable the accent removes to the first. See *Academy*. As a confirmation that the current pronunciation of *sepulchre* was with the accent on the second syllable, every old inhabitant of London can recollect always having heard the church called by that name so pronounced; but the antepenultimate accent seems now so fixed as to make an alteration hopeless. Mr. Forster, in his *Essay on Accent and Quantity*, says that this is the common pronunciation of the present day; and Dr. Johnson, Mr. Elphinstone, Mr. Sheridan, Mr. Scott, Dr. Kenrick, Dr. Ash, Mr. Perry, Barclay, Entick, and W. Johnston, place the accent on the first syllable both of this word and *sepulture*. Fenning places the accent on the second syllable of *sepulchre* when a noun, and on the first when a verb. Mr. Sheridan very properly reverses this order: W. Johnston places the accent on the second syllable of *sepulture*, and Bailey on the second of both. All our orthoëpists place the accent on the second syllable of *sepulchral*, except Dr. Ash and Barclay, who place it upon the same syllable as in *sepulchre*; and the uncouth pronunciation this accentuation produces, is a fresh proof of the impropriety of the common accent. 493. *W.*

SE/WER, shôre. *n. s.* [from issue, issuer. *Cowel.*] A passage for water to run through, now corrupted to shore. *Bacon.*

§ The corrupt pronunciation of this word is become universal, though in Junius's time it should seem to have been confined to London; for, under the word *shore*, he says, "Common shore, Londinensibus ita corrupte dicitur, the common sewer." Johnson has given us no etymology of this word; but Skinner tells us "Non infelicitur *Covellus* declinat à verbo, *issue*, dictumque putat quasi *issuer* abjecta initiali syllaba." Nothing can be more natural than this derivation: the *s* going into *sh* before *u*, preceded by the accent, is agreeable to analogy, 452; and the *u* in this case, being pronounced like *eo*, might easily draw the word into the common orthography, *sewer*; while the sound of *sh* was preserved, and the *eo*, as in *sheen*, *streen*, and *sew*, might soon slide into *o*, and thus produce the present anomaly. *W.*

SHIRE §, shîre. 3, 106. *n. s.* [*scirp*, *scirpan*, Sax. to divide.] A division of the kingdom; a county; so much of the kingdom as is under one sheriff. *Spenser*.

♣ The pronunciation of this word is very irregular, as it is the only pure English word in the language where the final *e* does not produce the long diphthongal sound of *i* when the accent is on it: but this irregularity is so fixed as to give the regular sound a pedantic stiffness. Mr. Sheridan, Mr. Scott, and Buchanan, however, have adopted this sound, in which they have been followed by Mr. Smith; but Mr. Elphinstone, Dr. Lowth, Dr. Kenrick, Mr. Perry, and Barclay, are for the irregular sound; W. Johnston gives both, but places the irregular first; and the Grammar called Bickerstaff's, recommended by Steele, adopts this sound, and gives this rule:

"To sound like double (e) (i) does incline;

"As in machine, and shire, and magazine;

"Like (a) in strake; but writ (ot) in join."

It may likewise be observed, that this word, when unaccented at the end of words, as *Nottinghamshire, Wiltshire, &c.*, is always pronounced with the *i* like *ee*. *W*. [*shire or shire*, Jones; *shire or shere*, Fulton and Knight.]

SHORN, shôrne. The part. pass. of *shear*. *Milton.* ☞ This word was inadvertently marked with the third sound of *o*, in the first edition of this [Walker's] dictionary ; but, from considering its analogy with *swear*, *wear*, and *tear*, I do not hesitate to alter it to the first sound of that vowel : Mr. Sheridan, Mr. Smith, and W. Johnston, are for the first pronunciation ; but Mr. Perry, Mr. Nares, and Mr. Elphinston, are for the last : and these authorities, with analogy on their side, are decisive. *W.*

SHRIEVAL*, shrê'-vâl. *a.* Belonging to the *shrieve* or *sheriff*. *Absalom and Achitophel*.

SHRIEVE*, shrêev. 275. *n. s.* A corruption of *sheriff*.

✠ This was the ancient mode of writing and pronouncing this word. Stow, indeed, writes it *shrive*; but it is highly probable that the *i* had exactly the sound of *ie* in *grieve*, *thieve*, &c., and the common people of London to this day have preserved this old pronunciation, though it is wearing away fast among them. To be convinced, that this is the true etymological manner of writing and pronouncing it, we need but attend to the Saxon word from which it is derived: *reve*, or *reeve*, signifies a steward; and *shrieve* is but a contraction of *shire reeve*, or *shire steward*. But, however just this orthography and pronunciation may be in other respects, it wants the true stamp of polite usage to make it current; it is now grown old and vulgar, and Pope's use of this word,

"Now mayors and *shrieves* all hush'd and satiate lay,"

must only be looked upon as assisting the humour of the scene he describes. *W.*

SHRIEVALTY*, shrê'-vâl-tê. *n. s.* Sheriffalty.

✠ By a caprice com non in language, this compound is not nearly so antiquated as its simple; though it should seem, that, if the old root be taken away, and another planted in its stead, the branches ought to spring from the latter, and not the former. But, though we seldom hear *shrieve* for *sheriff*, except among the lower classes of people in London, we not unfrequently hear, even among the better sort, *shrievealty* for *sheriffalty*; and Junius, in one of his letters to the Duke of Grafton, says, "Your next appearance in office is marked with his election to the *shrievealty*." Publick Advertiser, July 9, 1771. This is certainly an inaccuracy; and such an inaccuracy, in such a writer as Junius, is not a little surprising. *W.*

✠ A very extraordinary pronunciation of this word prevails in London, and what is more extraordinary, on the stage, so different from every other word of the same form as to make it a perfect oddity in the language. This pronunciation approaches to the word *sithe*; and the only difference is, that *sithe* has the flat aspiration as in *this*; and *sigh* the sharp one, as in *thin*. It is not easy to conjecture what could be the reason of this departure from analogy, unless it were to give the word a sound which seems an echo to the sense; and, if this intention had gone no farther than the lengthening or shortening of a vowel, it might have been admitted, as in *fearful, cheerful, pierce, fierce, great, leisure*, and some others; but pronouncing *gh* like *th*, in this word, is too palpable a contempt of orthography to pass current, without the stamp of the best, the most universal and permanent usage on its side. The Saxon combination *gh*, according to the general rule, both in the middle and at the end of a word, is silent. It had anciently a guttural pronunciation, which is still retained in great part of Scotland, and in some of the northern parts of England: but every guttural sound has been long since banished from the

language; not, however, without some efforts to continue, by changing these letters, sometimes into the related guttural consonant *k*, as in *tough, hough*, &c., and sometimes into a consonant entirely unrelated to them, as in *laugh, cough*, &c. These are the only transmutations of these letters; and these established irregularities are quite sufficient, without admitting such as are only candidates for confusion. If it be pleaded that *sithe* better expresses the emission of breath in the act of sighing, it may be answered, that nothing can be more erroneous, as the tongue and teeth have nothing to do in this action. Mr. Sheridan has, indeed, to assist this expression, spelt the word *sith*, as an aspiration must necessarily accompany the act of sighing; but, (to take no notice that, in this case, the *h* ought to be before the *i*;) 397, though such expression may be very proper in oratory, when accompanied by passion, it would be as affected to give it this aspiration in ordinary speech, as to pronounce the word *fearful* with a tremour of the voice and a faltering of the tongue, or to utter the word *laugh* with a convulsive motion of the breast and lungs. To these reasons may be added the laws of rhyme, which necessarily exclude this affected pronunciation, and oblige us to give the word its true analogical sound:

"Love is a smoke, rais'd with the fume of sighs;

"Being purg'd, a fire, sparkling in lovers' eyes."

To **SINISTER**, though uniformly accented on the second syllable in the poets quoted by Johnson, is as uniformly accented on the first by all our lexicographers, and is uniformly so pronounced by the best speakers. Mr. Nares tells us, that Dr. Johnson seems to think, that, when this word is used in its literal sense,—as,

“In his sinister hand, instead of ball,

“He plac’d a mighty mug of potent ale”—*Dryden*—it has the accent on the second syllable; but when in the figurative sense of *corrupt, insidious, &c.*, on the first. This distinction seems not to be founded on the best usage, and is liable to the objections noticed under the word **BOWL**.—See *Principles*, No. 495. *W.*

SINISTER-HANDED*, sîn-nîs-tûr-hând-êd. *a.* Left-handed; unlucky. *Lowlace*.

SIRRAH, sâr'-râ. 92. *n. s.* [*sir*, *ha*!] A compellation of reproach and insult. *Shakespeare.*

☞ This is a corruption of the first magnitude, but too general and inveterate to be remedied. Mr. Sheridan, Mr. Nares, Mr. Scott, Dr. Kenrick, and Mr. Perry, pronounce it as I have done. W. Johnston, alone, pronounces it as if writter: *serrah*; and Mr. Elphinston, because it is derived from *sir* and the interjection *ah*, says it ought to have the first syllable like *sir*.—See quotation under the word *shire*. *W.*

SIRT*, sîrt. *n. s.* [*syrtis*, Lat.] A bog; a quick sand. *Translation of Boccacini.*

To smear with spittle. *Arbuthnot*. To shed ; to spill. *Tusser*.

✂ The second sound of this word is by much the more usual one ; but, as it is in direct opposition to the orthography, it ought to be discontinued, and the *a* restored to its true sound. Correct usage seems somewhat

—nô, môve, nôr, nôt;—tâbe, tâb, bâll;—ôll;—pôlând;—thin, THIS.

inclined to this reformation, and every lover of correctness ought to favour it. *W.*
To SLA'BBER, slâb'-bûr. *v. n.* To let the spittle fall from the mouth; to drivel. To shed or pour any thing.
SLA'BBERER, slâb'-bûr-êr. *n. s.* One who slabbars; an idiot.

There is a corrupt pronunciation of this word like the word *slack*. This is the word, as Dr. Johnson observes, from which it is evidently derived: but, as it has acquired a distinct and appropriated meaning, it is with great propriety that it differs a little from its original, both in orthography and pronunciation.
 All our orthopists unite in pronouncing this word regularly; but, as Mr. Smith observes, bricklayers and their labourers universally pronounce it with the short *a*, as if written *slack*; and it may be added, that the correct speakers, when using the participial adjective in the words *unstaked time*, pronounce the *a* in the same manner; but this ought to be avoided. *W.*

 § This verb and noun, as may be seen in Johnson, are variously accented by the poets; but our modern orthoepists have, in general, given the accent to the first syllable of both words. Dr. Kenrick, Perry, Entick, and Buchanan, accent the second syllable; but Dr. Johnson, Mr. Sheridan, Dr. Ash, Mr. Nares, W. Johnston, Bailey, Barclay, and Fenning, the first. Mr. Scott gives both accents, but that on the first syllable the first place. *W*.
SOJOURN, sò'-jòrn. *n. s.* [sejour, Fr.] A temporary residence; a casual and no settled habitation. *Shakespeare*.
SOJOURNER, sò'-jòrn-úr. *n. s.* A temporary dweller. 1 *Chron*. xxix.

TO SOLDER §, sòl'-dúr. [sòl'-dúr, Jones; sòl'-dúr, Fulton and Knight.] *v. a.* [soulder, Fr.; soldare, Ital.; solidare, Lat. See **SOLDER**.] To unite or fasten with any kind or metallic cement. *Newton*.
 To mend; to unite any thing broken. *Hooker*.
 § Dr. Johnson seems to favour writing this word without the *l*, as it is sometimes pronounced; but the many examples he has brought, where it is spelt with *l*, show sufficiently how much this orthography is established. It is highly probable, that omitting the sound of *l*, in this word, began with mechanics; and, as the word has been lately little used, except in mechanical operations, this pronunciation has crept into our dictionaries, but ought not to be extended to the liberal and metaphorical use of the word. It is derived from the Latin *solidare*, the Italian *soldare*, or the French *souder*; and, when other things are equal, Dr. Johnson's rule of deriving words rather from the French than the Latin is certainly a good one, but ought not to overturn a settled orthography, which has a more original language than the French in its favour. Though our orthoepists agree in leaving out the *l*, they differ in pronouncing the *o*. Sheridan sounds the *o* as in *sod*; W. Johnston as in *soder*; and Mr. Nares as the diphthong *aw*. Mr. Smith says that Mr. Walker pronounces the *l* in this word, but every workman pronounces it as rhyming with *fodder*: to which it may be answered, that workmen ought to take their pronunciation from scholars, and not scholars from workmen.—See **CLEFF. W**.

Notwithstanding I have Mr. Sheridan, Mr. Nares, Dr. Kenrick, W. Johnston, Mr. Perry, and the professors of the Black Art themselves, against me in the pronunciation of this word, I have ventured to prefer the regular pronunciation to the irregular. The adjective *sooty* has its regular sound among the correctest speakers, which has induced Mr. Sheridan to mark it so; but nothing can be more absurd than to pronounce the substantive in one manner, and the adjective, derived from it by adding *y*, in another. The other orthoëpists, therefore, who pronounce both these words with the *oo* like *ú*, are more consistent than Mr. Sheridan, though, upon the whole, not so right. *W.*

SOURCE, sôrse, 318. *n. s.* [source, Fr.] Spring; fountain; head. *Addison.* Original; first cause. *Milton.* First producer. *Waller.*
☞ Some respectable speakers have attempted to give the French sound to the diphthong in this word and its compound *resource*, as if written *source* and *resource*; but, as this is contrary to analogy, so it is to general usage. Sheridan, Nares, Smith, and W. Johnston, give the same sound to both these words as I have done. Mr. Perry gives the same sound to *source*, and, as well as I can guess from the blindness of the print, to *resource* also. Mr. Scott gives both sounds, but seems to prefer the first. Kenrick, only, gives *source* the sound of *source*, and the diphthong *ou* in *resource* the same sound as in *hour, town*, &c. *W.*
SOURED, sôur'-dît. *n. s.* [sourd, Fr.] The little pipe of a trumpet.

SPIKENARD, spîke'-nârd. *n. s.* [*spica nardi*, Lat.] A plant, and the oil or balsam produced from the plant. *Hill*.

§ Mr. Elphinstone is the only orthoëpist who pronounces the *i* short in this word; Mr. Sheridan, Mr. Scott, Mr. Perry, W. Johnston, and Buchanan, preserve it long, as in *spike*: and, though I am well aware of the common idiom of our pronunciation to shorten the simple in the compound, (see **KNOWLEDGE**), yet I think this idiom ought not to be sought after, when not established by custom. *W*.

SPIKY*, spl'-kè. *a.* Having a sharp point. *Dyer*.

SPILL, spill. *n. s.* [*spijlen*, Dutch.] A small shiver of wood, or thin bar of iron. *Carew*. A small quantity of money. *Ayliffe*.

To **SPILL** ð, spill. *v. a.* [*spillan*, Sax.; *spillen*, Dutch.] To shed; to lose by shedding. *Shak*. To destroy; to mischief. *Sidney*. To throw away. *Tickell*.

To **SPILL**, spill. *v. n.* To waste; to be lavish. *Sid-ney*. To be shed; to be lost by being shed. *Watts*.

SPILLER, spill'-lûr. *n. s.* A kind of fishing line. *Carew*.

SPILT*, splît, part. *a.* Variegated. *Spenser*.

SPLITH, splîth. *n. s.* Any thing poured out or wast-
ed. *Shakspeare*.

To **SPIN** ð, spin. *v. a.* preter. *spun* or *span*; part. *spun*. [*spinnan*, Goth.; *spinnen*, Sax.; *spinnen*, Germ. and Dutch.] To draw out into threads.

Exod. xxxv. To form threads by drawing out and twisting any filamentous matter. *Shak*. To pro-tract; to draw out. *Addison*. To form by degrees; to draw out tediously. *Digby*. To put into a turning motion, as a boy's top.

To **SPIN**, spin. *v. n.* To exercise the art of spinning, or drawing threads. *More*. [*spingare*, Ital.] To stream out in a thread or small current. *Drayton*.

To move round as a spindle. *Milton*.

SPINACH, spin'-nîsh. } *n. s.* [*spinachia*, Lat.]

perplexed; difficult; troublesome. *Digby*.

SPIRACLE, spl'-â-kl. 109. [*spir'-â-kl*, *Jones*, *Ful-
ton* and *Knight*; *spir'-râ-kl*, *Sheridan* and *Perry*.]
n. s. [*spiraculum*, Lat.] A breathing hole; a vent;
a small aperture. *Woodward*.

§ I have differed from Mr. Sheridan in the quantity of
the *i* in the first syllable of this word, because I think
the same antepenultimate accent, which shortens the *o*
in *oracle*, and the *i* in *miracle*, ought to have the same
influence in the word in question. 503. *W*.

SPIRAL ð, spi'-râl. 83. *a.* [Fr.] Curve; winding;
circularly involved, like a screw. *Ray*.

SPIRALLY, spi'-râl-ê. *ad.* In a spiral form. *Ray*.

A curve line; any thing wreathed or contorted,
every wreath being in a different plane; a curl; a
twist; a wreath. *Milton*. Any thing growing up
taper; a round pyramid, so called, perhaps, because
a line drawn round and round in less and less cir-
cles, would be a spire; a steeple. *Milton*. The top
or uppermost point. *Shakspeare*.

To **SPIRE**, spîre. *v. n.* To shoot up pyramidically.
Drayton. [*spiro*, Lat.] To breathe.

To **SPIRE***, spîre. *v. a.* To shoot forth. *Spenser*.

wind. *Bacon*. [*esprit*, Fr.] An immaterial sub-
stance; an intellectual being. *Locke*. The soul of
man. *Ecc.* xii. An apparition. *St. Luke*, xxiv.

Temper; habitual disposition of mind. *Milton*.
Ardour; courage; elevation; vehemence of mind.
Shak. Genius; vigour of mind. *Spenser*. Turn
of mind; power of mind, moral or intellectual. *Shak*.

Intellectual powers, distinct from the body. *Claren-
don*. Sentiment; perception. *Shak*. Eagerness;
desire. *South*. Man of activity; man of life, fire,
and enterprise. *Shak*. Persons distinguished by
qualities of the mind. *White*. That which gives
vigour or cheerfulness to the mind; the purest part
of the body, bordering, says *Denham*, on immate-
riality. In this meaning it is commonly written
with the plural termination. *Shak*. Characteristi-
cal likeness; essential qualities. *Wotton*. Any
thing eminently pure and refined. *Shak*. That
which hath power or energy. *South*. An inflam-
mable liquor raised by distillation; as brandy, rum.

Boyle. Mark to denote an aspirated pronunciation.
Dalgarno. It may be observed, that in the old poets
spirit was a monosyllable, and therefore was
often written *sprite*, or, less properly, *sprigh*.

Spenser.

✠ The general sound of the first *i* in this word and all its compounds was, till lately, the sound of *e* in *merit*: but a very laudable attention to propriety has nearly restored the *i* to its true sound: and now *spirit*, sounded as if written *spirit*, begins to grow vulgar.—See *Principles*, No. 108, 109, 110, and the word *MIRACLE*. Mr. Sheridan, W. Johnston, and Mr. Smith, have given into this false sound of *i*, 109; but Dr. Kenrick, Mr. Scott, and Mr. Perry, Jones, Fulton and Knight, have given it the true sound; and Mr. Nares very justly thinks that this word, *miracle*, and *cistern*, are now more frequently and properly heard with the short sound of *i*. *W.*

To **SPIRIT**, spîr'-î-t, *v. a.* To animate or actuate as a spirit. [*spiritalo*, Ital.] *Milton*. To excite; to animate; to encourage; to invigorate to action. *Temple*. To draw; to entice. *Brown*.

SPIRITALLY, spîr'-î-t-â-l-ê. *ad.* [*spiritus*, Lat.] By means of the breath. *Holder*.

SPIRITED, spîr'-î-t-ê-d. *a.* Lively; vivacious; full of fire. *Pope*.

SPIRITEDLY*, spîr'-î-t-ê-d-l-ê. *ad.* In a lively or strong manner.

SPLIT*, spî-t. *n. s.* What is thrown from the mouth.

SPI TAL, spî-t-âl. *n. s.* [corrupted from *hospital*.] A charitable foundation. *South*. See **SPI T T L E**.

✠ The *a* in all these words [*spital*, *hospital*, and *Spital-fields*] has a tendency to sink its sound, and to confound them with *spittle*. In the last of these words this tendency is incurable; but in the two first it would be far from pedantic to preserve the sound of the *a* as in *medal*. Dr. Johnson seems to depart from etymology in doubling the *t* [altered by *Todd*] in these words. *W.*

To **SPLITCHOCK**, spîsh'-kôk. *v. a.* To split an eel in two, longwise, and broil it. *Kings*.

SPLITCHOCK*, spîsh'-kôk. *n. s.* An eel spitch-cocked. *Decker*.

SPLENISH, splèn'-ish. *a.* Fretful; peevish. *Drayton*.

ſ Dr. Johnson has received this word without any remark upon the impropriety of its formation. To turn a Latin noun into an English adjective by the addition of *ish*, is false heraldry in language: especially as we have the English word *spleen*, from which it might have been formed with so much more propriety: but to pronounce the *e* long, as Mr. Sheridan has done, is adding absurdity to error. *W.*

SPLENITIVE, splèn'-è-tìv. 512. *a.* Hot; fiery; passionate. *Shakespeare*. *Ob. J.*

SPLINT, splènt. *n. s.* (or perhaps *splint*; *spinella*, Ital.) A callous, hard substance, or an insensible swelling, which breeds on or adheres to the shankbone of a horse, and, when it grows big, spoils the shape of the leg. *Farrier's Dict.* A splint or splinter.

SPRINGY, spring'-ê, or spring'-jê. *a.* Elastic; having the power of restoring itself. *Newton.*

✠ A most absurd custom has prevailed in pronouncing this adjective, as if it were formed from *spring*, a gin, rhyming with *fringe*, when nothing can be plainer than its formation from *spring*, an elastic body, and that the addition of *y* ought no more to alter the sound of *g* in this word than it does in *stringy*, full of strings. It is certainly thus we ought to pronounce the substantive formed from this adjective, which we meet with in Mr. Forster: "In general, that nervous *springiness*, (if I may so express it,) so very observable in Mr. Pope's metre, is often owing chiefly to a trochee beginning his line." *Essay on Accent and Quantity*, p. 59. But the absurdity is still increased when this vicious pronunciation is given to the adjective formed from *spring*, a fountain: this, however, is so contrary both to custom and analogy, that nothing but an oversight in Mr. Sheridan could have prevented his making the distinction.—See *Principles*, No. 409. *W.*

‡ A very improper, though a very prevailing misac-
 centuation of the passive participle of the verb *to sub-*
ject, has obtained, which ought to be corrected. All
 the authorities in Johnson place the accent of *subjected*
 on the same syllable as the verb, except one from Mil-
 ton:

"He subjected to man's service angel wings."

But in another passage Milton accents this word as it
 ought to be, even when an adjective:

"The angel

"Led them direct and down the cliff as fast

"To the worded plain."

But as the word *subject* is an adjective as well as a verb,
 and when an adjective it has always the accent on the
 first syllable, so the participle has not only caught the
 accent of the adjective, but, as one error commonly
 generates another, seems to have communicated the
 impropriety to the verb; which we sometimes hear,
 contrary to all analogy and authority, accented on the
 first syllable likewise. These improprieties are easily
 corrected at first, and, in my opinion, they are not yet
 so rooted as to make correctness look like pedantry. *W.*

 & Mr. Sheridan is the only orthoëpist who has accented this word on the first syllable, as I have done, for Dr. Johnson, Dr. Ash, Dr. Kenrick, Barclay, Fenning, Bailey, and Entick, accent the second. Its companion, *desultory*, is accented on the first syllable by Mr. Sheridan, Dr. Johnson, Mr. Nares, Mr. Smith, and Fenning; but on the second by Dr. Ash, Dr. Kenrick, Mr. Scott, W. Johnston, Mr. Perry, Buchanan, Bailey, and Entick. As these two words must necessarily be accented alike,

—nô. môte, nôr, nôt; —tûbe, tûb, bûll; —ôl; —pôûnd; —thin, THIS.

we see Dr. Johnson and Fenning are inconsistent. But, though the majority of authorities are against me in both these words, I greatly mistake if analogy is not clearly on my side.—See *Principles*, No. 512. *W.*

SUBTLE, sùt-tùl. 347, 405. *a.* Sly; artful; cunning. *Spenser.*

This word and *subtle* have been used almost indiscriminately to express these different senses, as may be seen in Johnson; but, as custom has adopted a different spelling and a different pronunciation, it is to be presumed it has not been without reason. That the first sense should extend itself to the latter, is not to be wondered at, as words have a tendency to fall into a bad sense; witness *knave*, *villain*, &c.; but if custom has marked this difference of sense by a difference of spelling and pronunciation, it should seem to be an effort of nature to preserve precision in our ideas. If these observations are just, the abstracts of these words ought to be kept as distinct as their concretes; from *subtle* ought to be formed *subtily*, and from *subtle*, *subtlety*; the *b* being heard in the two first, and mute in the two last. *W.*

SUBTLETY, sùt-tùl-tè. *n. s.* Artfulness; cunning. *SUBTLY*, sùt-tùl. *ad.* Slyly; artfully; cunningly. *Milton.* Nicely; delicately. *Pope.*

[F] This word is not unfrequently pronounced with the accent on the second syllable, as if it were formed from *success*; but this accentuation, though agreeable to its Latin original, has, as in *confessor*, yielded to the prevailing power of the English antepenultimate accent. Dr. Johnson, Mr. Sheridan, Mr. Elphinstone, and Entick, accent this word on the first syllable; and Dr. Ash, Dr. Kenrick, W. Johnston, Mr. Perry, Buchanan, and Bailey, on the second, Barclay and Fenning give both, but prefer the first: Mr. Scott gives both, and prefers the second: but, from the opinion that is foolishly given forth, that we ought to accent words as near the beginning as possible, there is little doubt that the antepenultimate accent will prevail. *W.*

ŷ The first *g* in *exaggerate* is, by a carelessness of pronunciation, assimilated to the last, this is not always the case in the present word. For, though we sometimes hear it sounded as if written *sug-jest*, the most correct speakers generally preserve the first and last *g* in their distinct and separate sounds. Mr. Sheridan, Mr. Scott, and Mr. Nares, pronounce the *g* in both syllables soft, as if written *sug-jest*. Dr. Kenrick, Mr. Perry, and Barclay, make the first *g* hard, and the second soft, as if written *sug-jest*, as I have done; for, as the accent is not on these consonants, there is not the same apology for pronouncing the first soft as there is in *exaggerate*; which see. *W.*

Dr. Johnson says, till within these few years, universally pronounced with the accent on the last syllable, like the verb; but, since Johnson and Lowth led the way, a very laudable desire of regulating and improving our language has given the substantive the accent on the first syllable, according to a very general rule in the language, 492; but this has produced an anomaly in pronunciation, for which, in my opinion, the accidental distinction of the noun and verb does not make amends: if we place the accent on the first syllable of the noun, the *ey* in the last must necessarily be pronounced like *ey* in *barley, attorney, journey, &c.* Notwithstanding, therefore, this accentuation has numbers to support it, I think it but a shortsighted emendation, and not worth adopting. All our orthoëpists pronounce the verb with the accent on the last, except Fenning, who accents the first. Mr. Sheridan, Mr. Scott, Mr. Nares, Dr. Ash, Perry, and Entick, [and Todd] accent the first syllable of the noun; but Dr. Johnson and Bailey, the original lexicographers, accent the last. Dr. Kenrick does not accent the noun, and Barclay has not inserted it. *W.*

Dr. Johnson says, Prior has accented this word improperly on the first syllable. To which observation Mr. Mason adds, "Perhaps it is Johnson who has improperly placed the accent on the second syllable." If Mr. Mason were asked why, perhaps he would be puzzled to answer. If it be said that usage is on the side of Prior, what shall we think of all our orthoëpists who have accented this word like Johnson? for thus we find the word accented by Sheridan, Kenrick, Scott, Perry, W. Johnston, Buchanan, and Barclay. Entick has, indeed, the accent on the first, but on the second of *susceptive*; and, if usage alone is pleaded for the accent on the first, it may be answered, What can be a better proof of usage than the authors I have quoted? But Mr. Nares, with his usual good sense, reprobrates this accentuation on the first syllable, and says it is high time to oppose it. The only argument that can be alleged for it is that which Mr. Elphinston has brought in favour of *comparable, admirable, and acceptable*, which is, that, when the accent is on the second syllable of these words, they signify only a physical possibility

—nô, môve, nôr, nôt; —tûbe, tâb, bûll; —ôil; —pôûnd; —thin, THIS.

of being compared, admired, and accepted; but when the accent is on the first, they signify a fitness or worthiness of being compared, admired, and accepted. "Thus," says he, "one thing is literally comparable with another, if it can be compared with it, though not perhaps comparable, that is, fit to be compared to it; so a thing may be acceptable by a man, that is far from being acceptable to him."—*Principles of the English Language*, vol. 1, page 169. This is the best reason I ever yet heard for this high accentuation; but how such a difference of pronunciation tends to perplex and obscure the meaning, may be seen under the word *BOWL*: nor does the word in question seem susceptible of such a difference in the sense from a different accentuation. When poets are on the rack for a word of a certain length and a certain accent, it is charity to make allowances for their necessities; but no quarter should be given to coxcombs in prose, who have no better plea for a novelty of pronunciation, than a fop has for being the first in the fashion, however ridiculous and absurd. *W.*

SWOLLEN, } swôln. 103. { The participle passive
SWOLN, } of swell. [ɹpollen, Sax.] *Spenser*.

SWOM, swôrn. The preterit of swim. *Shakspeare*.

To SWOON ɹ, swôdn. 475. v. n. [ɹppnan, Sax.] To suffer a suspension of thought and sensation; to faint. *Shakspeare*.

⚡ This word should be carefully distinguished in the pronunciation from *soon*: the *v*, as Mr. Nares justly observes, is effective, and should be heard. It would have been beneath a dictionary of the least credit to take notice of a vulgar pronunciation of this word as if written *sound*, if it had not been adopted by one of our orthoëpists. The same observation holds good of the following word, [*swoop*] which must not be pronounced exactly like *soop*. *W*.

SWOON, swôdn. n. s. A lipthymy; a fainting fit.

SWOONING*, swôdn'-ing. n. s. The act of fainting. *Bp. Hall*.

To SWOOP ɹ, swôdp. 306. v. a. [the same as sweep.] To seize by falling at once, as a hawk upon his prey. *Wilkins*. To prey upon; to catch up. *Glanville*.

To SWOOP, swôdp. v. n. To pass with pomp. *Dryden*.

SWORDLAW, sôrd'-lâw. n. s. Violence; the law by which all is yielded to the stronger. *Milton*.

SWORDMAN, sôrd'-mân. n. s. Soldier; fighting man. *Shakspeare*.

⚡ I see no good reason why we should not write and pronounce *swordsmen* and *govnsman*, rather than *swordman* and *govnman*, though Johnson produces his authorities for the latter orthography from good authors. The *s* seems to have intervened naturally between the mute and the liquid, to facilitate the pronunciation, as in *statesman*, *sportsman*, *huntsman*, and sometimes between two liquids, as *townsman*, *salesman*, &c. But Dr. Johnson's sense of the word *swordman*, meaning a man of the profession of the sword, or a soldier, is now obsolete: we now never hear the word but as signifying a man expert in the use of the sword: and in this sense he is always called a *swordsmen*. *W*.

SWORDLAYER, sôrd'-plâ'-ûr. n. s. [sword and play.] Gladiator; fencer; one who exhibits in publick his skill at the weapons by fighting for prizes. *Hakewill*.

SWORE, swôre. The preterit of swear. [ɹpop, Sax.] *Milton*.

SWORN, swôrn. The part. pass. of swear. *Shak*.

To SROUND* ɹ, v. n. To swoon. *Shakspeare*.

SWUM, swôɹ. Preterit and part. pass. of swim. *Milton*.

SWUNG, swûng. 410. Preterit and part. pass of swing. *Addison*.

3. I have met with this word nowhere but in *Harris*' Supplement to Johnson, and there I find it accented in a different way from what I have always heard it in conversation. In those circles which I have frequented the accent has been placed on the first syllable; and if we survey the words of this termination, we shall find that *iz* is added to every word without altering the place of the accent: and that, consequently, *systematize* ought to have the accent on the first syllable. This reasoning is specious; but when we consider that this word is not formed from the English word *system*, but from the Greek *συστημα*, or the latter Latin *systema*, we shall find that the accent is very properly placed on the second syllable, according to the general rule. If we place the accent on the first, we ought to spell the word *systemize*, and then it would be analogically pronounced; but, as our best writers and speakers have formed the word on the Greek and Latin plan, it ought to be written and pronounced as Mr. Mason has given it. *W*.

SYSTEM-MAKER*, sís-tém-má-kúr. *n. s.* One who forms systems. *Prior*.

SYSTEM-MONGER*, sís-tém-mòng-gúr. *s.* One fond of framing systems. *Ld. Chesterfield*.

Mr. Perry and Mr. Barclay are the only orthoëpists who make the *g* in this word [target] soft. Mr. Sheridan, Mr. Scott, Mr. Nares, Dr. Kenrick, W. Johnston, Dyche, and that profound searcher into English sounds, Mr. Elphinstone, make it hard, as in *forget*; and, if etymology be any rule, the Erse word *an taargett* is decidedly

in favour of this pronunciation; for almost all our English words, which have the *g* hard before *e* and *i*, are of Erse or Saxon original.—See *Principles*, No. 380, 381. *W.*

TARGETTER, târ-gêt-tèèr'. *n. s.* One armed with a target. *Chapman.*

—nò, mōve, nòr, nòt; —tùbe, túb, búll; —ðil; —pōdnd; —thin, THIS.

✂ I have every orthoëpist in the language against me in the preference I give to the first sound of this word, except Mr. Elphinston; and his authority as an analogist outweighs every other. I see no good reason that this word should have the broad sound of *a*, and not *eunt*, *havnt*, *flaunt*, *jaunt*, and the proper name *Saunders*; nor is my ear much accustomed to hear it so pronounced.—See SAUNTER, HAUNT, and *Principles*, No. 214. *W.*

TAUNT, tánt. 214. *n. s.* Insult; scoff; reproach; ridicule. *Shakespeare.*

TA'UNTER, tánt'-úr. *n. s.* One who taunts, reproaches, or insults. *Hulot.*

TAUTOLOGY, táw-tòl'-lò-jè. 518. *n. s.* [*ταυτολογία*; *tauto* and *lógos*, Gr.; *tautologie*, Fr.] Repetition of the same words, or of the same sense in different words. *Glanville.*

TAUTOPHONY †, táw-tòf'-lò-nè. *n. s.* A successive repetition of the same sound.

✂ I have long wished to insert this word into my vocabulary, from a conviction of its utility in conversing on the sounds of words, but was deterred for want of an authority from any of our dictionaries, when, upon reading the very learned and ingenious Essay on the Prosodies of the Greek and Latin Languages, I found the word used in exactly that manner, which shows the propriety, and even necessity, of adopting it. The learned author says, "The most extraordinary *tautophony* which he [Eustathius] mentions, is that of the vowels *a* and *η*, in the proper names of the goddesses *Ips* and *Ἥρη*."—On the Prosodies of the Greek and Latin Languages; printed for Robson, 1796. *W.*

TA'VERN, táv'-úr. *n. s.* [*taverna*, Fr.; *taberna*, Lat.] A house where wine is sold, and drinkers are entertained. *Shakespeare.*

TENABLE, tēn-ā-bl. *a.* [tenable, Fr.] That may be maintained against opposition; that may be held against attacks. *Bacon.*

§ The quantity of *e* in the first syllable of this word, and its relatives *tenet*, *tenor*, and *tenure*, is one of the most puzzling difficulties of pronunciation. How differently this letter is pronounced by different speakers may be gathered from a view of those orthoëpists who have marked the quantity of the vowels:

| | | | | |
|--------------|----------|--------|--------|---------|
| Sheridan, | tēnable, | tēnet, | tēnor, | tēnure. |
| Kenrick, | tēnable, | tēnet, | tēnor, | tēnure. |
| Nares, | tēnable, | — | tēnor, | tēnure. |
| Ash, | tēnable, | tēnet, | tēnor, | tēnure. |
| Scott, | tēnable, | tēnet, | tēnor, | tēnure. |
| Entick, | tēnable, | tēnet, | tēnor, | tēnure. |
| Perry, | tēnable, | tēnet, | tēnor, | tēnure. |
| W. Johnston, | tēnable, | tēnet, | tēnor, | tēnure. |
| Bailey, | — | — | — | tēnure. |
| Buchanan, | tēnable, | — | tēnor, | tēnure. |
| Fry, | tēnable, | tēnet, | tēnor, | tēnure. |
| Smith, | — | tēnet, | — | — |
| Elphinston, | — | — | tēnor, | — |

From this survey of our dictionaries, we find them uniform only in the word *tenor*. They are nearly equally divided on the word *tenet*; and, if similitude were to decide, it would be clearly in favour of the short vowel, in this word, as well as in *tenor*. They are both Latin words, and both have the vowel short in the original. This, however, is no reason with those who understand the analogy of English pronunciation, (for *temour minor*, &c. have the first vowel short in Latin,) 594; but it sufficiently shows the partiality of the ear to the short vowel in words of this form, as is evident in the word *tenant*. The word *tenable* seems rather derived from the French *tenable* than the Latin *teneo*, and, be-

ing of a different form, comes under a different analogy. The termination *able*, though derived from the Latin *abilis*, is frequently annexed to mere English words, as *pleasurable*, *pasturable* &c., and therefore makes no alteration in the accent or quantity of the word to which it is subjoined. 501. But, as *tenable* must be considered as a simple in our language, the shortening power of the antepenultimate accent alone seems to determine the quantity of the first syllable of this word, which, like *gelable*, *probable*, &c., has the short quantity of the original Latin to plead; a plea which seems to have some weight in words of this termination, where the antepenultimate accent appears to have less influence than in most of the other classes of words.—See **PLACABLE**. The word *tenure* seems inclined to lengthen the first vowel, in order to distinguish itself from *tenor*; and, as there are no good reasons for shortening it, this reason seems sufficient to turn the balance in its favour, even if it had not analogy and such a weight of usage on its side. *W.*

THAT ʒ, thắt. 50. *pronoun*. [*that, thata*, Goth.; ðeæt
Sax.; dat, Dutch.] Not this, but the other. *Shak*.
Which; relating to an antecedent thing. *Perkins*

Who; relating to an antecedent person. *Dan. iv.* It sometimes serves to save the repetition of a word or words foregoing: as, What is that to us? See thou to that. *St. Matt. xvii.* Opposed to *this*, as *the other to one*: as, *This* is not fair; not profitable that. *Dryden.* When *this* and *that* relate to foregoing words, *this* is referred, like *hic* or *cecyl*, to the latter, and *that*, like *ille* or *cela*, to the former. *Cowley.* Such as. *Tillotson.* That which; what. *Shak.* The thing. *Numbers, vi.* The thing which then was. *Cowley.* By way of eminence: as, *This* is that Jonathan. *Cowley.*—In that. Because; in consequence of. *Hooker.*

¶ When *this* word is used as a pronoun demonstrative, it has always an accent on it, and is heard distinctly rhyming with *hat, mat, &c.* Thus, in Pope's Essay on Criticism, v. 5:

"But, of the two, less dang'rous is th' offence
"To tire our patience, than mislead our sense,
"Some few in that, but numbers err in this:
"Ten censure wrong, for one who writes amiss."

Here the word *that* is as distinctly pronounced as any other accented word in the language.

When *this* word is a relative pronoun, and is arranged in a sentence with other words, it never can have an accent, and is therefore much less distinctly pronounced than the foregoing word. In this case the *a* goes into that obscure sound it generally has when unaccented, 88, as may be heard in pronouncing it in the following passage from Pope's Essay on Criticism, v. 297:

"True wit is nature to advantage dress'd;
"What oft was thought, but ne'er so well express'd;
"Something, whose truth, convinc'd at sight, we find,
"That gives us back the image of our mind."

Here we find the *a* so obscured as to approach nearly to short *u*; and, without any perceptible difference in the sound, the word might be written *that*. 92. *W.*

THAT, THÁT, 50, 466. *conj.* [*thatei*, Goth.] Because. Noting a consequence. *Dryden.* Noting indication. *Bacon.* Noting a final end. *Cowley.*

¶ What has been observed of the pronunciation of *this* word, when a relative pronoun, is perfectly applicable to it when a conjunction; in either case it never has the accent, and necessarily goes into an obscure sound like short *u*. Thus, in the following passage from Pope's Essay on Criticism:

"The vulgar thus through imitation err:
"As oft the learn'd by being singular:
"So much they scorn the crowd, that, if the throng
"By chance go right, they purposely go wrong."

Here the conjunction *that* is pronounced with exactly the same degree of obscurity as when a relative pronoun.

The word *that*, by being sometimes a demonstrative pronoun, sometimes a relative, and sometimes a conjunction, may produce a quadruple repetition of the same word, which, though not elegant, is strictly grammatical; a repetition which is, perhaps, peculiar to the English language. This is humorously exemplified by Mr. Steele in the Spectator, No. 80, in the Just Remonstrance of affronted *That*, where he brings in this word, declaring how useful it had been to a great orator, who, in a speech to the lords, had said, "My lords, with humble submission, *that* that I say is, *that that* that that gentleman has advanced is *not that* that he should have proved to your lordships." In the pronunciation of this passage, it is plain that the word *that*, which is not printed in Italics, is pronounced nearly as if written *that*. I am sensible of the delicacy of the obscure sound of this *a*, and therefore do not offer *u* as a perfect equivalent, but as the nearest approach to it, and as the means of pointing out the power of the accent, and its importance in ascertaining the sense; for, if all these words were pronounced equally distinct, it is plain the sense would be obscured; and, so liable are the relative, the conjunction, and the demonstrative, to be confounded, that some writers have distinguished the latter by printing it in Italics. Those who wish to see the most profound and ingenious investigation of the grammatical origin of these words, must consult Horne Tooke's *Divisions of Purley. W.*

THATCH, thátsh. 466. *n. s.* [*ðace*, Sax.] Straw laid upon the top of a house to keep out the weather. *Pope.*

To THATCH, thátsh, *v. a.* [*ðaccian*, Sax.] To cover as with straw. *Bacon.*

THA'TCHER, thátsh'-âr. *n. s.* One whose trade is to cover houses with straw. *Swift.*

THAUMATURGICAL*, thâw-mâ-tûr'-jè-kâl. *a.* Exciting wonder. *Burton.*

THAUMATURGY*, thâw-mâ-tûr-jè. *n. s.* [*thaupa thauros* and *teyov*.] Act of performing what may excite wonder. *Warton.*

To THAW, thâw. 466. *v. n.* [*ðapan*, Sax.; *degen* Dutch.] To grow liquid after congelation; to melt. *Donne.* To remit the cold which had caused frost.

To THAW, thâw, *v. a.* To melt what was congealed. *Shakspeare.*

THAW, thâw, *n. s.* Liquefaction of any thing congealed. *Shakspeare.* Warmth such as liquefies congelation. *Shakspeare.*

THE, thê, or THÊ. 466. *article.* [*ðe*, Sax.] The article noting a particular thing. *Shak.* Before a vowel, *e* is commonly cut off in verse. *Daniel.* Sometimes *he* is cut off: as, In this scale gold, in t'other fame does lie, *Cowley.* It is used by way of consequential reference. *Whole Duty of Man.* *The* is sometimes used according to the French idiom: as, It is a constitution the most adapted. *Addison.*

¶ Mr. Sheridan has given us these two modes of pronouncing this word, but has not told us when we are to use one, and when the other. To supply this deficiency, therefore, it may be observed, that when *the* is prefixed to a word beginning with a consonant, it has a short sound, little more than the sound of *th* without the *e*; and when it precedes a word beginning with a vowel, the *e* is sounded plainly and distinctly. This difference will be perceptible by comparing the *pen, the hand, &c.*, with the *oil, the air, &c.*; or the difference of this word before *ancients* and *moderns* in the following couplet of Pope:

"Some foreign writers, some our own, despise;
"The ancients only, or the moderns, prize."

A very imperfect way of pronouncing this word very frequently arises in verse, where the poet, for the preservation of the metre, cuts off *e* by an apostrophe, and unites the article to the following word. This pronunciation depraves the sound of the verse without necessity, as the syllable formed by *e* is so short as to admit of being sounded with the following syllable, so as not to increase the number of syllables to the ear, or to hurt the melody.

"'Tis hard to say if greater want of skill
"Appear in writing or in judging ill;
"But, of the two, less dang'rous is th' offence
"To tire our patience than mislead our sense."

Pope.

"Him the Almighty Power
"Hurl'd headlong flaming from th' ethereal sky,
"With hideous ruin and combustion, down
"To bottomless perdition, there to dwell
"In adamantine chains and penal fire,
"Who durst defy th' Omnipotent to arms. *Milton.*

In these examples we see the particle *the* may either form a distinct syllable or not. In the third line from Pope the first *the* forms a distinct syllable, but the second is sunk into the succeeding noun. The same may be observed of this particle in the first, second, and sixth lines in the passage from Milton: but what appears strange is, that, though the particle *the* before a vowel, and shortened by an apostrophe, does not augment the number of syllables, it is really pronounced longer than where it forms a syllable, and is not thus shortened by elision. This is apparent in the third line from Pope:

"But, of the two, less dang'rous is th' offence."

The reason why the first *the*, though pronounced shorter than the second, forms a syllable, and the second does not, seems to arise from the coalescence of the vowels, which, though lengthened in sound, may still be pronounced with one impulse of the breath. Thus, when a consonant follows the particle *the*, we find two distinct impulses, though the *e* is dropped; but when a vowel follows *the*, the impulse on the particle slides over, as it were, to the consonant of the succeeding syllable, without forming two distinct impulses, nearly as if a *y* were interposed, and the words were written *th'yoffence, th'Yomnipotent, &c.*

I would not, however, be supposed to disapprove of the practice of eliding the *e* before a vowel to the eye when the verse requires it: this practice is founded on good sense: and the first line in the passage from Milton shows the necessity of making the distinction when it

—nò, mōve, nòr, nòt; —tùbe, túb, búl; —ðl; —pònd; —thín, THIS.

is and when it is not to be elided: what I wish to reform is the practice of shortening the *s* to the *e*, and thus micing and impoverishing the sound of the verse without necessity. *W.*

THY, *ṭhi*, or *thê*. 466. *pronoun*. [*Ṭin*, Sax.] Of thee; belonging to thee; relating to thee: the possessive of *thou*. *Cowley*.

From what has been already observed under the pronoun *my*, we are naturally led to suppose, that the word *thy*, when not emphatical, ought to follow the same analogy, and be pronounced like *the*, as we frequently hear it on the stage; but, if we reflect that reading or reciting is a perfect picture of speaking, we shall be induced to think that, in this particular, the stage is wrong. The second personal pronoun *thy* is not, like *my*, the common language of every subject; it is used only where the subject is either raised above

—nô, môve, nôr, nôt;—tûbe, tûb, bûll;—ôil;—pôûnd;—thûn, THIS.

common life, or sunk below it, into the mean and familiar. When the subject is elevated above common life, it adopts a language suitable to such an elevation, and the pronunciation of this language ought to be as far removed from the familiar as the language itself. Thus, in prayer, pronouncing *thy* like *the*, even when unemphatical, would be intolerable; while suffering *thy*, when unemphatical, to slide into *the* in the pronunciation of slight and familiar composition, seems to lower the sound to the language, and form a proper distinction between different subjects. If, therefore, it should be asked why, in reciting epick or tragick composition, we ought always to pronounce *thy* rhyming with *high*, while *my*, when unemphatical, sinks into the sound of *me*, it may be answered, because *my* is the common language of every subject, while *thy* is confined to subjects either elevated above common life, or sunk below it into the negligent and familiar. When, therefore, the language is elevated, the uncommonness of the word *thy*, and its full sound rhyming with *high*, is suitable to the dignity of the subject; but the slender sound like *the* gives it a familiarity only suitable to the language of endearment or negligence, and for this very reason is unfit for the dignity of epick or tragick composition. Thus in the following passages from Milton:

"Say first, for heav'n hides nothing from thy view,
"Nor the deep tract of hell."

Parad. Lost, b. 1.

"O thou, that, with surpassing glory crown'd,
"Look'st from *thy* sole dominion, like the God
"Of this new world; at whose sight all the stars
"Hide their diminish'd heads; to thee I call,
"But with no friendly voice, and add *thy* name,
"O sun, to tell thee how I hate *thy* beams."

Parad. Lost, b. 4.

Here, pronouncing the pronoun *thy* like the word *the*, would familiarize and debase the language to prose. The same may be observed of two following passages from the tragedy of Cato:

"Now, Cæsar, let *thy* troops beset our gates,
"And bar each avenue; *thy* gathering fleets
"O'erspread the sea, and stop up ev'ry port;
"Cato shall open to himself a passage,
"And mock *thy* hopes."

Here the impropriety of pronouncing *thy* like *the* is palpable: nor would it be much more excusable in the following speech of Portius, in the same scene of the same tragedy:

"Thou see'st not that *thy* brother is *thy* rival;
"But I must hide it, for I know *thy* temper.
"Now, Marcus, now *thy* virtue's on the proof;
"Put forth *thy* utmost strength, work every nerve,
"And call up all *thy* father in *thy* soul."

As this pronoun is generally pronounced on the stage, it would be difficult for the ear to distinguish whether the words are,

"Thou know'st not that *thy* brother is *thy* rival,"

or,

"Thou know'st not that *the* brother is *the* rival," &c.

And this may be one reason why the slender pronunciation of *thy* should be avoided as much as possible.

Perhaps it will be urged, that, though these passages require *thy* to be pronounced so as to rhyme with *high*, there are other instances in tragedy, where the subject is low and familiar, which would be better pronounced by sounding *thy* like *the*: to which it may be answered, that when Tragedy lowers her voice, and descends into the mean and familiar, as is frequently the case in the tragedies of Shakspeare, the slender pronunciation of *thy* may be adopted, because, though the piece may have the name of a tragedy, the scene may be really comely. The only rule, therefore, that can be given, is a very indefinite one; namely, that *thy* ought always to be pronounced so as to rhyme with *high*, when the subject is raised, and the personage dignified; but when the subject is familiar, and the person we address without dignity or importance, if *thy* be the personal pronoun made use of, it ought to be pronounced like *the*: thus, if, in a familiar way, we say to a friend, *Give me thy hand*, we never hear the pronoun *thy* sounded so as to rhyme with *high*: and it is always pronounced like *the* when speaking to a child; we say, *Mind thy book*, *Hold up thy head*, or, *Take off thy hat*. The phraseology we call *theeing* and *thouing*, is not in so common use with us as the *tutoy* among the French: but as the second personal pronoun *thou*, and its possessive *thy*, are indispensable in composition, it seems of some importance to pronounce them properly.—See *Rhetorics; Grammar*, page 32. ☞ As this word, when it signifies a rank or row, is universally pronounced like *tear*, a drop from the eye, it ought always to be written *tier*; which would prevent a gross irregularity. This is the more to be wished, not only as its derivation from the old French *tiere* seems to require this spelling, but to distinguish it from the word *tire*, a head-dress; which, probably, being a corruption either of the word *tiara*, an ornament for the head, or of the English word *attire*, ought to be written and pronounced like the word *tire*, to fatigue

Dr. Kenrick is the only orthoëpist who has attended to this distinction.—See *Bowll. W.*

To TIRE §, dre. v. a. [tīpan, tīpan, Sax.] To fatigue; to make weary; to harass; to wear out with labour or tediousness. *Dryden.* [from *attire* or *tire*, from *tiara*.] To dress the head. *2 Kings*, ix.

To TIRE, dre. v. n. [tēopian, Sax.] To fail with weariness. *Shakespeare.*

TIVY, tīv'-ē. n. s. A word expressing speed, from *tivity*, the note of a hunting-horn. *Dryden.*

To §, tōō. ad. [to, Sax.; te, Dutch.] A particle coming between two verbs, and noting the second as the object of the first: as, I love to read. *Smalridge.* It notes the intention: as, She raised a war to call me back. *Dryden.* After an adjective, it notes its object: as, ready to try. *Shak.* Noting futurity: as, We are still to seek. *Bentley.*—*To and again.* *To and fro.* Backward and forward. *Fairfax.*

§ What has been observed of the word *the*, respecting the length of the *e* before a vowel, and its shortness before a consonant, is perfectly applicable to the preposition, and the adverb *to*. This will be palpable in the pronunciation of the verbs to *begin* and to *end*, and in the phrases, I went to London, he went to Eton. It may be observed too, that this word, though deprived of its *o* to the eye, always preserves it to the ear. Whether we see it elided, as in Pope's Essay on Man,—

“Say what the use were finer optics giv'n,
“T' inspect a mite, not comprehend the heav'n,—”

or preserved with an apostrophe after it, as in Milton,—

“For still they knew, and ought to have still remember'd
“The high injunction not to taste that fruit,
“Whoever tempted,—”

in both these instances the word *to* ought to be pronounced in exactly the same manner; that is, like the number *two*. *W.*

TOUGH, tôf. 314, 351. *a.* [*tooh*, Sax.] Yielding to flexure or extension without fracture; not brittle. *Bacon*. Stiff; not easily flexible. *Dryden*. Not

—nô, môve, nôr, nô; —tûbe, tûb, báll; —ðil; —pôund; —thin, THIS.

easily injured or broken. *Shak.* Viscous; clammy; ropy; tenacious. Difficult: this is an ancient usage of the word, and is still a colloquial one: as, a *tough* piece of business. *Chaucer.*

To TOUGHEN, tûf'-in. 103. v. n. To grow tough. *Mortimer.*

To TOUGHEN, tûf'-in. v. a. To make tough.

TOUGHNESS, tûf'-nês. n. s. [cohueppe, Sax.] Not brittleness; flexibility. *Bacon.* Viscosity; tenacity; clamminess; glutinousness. *Arbutnot.* Firmness against injury. *Shakespeare.*

TOUPE'E*, tûp'-pê'. } [tûp'-pê'. *Sheridan,*
TOUPE'T, tûp'-pê'. 315. } *Perry, Jones, Ful-*
ton and Knight.] n. s. [toupet, Fr.] A kind of fore-
top; natural or artificial hair particularly dressed
on the forehead. *Swift.*

TOUR, tûr. 315. n. s. [Fr.] Ramble; roving jour-
ney. *Addison.* Turn; revolution. *Blackmore.* Turn;
cast; manner. *Bentley.*

My experience fails me if this word is not slowly con-
forming to the true English sound of the vowels heard
in *thou*. The smart traveller to France and Italy would
fear we should never suppose he had been out of Eng-
land, were he not to pronounce it so as to rhyme with
poor; and the sober English critic sees infinite advan-
tage in this pronunciation, as it prevents our mistaking
taking a tour for *taking a tower*. But, plausible as this
latter reason may be, it is far from being sufficient to
induce a philosophical grammarian to approve it. Co-
incidence in the sound of words signifying different
things, is the case in all languages; but, while these
words are differently written, their different meanings
will be sufficiently preserved without departing from
the general analogy of pronunciation.—See the word
Bowl. *W.*

TOURIST*, tûr'-îst. n. s. One who makes a tour
or ramble.

TOURN*, n. s. The sheriff's turn, or court. *Burke.*
A spinning-wheel. *Grose.*

TOURNAMENT, tûr'-nâ-mênt, or tûr'-nâ-mênt. }

TOURNEY, tûr'-nê, or tûr'-nê. }
n. s. [tournement, low Lat.] Tilt; just; military
sport; mock encounter. *Daniel.* Encounter; shock
of battle. *Milton.*

I am much mistaken if general usage does not in-
cline to the short sound of the diphthong in these words;
and that this sound ought to be indulged, is palpable to
every English ear; which finds a repugnance at giving
the French sound to any word that is not newly adopt-
ed. *Journey, nourish, courage,* and many other words
from the French, have long been anglicised: and there
is no good reason that this word should not fall into the
same class. Mr. Sheridan, Mr. Scott, Dr. Kenrick, and
Mr. Perry, give the first sound of this word, and Bu-
chanan and W. Johnston, the second. Junius and
Skinner spell the word *turnament*. *W.*

To TOURNEY, tûr'-nê, or tûr'-nê. v. n. To tilt in
the lists. *Spenser.*

TOURNQUET, tûr'-nê-kwê't. n. s. [Fr.] A ban-
dage used in amputations, straitened or relaxed by
the turn of a handle. *Sharp.*

The general pronunciation of this word ought to in-
duce us to the second pronunciation of *turnament*. *W.*

To TOUSE, tûze. 313. v. a. [probably of the same
original with *taw, tease, tose*.] To pull; to tear; to
haul; to drag: whence *touser* or *towzer*, the name of
a mastiff. *Gower.* To disorder the hair. *Sherwood.*

To TOUSE*, tûze. v. n. To tear; to rave. *Dray-*
ton.

To TOUSLE*, tû'-zl. v. a. The diminutive of
touse: a low expression.

TOW, tû. n. s. [top, Sax.] Flax or hemp beaten and
combed into a filamentous substance. *Sharp.*

To TOW, tû. v. a. [teon, teohan, Sax.; toghen,
old Dutch.] To draw by a rope, particularly through
the water. *Shakespeare.*

TO WAGE*, tû'-ldje. n. s. [tollage, Fr.] The act of
towing. *Cotgrave.* Money paid for towing. *Bailey.*

TO WLIN*, tû'-line. n. s. [coh-line, Sax.] The
rope or chain used in towing.

TOWARD, tû'-ârd. 324 } *prep.* [topard, to-
TOWARDS, tû'-ârdz. } *paperd, Sax.]* In a
direction to. *Numb* xxiv. With local tendency
to. *Milton.* Near to: as, The danger now comes

towards him. With respect to; touching; regard-
ing. *Sidney.* With ideal tendency to. *Clarendon.*
Nearly; little less than. *Swift.* This word used
sometimes to have its two syllables separated from
each other, and the noun governed put between
them; as, our condition to Godward. *Whole Duty*
of Man.

Notwithstanding our poets almost universally ac-
cent this word on the first syllable, and the poets are
pretty generally followed by good speakers, there are
some, and those not of the lowest order, who still place
the accent on the second. These should be reminded
that, as *inwards, outwards, backwards, forwards,* and
every other word of the same form, have the accent on
the first syllable, there is not the least reason for pro-
nouncing *towards* with the accent on the last. All our
orthoëpists place the accent on the first syllable of
toward when an adjective. *Towards*, being always a
preposition, has the accent on the first syllable by Mr.
Scott; but Mr. Perry, Barclay, and Fenning, place it on
the second. From the coalescence of the *o* with the *w*,
this word is pronounced generally in one syllable, though
Dr. Kenrick says otherwise; Mr. Sheridan so pronoun-
ces it; Mr. Nares and Mr. Smith rhyme it with *boards*:
Bailey accents the first syllable of *toward*, and Entick
the same syllable on the same word, and on *towards* as
a preposition. *W.*

TOWARD, tû'-ârd. } *ad.* Near; at hand; in a

TOWARDS, tû'-ârdz. } state of preparation. *Shak.*

¶ In this word we have a striking instance of the aversion of the language to what may be called a tautophony, or a successive repetition of the same sound. We find no repugnance at aspirating the *d* in *comedien*, and pronouncing it as if written *co-me-je-an*; but there is no ear that would not be hurt at pronouncing *tragedian* as if written *tra-je-je-an*. The reason is evident. The *ge* that immediately precedes being exactly the same sound as *âi* when aspirated into *je*, the ear will not suffer the repetition, and therefore dispenses with the laws of aspiration, rather than offend against those of harmony. To the same reason we must attribute giving the sound of *zh* to the double *s* in *abscission*, and to the *ti* in *transition*. The same aversion to the repetition of similar sounds makes us drop the first aspiration in *diphthong*, *triphthong*, *ophthalmy*, &c.—See **OPHTHALMICK**. *W*.

☞ I prefer the first mode of pronouncing this word to the second, though, at first sight, it appears not so regular. My reason is, the aversion our language has to a repetition of exactly similar sounds. The *s* in the prefix *trans* is always sharp and hissing, and that inclines us to vary the succeeding aspiration, by giving it the flat instead of the sharp sound. This is the best reason I can give for the very prevailing custom of pronouncing this termination in this word contrary to analogy.—When I asked Mr. Garrick to pronounce this word, he, without premeditation, gave it in the first manner; but when I desired him to repeat his pronunciation, he gave it in the second:

"As one who in his journey bates at noon,
"Though bent on speed, so here the archangel paus'd,
"Betwixt the world destroy'd and world restor'd,
"If Adam aught perhaps might interpose,
"Then with transition sweet new speech resumes."
Milton.

 § In the folio edition of Johnson, the word *traverse*, when an adverb or a preposition, is accented on the last syllable, as I have marked it; but in the quarto it is everywhere accented on the first. Mr. Sheridan accents only the preposition on the last. Dr. Ash says the verb was formerly accented on the last; and Buchanan has given it so accented: all the rest of our orthoëpists accent the word everywhere on the first; but the distinction in which I have followed Dr. Johnson's folio, I must think the most accurate.

☞ The first mode of pronouncing this word is that which is adopted by Mr. Sheridan, Dr. Kenrick, Bailey, Buchanan, and Perry; and the second, by Dr. Ash, Mr. Nares, Mr. Scott, Entick, and Fry. I do not hesitate to pronounce the former the most agreeable to English analogy; not only because the prefixes *bi* and *tri*, when no other law forbids, ought to be made as distinct as possible, but because all words of two syllables, with the accent on the first, and having one consonant between two vowels, ought, if custom does not absolutely forbid, to have the vowel in the first syllable long. This is the genuine English analogy; the mode in which we pronounce all Latin words of this form, let the quantity be what it will, 544; and the mode in which we should have pronounced all English words of this form, if an affectation of latinity had not often prevented us. For the same reason, therefore, that we pronounce *biped*, *trigon*, and *trident*, with the *i* long, we ought to adopt the first pronunciation of the word in question, and not the second.—See **DRAMA**. *W*.

TRIPOLY, tríp-pó-lé. n. s. [perhaps from the place whence it is brought.] A sharp cutting sand. *Newton*.

To **TRITUMPH**, trít-umf. v. n. [*triumpho*, Lat.; *trionpher*, Fr.] To celebrate a victory with pomp; to rejoice for victory. *Job*, xx. To obtain victory. *Knolles*. To insult upon an advantage gained. *Shakespeare*.

☞ This verb, says Mr. Nares, was, even till *Dryden's* time, pronounced with the accent either on the first or last syllable. Accenting the last was according to the general rule.—See **PRINCIPLES**, No. 503, (n.) But it is now, as Mr. Nares observes, invariably accented on the first, notwithstanding the analogy I have remarked, and the general propensity to give a dissyllable noun and verb a different accentuation. 492. *W*.

 UMPIRE, ùm'-plre. 140. *n. s.* [Lat. *impar*.] An
 arbitrator; one who, as a common friend, decides
 disputes. *Shakspeare.*
 This word, says Johnson, Minshew, with great ap-
 plause from Skinner, derives from *un pere*; in French,
 a father. But, whatever may be its derivation, one
 should think, in pronunciation, it ought to class with
 empire; and yet we find our orthoëpists considerably
 divided in the sound of the last syllable of both these
 words:
Empire. Dr. Kenrick, Mr. Scott, W. Johnston, and Mr.
 Perry, rhyme it with *fire*; but Mr. Sheridan and Bu-
 chanan with the first of *pyr-a-mid*.
Umpire. Mr. Sheridan and W. Johnston rhyme it with
fire; but Mr. Perry, Mr. Scott, and Buchanan, with
fear; and Dr. Kenrick with the first of *pyr-a-mid*.
 Amidst this variety and inconsistency, we find a prepon-
 derancy to the long sound of *i*, as in *fire*; and this, in
 my opinion, is the most eligible.
Rampire and *campyre* follow the same analogy; and
satire and *samphire* may be looked on as irregular. *W.*
 To UMPIRE*, ùm'-plre. *v. a.* To decide as an um-
 pire; to arbitrate; to settle. *Bacon.*
 UN, ùn. A Saxon privative or negative particle, an-
 swering to *in* of the Latins, and *a* of the Greeks,
on, Dutch. It is placed almost at will before ad-
 jectives and adverbs. All the instances of this kind
 of composition cannot therefore be inserted; but
 we have collected a number sufficient, perhaps
 more than sufficient, to explain it.
 Mr. Mason has very justly observed, that "one uni-
 form effect is not always created by *un* prefixed. Thus
 the word *unexpressive* (as used by both Shakspeare
 and Milton) is not barely made negative by the com-
 position, but is also changed from *active* to *passive*."
 To these observations we may add, that Shakspeare
 and Milton's use of *unexpressive* for *unexpressible* or
inexpressible, is very licentious, and ought not to be
 followed. The Latin preposition *in* and the English
un are sufficiently ambiguous without such unmean-
 ing licenses, which were introduced when the lan-
 guage was less studied, and perhaps merely to help
 out a hobbling line in poetry. The Latin preposition
in is negative in *insensible*, and, what is directly op-
 posite to it, is intensive in *inflammatory*. The English
 preposition *un* is privative in *untried*; and, if I may
 be allowed the word, *retroactive* in *undo*: a stick
 which has been bent may, when made straight, be said
 to be unbent: but if it were previously straight, we
 cannot so properly say it is *unbent*, as that it is *not*
bent. *W.*

VA'POROUS, vâ'-pûr-ûs. *a.* [*vaporeux*, Fr.] Full of vapours or exhalations; fummy. *Shak.* Windy; flatulent. *Bacon.*

VA'POROUSNESS*, vâ'-pûr-ûs-nêss. *n. s.* State or quality of being vaporous. *Hist. R. S. iii.*

VA'PORY*, vâ'-pûr-ê. *a.* Vaporous; abounding with vapours. *Thomson.* Peevish; humorsome. *Thomson.*

VA'POUR\$, vâ'-pûr. 314. *n. s.* [*vapeur*, Fr.; *vapor*, Lat.] Any thing exhalable; any thing that mingles with the air. *Chapman.* Fume; steam. *Dryden.* Wind; flatulence. *Bacon.* Mental fume; vain imagination; fancy unreal. *Hammond.* [In the plural.] Diseases caused by flatulence, or by diseased nerves; hypochondriacal maladies; melancholy; spleen. *Addison.*

To VA'POUR, vâ'-pûr. *v. n.* [*vaporo*, Lat.] To pass in a vapour or fume; to fly off in evaporations. *Donne.* To emit fumes. *Bacon.* To bully; to brag. *Hudibras.*

To VA'POUR, vâ'-pûr. *v. a.* To effuse, or scatter in fumes or vapour. *Donne.*

VA'POURED*, vâ'-pûr-â. *a.* Moist. *Sackville.* Splenetic; peevish. *Green.*

VARE*, vâre. *n. s.* [*vara*, Span.] A wand or staff of justice. *Howell.*

VA'RIABLE\$, vâ'-rê-â-bl. 405. *a.* [Fr.; *variabilis*, Lat.] Changeable; mutable; inconstant. *Shak.*

VA'RIABLENESS, vâ'-rê-â-bl-nêss. *n. s.* Changeableness; mutability. *James, i.* Levity; inconstancy. *Richardson.*

VA'RIABLY, vâ'-rê-â-blê. *ad.* Changeably; mutably; inconstantly; uncertainly.

VA'RIANCE, vâ'-rê-ânse. *n. s.* [from *vary*.] Discord; disagreement; dissension. *Matthew.*

To VA'RIATE*, vâ'-rê-âte. *v. a.* [*variatus*, Lat.] To change; to alter. *Dean King.*

VARIATION, vâ'-rê-â'-shûn. *n. s.* [*variatio*, Lat.; *variation*, Fr.] Change; mutation; difference from itself. *Hayward.* Difference; change from one to another. *Grant.* Successive change. *Shak.* [In grammar.] Change of termination of nouns. *Watts.* Change in natural phenomena. *Wotton.* Deviation. *Fell.*—*Variation of the compass.* Deviation of the magnetic needle from an exact parallel with the meridian.

[F] The *a* in the first syllable of this word, from the lengthening power of the succeeding vowels, continues long and slender, as in *various*. The same may be observed of *variegation*. Mr. Sheridan has given *a* in these two words the short sound of the Italian *a*, but

—nô, môve, nôr, nôt ;—tûbe, tûb, bôll ;—ôll ;—pôund ;—thin, THIS.

contrary to the analogy of English pronunciation.—See *Principles*, No. 534. *W.*

VARICOUS, vâ-rê-kûs. *a.* [*varicosus*, Lat.] Dis-eased with dilatation. *Sharpe.*

To VARIEGATE v, vâ-rê-ê-gâte. *v. a.* [*variegatus*, school Lat.] To diversify ; to stain with different colours. *Woodward.*

☞ All our orthoëpists are uniform in placing the accent on the first syllable of this word, and all sound the *a* as in *vary*, except Mr. Elphinston, Mr. Perry, and Buchanan, who give it the short sound, as in *carry*. That so great a master of English analogy as Mr. Elphinston should here overlook the lengthening power of the vocal assemblage is not a little surprising.—See *Principles*, No. 196. *W.*

VARIEGATION, vâ-rê-ê-gâ-shân. *n. s.* Diversity of colours. *Evelyn.*

VARIETY, vâ-rî-ê-tê. *n. s.* [*variété*, Fr.; *varietas*, Lat.] Change ; succession of one thing to another ; intermixture of one thing with another. *Milton.* One thing of many by which *variety* is made : in this sense it has a plural. *Raleigh.* Difference ; dissimilitude. *F. Atterbury.* Variation ; deviation ; change from a former state. *Hale.* Many and different kinds. *Law.*

VARIOLOUS, vâ-rî-ô-lûs. *a.* [*variola*, Lat.] Relating to the disease called the smallpox.

VARIOUS v, vâ-rê-ûs. 314. *a.* [*varius*, Lat.] Different ; several ; manifold. *Milton.* Changeable ; uncertain ; unfixed ; unlike itself. *Locke.* Unlike each other. *Milton.* Variegated ; diversified. *Milton.*

VARIOUSLY, vâ-rê-ûs-lê. *ad.* In a various manner. *Bacon.*

VARIIX, vâ-rîks. *n. s.* [Lat.; *varice*, Fr.] A dilatation of the vein. *Sharpe.*

VARLET v, vâ-r-lêt. *n. s.* [*varlet*, old Fr., now *valet*.] A page or knight's follower ; any servant or attendant. *Spenser.* A term of reproach ; a scoundrel. *Shakespeare.*

VARLETRY, vâ-r-lêt-trê. *n. s.* Rabble ; crowd ; populace. *Shakespeare.*

VARNISH v, vâ-r-nîsh. *n. s.* [*vernix*, Fr.; *vernix*, Lat.] A matter laid upon wood, metal, or other bodies, to make them shine. *Shakespeare.* Cover ; palliation.

To VARNISH, vâ-r-nîsh. *v. a.* [*vernisser*, *vernir*, Fr.] To cover with something shining. *Sidney.* To cover ; to conceal or decorate with something ornamental. *Milton.* To palliate ; to hide with colour of rhetoric. *Denham.*

VARNISHER, vâ-r-nîsh-ûr. *n. s.* One whose trade is to varnish. *Boyle.* A disguiser ; an adorning. *Pope.*

VARVELS, vâ-r-vîlz. *n. s.* [*vervelles*, Fr.] Silver rings about the leg of a hawk, on which the owner's name is engraved. See *VERVELS*.

To VARY v, vâ-rê. *v. a.* [*varior*, Lat.; *varier*, Fr.] To change ; to make unlike itself. *Milton.* To make of different kinds. *Brown.* To diversify ; to variegate. *Milton.*

To VARY, vâ-rê. *v. n.* To be changeable ; to appear in different forms. *Shak.* To be unlike each other. *Collier.* To alter ; to become unlike itself. *Bacon.* To deviate ; to depart. *Locke.* To succeed each other. *Addison.* To disagree ; to be at variance. *Davies.* To shift colours. *Pope.*

VARY, vâ-rê. *n. s.* Change ; alteration. *Shakespeare.* *Ob. J.*

VASCULAR v, vâs-kû-lâr. 88. *a.* [*vasculum*, Lat.] Consisting of vessels ; full of vessels. *Arbutnot.*

VASCULARITY, vâs-kû-lâr-ê-tê. *n. s.* State or quality of being vascular. *Outlines of Anat.*

VASCULIFEROUS, vâs-kû-lî-êr-ûs. *a.* [*vasculum* and *fero*, Lat.] Such plants as have, besides the common calyx, a peculiar vessel to contain the seed. *Quincy.*

VASE, vâze. *n. s.* [*vase*, Fr.; *vasa*, Lat.] A vessel ; generally a vessel rather for show than use. *Pope.* It is used for a solid piece of ornamental marble.

☞ Mr. Sheridan has pronounced this word *s* as to rhyme with *base*, *case*, &c. I have uniformly heard it pronounced with the *s* like *z*, and sometimes, by people

of refinement, with the *a* like *aw* ; but this, being too refined for the general ear, is now but seldom heard.

Mr. Sheridan, Mr. Scott, Dr. Kenrick, W. Johnston, Mr. Smith, Mr. Perry, and Buchanan, pronounce the *a* long and slender, as I have done, but with the *s* as in *case* ; Mr. Smith and W. Johnston give the *a* the same sound, and the *s* the sound of *z* ; and Mr. Elphinston sounds it as if written *vauz* ; but this, as Mr. Nares justly observes, is an affected pronunciation. *W.*

VASSAL v, vâs-sâl. 88. *n. s.* [*vassal*, Fr.; *vassallo* Ital.; *vassus*, low Lat.] One who holds of a superior lord. *Swift.* A subject ; a dependant.

Hooker. A servant ; one who acts by the will of another. *Shak.* A slave ; a low wretch. *Shak.*

To VASSAL, vâs-sâl. *v. a.* To subject ; to enslave ; to exercise command over. *Feltham.*

VASSALAGE, vâs-sâl-âje. 90. *n. s.* [*vasselage*, Fr.] The state of a vassal ; tenure at will ; servitude ; slavery ; dependance. *Spenser.*

VAST v, vâst. 79. *a.* [*vaste*, Fr.; *vastus*, Lat.] Large ; great. *Clarendon.* Viciously great ; enormously extensive or capacious. *B. Jonson.*

VAST, vâst. *n. s.* [*vastum*, Lat.] An empty waste. *Shakespeare.*

VASTATION, vâs-tâ-shân. *n. s.* [*vastatio*, Lat.] Waste ; depopulation. *Bp. Hall.*

VASTIDITY, vâs-tîd-ê-tê. *n. s.* [*vastitas*, Lat.] Wideness ; immensity. *Shak.* A barbarous word.

VASTLY, vâst-lê. *ad.* Greatly ; to a great degree. *Temple.*

VASTNESS, vâst-nêss. *n. s.* Immensity ; enormous greatness. *Waller.*

VASTY, vâst-ê. *a.* Large ; enormously great. *Shak.*

VAT, vât. *n. s.* [*vat*, Dutch ; *pat*, Sax.] A vessel in which liquors are kept in the immature state. *Shak.*

VATICIDE, vât-ê-side. 143. *n. s.* [*vates* and *cædo*, Lat.] A murderer of prophets. *Pope.*

VATICINAL, vâ-tîs-sê-nâl. *a.* [*vaticinans*, Lat.] Containing predictions. *Watson.*

To VATICINATE, vâ-tîs-sê-nâte. *v. n.* [*vaticinor*, Lat.] To prophesy ; to practise prediction. *Howell.*

VATICINATION, vât-ê-sê-nâ-shûn. *n. s.* [*old Fr.* ; *vaticinatio*, Lat.] Prediction ; prophecy. *Bentley.*

VAUDEVILLE, vò-dê-vîl. *n. s.* [*vaudeville*, Fr.] A song common among the vulgar, and sung about the streets. A ballad ; a trivial strain.

VAULT v, vâvlt, or vâwt. *n. s.* [*voalte*, Fr.; *volta* Ital.; *voluta*, low Lat.] A continued arch. *Burnet.* A cellar. *Shak.* A cave ; a cavern. *Sandys.* A repository for the dead. *Shakespeare.*

☞ Mr. Sheridan leaves out the *l* in this word, in the word *vault*, to leap, and all their compounds ; but my ear grossly deceives me if this *l* is ever suppressed, except in the sense of a *cellar for wine*, &c. In this *l* I am supported by all our orthoëpists from whom the sounds of the letter can be gathered ; and Mr. Scott and Mr. Perry preserve the *l* in every word of this form. This, I think, is not agreeably to general usage with respect to the exception I have given ; though I think it might be dispensed with for the sake of uniformity, especially as the old French *voulte*, the Italian *volta*, and the lower Latin *voluta*, from which the word is derived have all of them the *l* ; nor do I think the preservation of it in the word in question would incur the least imputation of pedantry. *W.*

To VAULT, vâvlt. *v. a.* [*vouter*, Fr.] To arch ; to shape to a vault. *Shak.* To cover with an arch. *Milton.*

To VAULT, vâvlt. *v. n.* [*volteggiare*, Fr.; *volteggiare* Ital.] To leap ; to jump. *Shak.* To play the tumbler, or posture-master.

VAULT, vâvlt. *n. s.* A leap ; a jump.

VAULTED, vâvlt-êd. *a.* Arched ; concave. *Pope.*

VAULTER, vâvlt-ûr. 98. *n. s.* A leaper ; a jumper ; a tumbler. *Beaumont and Fletcher.*

VAULTY, vâvlt-ê. *a.* Arched ; concave. *Shak.*

To VAUNT, vâvnt. 216. *v. a.* [*vanter*, Fr.] To boast ; to display with ostentation. *Spenser.*

☞ Mr. Nares is the only orthoëpist who gives the diphthong in this word and *vaunt* the same sound as in *vaunt* ; but a few more such respectable judges, by setting

the example, would reduce those words to their proper class; till then the whole army of lexicographers and speakers, particularly on the stage, must be submitted to. 214. *W.*

To VAUNT, vâwnt. *v. n.* To play the braggart; to talk with ostentation; to make vain show; to boast. *Shakspeare.*

VAUNT, vâwnt. *n. s.* Brag; boast; vain ostentation. *Spenser.*

VAUNT, vâwnt. 214. *n. s.* [avant, Fr.] The first part. *Shakspeare. Ob. J.*

To **VENEER**, vẻ-nẻẻr. *v. a.* [Among cabinet-makers.] To make a kind of marquetry or inlaid work, whereby several thin slices of fine woods of different sorts are fastened or glued on a ground of some common wood. *Bailey.*

☞ This word is, by cabinet-makers, pronounced *feneer*; but here, as in similar cases, the scholar will lose no credit by pronouncing the word as it is written. See *Boatswain. W.*

VENEFICE §, vẻn'ẻ-ẻf'ẻs. 142. *n. s.* [*veneficium*, Lat.] The practice of poisoning.

VENEFICIAL, vẻn'ẻ-ẻf'ẻsh'ủl. *a.* Acting by poison; bewitching. *Brown.*

VENEFICIALLY, vẻn'ẻ-ẻf'ẻsh'ủs-lẻ. *ad.* By poison or witchcraft. *Brown.*

VENEMOUS, vẻn'ẻ-mủs. *a.* [*venin*, Fr.] Poisonous. Commonly, though not better, *venomous*. *Acts. xxviii.*

To **VENENATE** §, vẻn'ẻ-nẻtẻ. *v. a.* [*veneno*, Lat.] To poison; to infect with poison. *Harvey.*

☞ In the first edition of this [Walker's] dictionary I accented this word on the first syllable, contrary to the example of Dr. Johnson, Dr. Ash, and Mr. Sheridan; but, upon a revival of the various analogies of accentuation, was inclined to think this accentuation somewhat doubtful. The word *veneno*, from which this is formed, has the penultimate long; and in verbs of this termination, derived from the Latin, and preserving the same number of syllables, we often preserve the same accent, as in *arietate*, *coarctate*, *denigrate*, &c.; but this is so often neglected in favour of the antepenultimate accent, as in *decarate*, *defatigate*, *delegare*, *desolate*, &c., that general usage seems evidently leaning to this side; and as in *perpetrate* and *emigrate*, from *perpetro* and *emigro*, where the penultimate vowel is doubtful, we always place the accent on the antepenultimate; so, in this and similar words, where custom does not decide, I would always recommend a similar accentuation. See *Principles*, No. 503. (*n.*) *W.*

VENENATE*, vẻn'ẻ-nẻtẻ, or vẻ-nẻ'ẻ-nẻtẻ. *part. a.* Infected with poison. *Woodward.*

VENISON, vẻn'ẻ-zn, or vẻn'ẻ'ẻ-zn. *n. s.* [*renaison* Fr.] Game; beast of chase; the flesh of deer. *Shak.*

☞ A shameful corruption of this word, by entirely sinking the *i*, has reduced it to two syllables. Mr. Sheridan pronounces it in three; Dr. Kenrick gives it in three, but tells us it is usually heard in two. Mr. Scott gives it both ways; Mr. Perry only as it is contracted; and Mr. Elphinstone supposes the *i* in this word as much lost as in *business*.

It is highly probable this corruption is of long standing; for, though Shakespeare, in *As You Like It*, says,

"Come, shall we go and kill us *venison*?"

Yet Chapman pronounces this word in two syllables,

"To our *ven'son's* store

"We added wine till we could wish no more."

And Dryden after him,

"He for the feast prepar'd,

"In equal portions with the *ven'son* shar'd."

To these instances we may add an excellent poet of our own time:

"Gorgonius sits abdominous and wan,

"Like a fat squab upon a Chinese fan:

"He snuffs far off th' anticipated joy;

"Turtle and *ven'son* all his thoughts employ."

Poetry will ever consider this word, like many others, either as of two or three syllables; but so solemn prose, such as the language of Scripture, will always give the word its due length. For, however we may be accustomed to hear *ven'son* in common conversation, what disgust would it not give us to hear this word in the pulpit, when Isaac says to his son,

"Now therefore take, I pray thee, thy weapons, thy quiver, and thy bow, and go out to the field, and take me some *ven'son*!"

In short, my opinion is, that this word, in spite of the general corruption, ought always to be pronounced in three syllables by correct speakers, and that the contraction should be left to the poets. *W.*

VERTEBRAL, vêr'-tê-brâl. 88. *a.* [*vertebræ*, Lat.] Relating to the joints of the spine. *Ray*.

VERTEBRE, vêr'-tê-brû. *n. s.* [Fr.; *vertebra*, Lat.] A joint of the back. *Ray*.

✠ This word is perfectly anglicised, and therefore ought to have its last syllable pronounced according to English analogy, like *centre*, *sceptre*, *mitre*, &c.—See *Principles*, No. 416. There is a common mistake in the use of the Latin word from which this is derived, which it may not be improper to rectify. *Vertebra* is not unfrequently used to signify the whole collection of joints which form the back bone, while in reality it means only one of those joints: the plural is *vertebræ*, and this ought to be used for the whole spine, if we do not dominate it by a Latin word; but if we speak English, it ought to be *vertebres*, and pronounced as if written *verteburs*. *W*.

VERTEX, vêr'-têks. *n. s.* [Lat.] Zenith; the point over head. *Crech*. The top of a hill; the top of any thing. *Derham*.

VERTICAL §, vêr'-tê-kâl. 83. *a.* [Fr.] Placed in the zenith. *Thomson*. Placed in a direction perpendicular to the horizon. *Cheyne*.

VERTIGO, vêr'-tî'-gò, vêr'-tê'-gò, or vêr'-tê'-gò. 112. *n. s.* [Lat.] A giddiness; a sense of turning in the head. *Quincy*.

✠ This word is exactly under the same predicament as *serpigo* and *lentigo*. If we pronounce it learnedly, we must place the accent in the first manner, 593; if we pronounce it modishly, and wish to smack of the French or Italian, we must adopt the second; but if we follow the genuine English analogy, we must pronounce it in the last manner.—See *Principles*, No. 112.

The authorities for the first pronunciation are, Mr. Elphinstone, Mr. Sheridan, Bailey, and Entick; for the second, Dr. Kenrick, Mr. Nares, Mr. Scott, and W. Johnston; and for the third, Dr. Johnson, Dr. Ash, Mr. Perry, Buchanan, Barclay, [Jones] and Penning. This, too, was Swift's pronunciation, as we see by Dr. Johnson's quotation:

“And that old *vertigo* in's head
“Will never leave him till he's dead.”

In this word we see the tendency of the accent to its true centre in its own language. *Vertigo*, with the accent on the *i*, and that pronounced long as in *title*, has so Latin a sound, that we scarcely think we are speaking English: this makes us the more readily give into the foreign sound of *i*, as in *fatigue*. This sound a correct English ear is soon weary of, and settles at last with the accent on the first syllable, with the *i* sounded as in *indigo*, *portico*, &c. *W*.

VERVAIN, 208. } vêr'-vîn. { *n. s.* [*verveine*, Fr.; *vervine*, 140. } *vervena*, Lat.] A plant. *Drayton*.

VICTUALS \S , vîl'-tlz. } *viticaglia*, Ital.] Provision
of food; stores for the support of life; meat;
sustenance. *Shakespeare*.

✚ This corruption, like most others, has terminated in
the generation of a new word; for no solemnity will
allow of pronouncing this word as it is written. *Victu-*
als appeared to Swift so contrary to the real sound,
that, in some of his manuscript remarks which I have
seen, he spells the word *vittles*. This compliance with
sound, however, is full of mischief to language, and
ought not to be indulged.—See *Sæterick*, and *Princi-*
ples, No. 350. *W.*

VIDELICET, vè-dêl'-è-sêt. *ad.* [Lat.] To wit;
that is. This word is generally written *viz.*

✚ This is a long-winded word for a short explanation,
and its contraction, *viz.*, a frightful anomaly, which
ought never to be pronounced as it is written:
the adverb *namely* ought to be used instead of both;
and, where it is not, ought, in reading, always to be sub-
stituted for them. *W.*

VIDUAL \S *, vîd'-h-âl. *a.* [*viduus*, Lat.] Belonging

☞ Dr. Hill published in a pamphlet a petition from the letters *I* and *U* to David Garrick, Esq., both complaining of terrible grievances imposed upon them by that great actor, who frequently banished them from their proper stations; as in the word *virtue*, which they said he converted into *virtue*; and in the word *ungrateful* he displaced the *u*, and made it *ingrateful*, to the great prejudice of the said letters. To this complaint Garrick replied in the following epigram:

"If it is, as you say, that I've injur'd a letter,
"I'll change my note soon, and I hope for the better.
"May the right use of letters, as well as of men,
"Hereafter be fix'd by the tongue and the pen.
"Most devoutly I wish they may both have their due,
"And that I may be never mistaken for *U*."

VUL/NERATION*, vúl'-núr-à'-shùn. *n. s.* Act of wounding; infliction of wounds. *Pearson.*

VUL/PINE, vúl'-pín, or vúl'-pine. *a.* [vulpinus, Lat.; vulpine, old Fr.] Belonging to a fox; like a fox. *Feltham.*

Mr. Sheridan and Mr. Scott mark the *i* in the last syllable long, as in *pine*. I am inclined to shorten it with Mr. Perry, like *pin*; and my reason is, that the accent immediately precedes it.—See *Principles*, No 140. *W.*

VUL/TURE §, vúl'-tshùre. *n. s.* [vultur, Lat.] A large bird of prey, remarkable for voracity. *Spenser.*

VUL/TURINE, vúl'-tshù-rine. 149. *a.* [vulturinus, Lat.] Belonging to a vulture.

Mr. Sheridan, Mr. Scott, Mr. Buchanan, and Mr. Nares, make the *i* in the last syllable of this word long as in *fine*. I join them in this pronunciation, because the accent is two syllables higher. *W.*

VUL/TUROUS*, vúl'-tshùr-ús. *a.* Like a vulture voracious. *Hammond.*

W Is a letter of which the form is not to be found in the alphabets of the learned languages; though it is not improbable that by our *w* is expressed the sound of the Roman *v*, and the Eolick *f*. Both the form and sound are excluded from the languages derived from the Latin.

W is sometimes improperly used in diphthongs as a vowel, for *u*, *view*; *strew*: the sound of *v* consonant, if it be a consonant, is uniform. 474.

To WA/BBLE, wôb'-bl. 405. *v.n.* [A low, barbarous word.] To move from side to side; to change direction. *Maxon*.

WAD, wôd. *n.s.* [peob, Sax.] A bundle of straw or other loose matter thrust close together. *Wadd*, or black lead, is a mineral of great use and value. [pab, Sax.] Any thing crammed or stuffed in; as tow into a gun or cannon. [wad, wôd, Icel.] *Maydman*. Old English for *woad*: which see.

WA/DDING, wôd'-ding. *n.s.* [wad, Icel.] A kind of soft stuff loosely woven, with which the skirts of coats are stuffed out.

To WA/DDLE, wôd'-dl. 405. *v.n.* [weddln, Germ.] To shake in walking from side to side; to deviate in motion from a right line. *Shakspeare*.

To WADE, wâde. *v.n.* [wadum, Lat.] To walk through the waters; to pass water without swimming. *Shak*. To pass difficultly and laboriously. *Hooker*.

WA/ER, wâ'-fâr. 98. *n.s.* [wafel, Dutch.] A thin cake. *Tusser*. The bread given in the eucharist by the Romanists. *Bp. Hall*. Paste made to close letters.

To WAFT §, wâft. *v.a.* preter. *wafed*, or perhaps *waft*; part. pass. *wafed*, or *waft*. [probably from *wave*; *veifa*, Icel.; *westa*, Suet.] To carry through the air, or on the water. *Shak*. To buoy; to make float; to hinder from sinking. *Brown*. To beckon; to inform by a sign of any thing moving. *Shakspeare*. To turn. *Shakspeare*.

§ Mr. Sheridan, Dr. Kenrick, and Mr. Scott, pronounce the *a* in this word, as I have marked it: Mr. Perry adopts the *a* in *father*; and, though Mr. Smith thinks this the true sound, he confesses the short *a* is daily gaining ground; but W. Johnston, for want of attending to the rule laid down in *Principles*, No. 85, makes *waft* rhyme with *soft*: Mr. Nares has not got the word; but, by omitting it in classes where the *a* is pronounced as in *father* and *water*, shows he is of opinion it ought to have the sound I have given it. *W*.

To WAFT, wâft. *v.n.* To float. *Bp. Hall*.

WAFT, wâft. *n.s.* A floating body. *Thomson*. Motion of a steamer: used as a token or mean of information at sea.

To WAG §, wâg. 85. *v.a.* [paŋtan, Sax.; *waggen*, Dutch.] To move lightly; to shake slightly. *Lam. ii.*

To WAG, wâg. *v.n.* To be in quick or ludicrous motion. *Shak*. To go; to pack off. *Shak*. To be moved. *Dryden*.

WAG, wâg. *n.s.* [pœŋtan, Sax.] Any one ludicrously mischievous; a merry droll. *Sidney*.

WAGE §, wâdje. *n.s.* The plural *wages* is now only used. [wægen, or wagen, Germ.] Pay given for service. *Shakspeare*. *Gage*; pledge. *Spenser*.

To WAGE, wâdje. *v.a.* [the origination is not easily discovered.] To attempt; to venture. *Shak*. To make; to carry on: applied to war. *Shak*. [from *wage*, *wages*.] To set to hire. *Spenser*. To take to hire; to hire for pay; to hold in pay; to employ for wages. *Shak*. [In law.] When an action of debt is brought against one, as for money or chattels, the defendant may *wage* his law: that is, swear, and certain persons with him, that he owes nothing to the plaintiff in manner as he hath declared. The offer to make the oath is called *wager* of law. *Bount*.—This word is now only used in the phrase *to wage war*.

WA/GER §, wâ'-jûr. 98. *n.s.* [from *wage*, to venture.] A bet; any thing pledged upon a chance or performance. *Sidney*. Subject on which bets are laid *Sidney*. [In law.] An offer to make oath. This legal sense is not confined to making oath, but extends to offering justification or proof in any way *Blackstone*.

To WA/GER, wâ'-jûr. *v.a.* To lay; to pledge as a bet; to pledge upon some casualty or performance *Beaumont and Fletcher*.

To WA/GER*, wâ'-jûr. *v.n.* To offer a wager *Shakspeare*.

WA/GERER*, wâ'-jûr'-âr. *n.s.* One who bets; one who wagers. *Swift*.

WA/GES, wâ'-jiz. 99. *n.s.* See *WAGE*.

WA/GGERY, wâg'-gûr-ê. 555. *n.s.* [from *wag*.] Mischievous merriment; roguish trick; sarcastical gayety. *Locke*.

WA/GGISHLY, wâg'-ish-lê. *ad.* In a waggish manner. *B. Jonson*.

WA/GGISHNESS, wâg'-ish-nêss. *n.s.* Merry mischief. *Bacon*.

To WA/GGLE, wâg'-gl. 405. *v.n.* [wagghelen, Dutch.] To waddle; to move from side to side. *Sidney*.

WA/GON §, wâg'-ân. 166. } *n.s.* [pæŋtan, Sax.; *waeghens*, Dutch; *wagn*, Icel.] [Wagon is strictly conformable to the etymology; but *waggon* is the prevailing form *Todd*.] A heavy carriage for burthens. *Knolles*

A chariot. *Spenser*. **WA/GONAGE**, wâg'-ân-idge. *n.s.* Money paid for carriage in a wagon.

WA/GONER, wâg'-ân-âr. 98. *n.s.* One who drives a wagon. *Spenser*.

WA/GTAIL, wâg'-tâle. *n.s.* A bird. *Shakspeare*.

WAID, wâde. 202. *a.* [probably for *weighed*.] Crushed. *Shakspeare*.

WAIF, wâlê. } *n.s.* [waivium, *waivium*, law Lat.; *WAIFT**, wâft. } [from *wave*.] Goods found, but claimed by nobody; that of which every one waves the claim. *Spenser*.

To WAIL §, wâlê. *v.a.* [wæla, Icel.; *wail*, Goth.] To moan; to lament; to bewail. *Shakspeare*.

To WAIL, wâlê. 202. *v.n.* To grieve audibly; to express sorrow. *Mic. i.*

WAIL, wâlê. *n.s.* Audible sorrow; lamentation. *Brown*.

WA/ILFUL, wâlê'-fûl. *a.* Sorrowful; mournful. *Shakspeare*.

WA/ILING, wâ'-ling. 410. *n.s.* Lamentation; moan; audible sorrow. *Spenser*.

WAIN, wâne. *n.s.* [contracted from *wagon*.] A carriage. *Spenser*.

WA/INAGE, wâ'-nidge. *n.s.* A finding of carriages. *Ainsworth*.

WA/INROPE, wâne'-rôpe. *n.s.* [wain and rope.] A large cord, with which the load is tied on the wagon; cartrope. *Shakspeare*.

WA/INSCOT, wên'-skût. *n.s.* [wagenschot, Dutch.] The inner wooden covering of a wall. *Bacon*.

§ I have given the common sound of this word, and as it is marked by Mr. Sheridan, Dr. Kenrick, Mr. Scott, and adopted in Steele's Grammar. Mr. Perry pronounces the first syllable so as to rhyme with *man*; but W. Johnston, who pronounces both this word and *waistcoat* regularly, is, in my opinion, the most correct. *W*.

To WA/INSCOT, wên'-skût. *v.a.* [wagenschotten, Dutch.] To line walls with boards. *Bacon*. To line buildings with different materials. *Grev*.

WAIR, wâre. *n.s.* [In carpentry.] A piece of timber two yards long, and a foot broad. *Bailey*.

WAIST §, wâste. *n.s.* [gwaste, Welsh; *waistrus*, M. Goth.] The smallest part of the body; the part below the ribs. *Milton*. The middle deck or floor of a ship. *Dryden*.

WA/ISTBAND*, wâst'-bând. *n.s.* That part of the breeches which encircles the waist. *Taller*.

—nò, mòve, nòr, nòt; —tùbe, túb, búll; —ðill; —pòund; —thin, THIN.

WAISTCOAT, wê's-kòt. *n. s.* An inner coat; a coat close to the body. *Richardson.*

☞ This word has fallen into the general contraction observable in similar compounds, but, in my opinion, not so irrecoverably as some others have done. It would scarcely sound pedantic if both parts of the word were pronounced with equal distinctness; though Mr. Sheridan and Mr. Scott pronounce the diphthong as I have marked it. *W.*

To WAIT §, wáte. *v. a.* [*wachten*, Dutch.] To expect; to stay for. *Shak.* To attend; to accompany with submission or respect. *Dryden.* To attend as a consequence of something. *Phillips.* To watch as an enemy. *Job*, xv.

To WAIVE †, wáve. *v. a.* To put off; to quit; to relinquish. See **To WAVE** and **To WEIVE**.

☞ I have inserted this word on the authority of Blackstone, quoted by Mr. Mason, as may be seen under the word **WAIF**, and I remember to have seen it spelled in this manner, though I cannot recollect by whom. Its etymology is uncertain; but distinguishing it from the word *wave*, from which it can scarcely be derived, is of real utility to the language, which, as much as possible, ought to adopt a different orthography to express a different sense or a different pronunciation.—See **Bo W L**. *W.*

To WAKE §, wáke. *v. n.* [*wakan*, Goth.; *pacian*, Sax.; *waeken*, Dutch.] To watch; not to sleep. *Spenser.* To be roused from sleep. *Milton.* To cease to sleep. *Sidney.* To be quick; to be alive. *Dryden.* To be put in action; to be excited. *Milton.*

☞ Mr. Sheridan has given the *a*, in this word and its compounds, the same sound as in *man*. Mr. Scott and Dr. Kenrick have given both the sound I have given and Mr. Sheridan's, but seem to prefer the former by placing it first. I have always heard it pronounced like the first syllable of *wan-ton*; and find Mr. Nares, W. Johnston, and Mr. Perry, have so marked it. I have, indeed, heard *wan*, the old pretérito of the verb, to *win*, pronounced so as to rhyme with *ran*: but as this form of the verb is obsolete, the pronunciation is so too.—See *Wassr. W.*

WAN, for *won*; the old pret. of *win*. *Spenser.*

WHIRL, hwērl. 108. n. s. Gyration; quick rotation; circular motion; rapid circumvolution. *Beaumont and Fletcher*. Any thing moved with rapid rotation. *Addison*.

There appears to me to be a delicate difference, by far too nice for foreigners to perceive, between the sound of *i* in this word and the short sound of *u*, as if it were written *whurl*, which is the pronunciation Dr. Kenrick, Mr. Scott, and W. Johnston, have adopted. I have rather adhered, with Mr. Sheridan, to the genuine sound of *i* in *virgin*, *virtue*, &c., though I would recommend the other sound to foreigners and provincials as the more easily conceived, and sufficiently near the truth. *W.*

WHIRLBAT, hwēr-lāt. n. s. [whirl and bat.] Any thing moved rapidly round to give a blow. *Creech*.

WHIRLBONE, hwēr-lāt-bōne. n. s. The patella; the cap of the knee. *Ainsworth*.

WHORE, hòór, or hòre. *n. s.* [hupe, Sax.; hoere, Dutch.] A prostitute; a woman who receives men for money. *Dryden.* A woman who converses unlawfully with men; a fornicatress; an adulteress; a strumpet. *B. Jonson.*

If there can be a polite pronunciation of this vulgar word, it is the first of these, rhyming with *poor*. The stage has followed this pronunciation; Mr. Sheridan has adopted it; but Dr. Kenrick and Mr. Scott give the preference to the last; and W. Johnston, Mr. Elphinston, Mr. Perry, and Barclay, adopt only the last, rhyming with *more*. This, it must be confessed, is the most analogous; but, as it is used by the vulgar, the polite world think they depart a little from the vulgarity of the word by departing from its genuine pronunciation. *W.*

To WHORE, hòór. *v. a.* To corrupt with regard to chastity. *Beaumont and Fletcher.*

WIN, whether initial or final in the names of men, may either denote a masculine temper, from wîn, which signifies, in Saxon, war, strength, &c. or else the general love and esteem he hath among the people, from the Saxon wîne, i. e. dear, beloved. In the names of places, it implies a battle fought there. *Gibson.*

WINCPIPE, wing'-kô-pipe. *n. s.* A small red flower. *Bacon.*

WIND δ , wind, or whnd. [See GOLD.] *n. s.* [pind, Sax.; *wind*, Dutch.] *Wind* is when any tract of air moves from the place it is in to any other, with an impetus that is sensible to us; wherefore it was not ill called by the ancients, a swifter course of air; a flowing wave of air; a flux, effusion, or stream of air. *Muschenbroek.* Direction of the blast from a particular point: as, eastward, westward. *Shak.* Breath; power or act of respiration. *Shak.* Air caused by any action. *Milton.* Breath modulated by an instrument. *Bacon.* Air impregnated with scent. *Swift.* Flatulence; windiness. *Milton.* Any thing insignificant or light as wind. *Milton.*—*Down the wind.* To decay. *L'Estrange.* To take or have the wind. To gain or have the upper hand. *Bacon.*

These two modes of pronunciation have been long contending for superiority, till at last the former seems to have gained a complete victory, except in the territories of rhyme. Here the poets claim a privilege, and readers seem willing to grant it them, by pronouncing this word, when it ends a verse, so as to rhyme with the word it is coupled with:

"For as in bodies, thus in souls we find,
"What wants in blood and spirits, fill'd with wind."

But in prose this regular and analogical pronunciation borders on the antiquated and pedantic.

What could have been the cause of this deviation from the general rule in this word and *gold* it is not easy to guess; they were both bound to their true sound in the fetters of rhyme; but these fetters, which are supposed to alter the pronunciation of some words by linking dissimilar sounds, have not been strong enough to restrain these from a capricious irregularity. It is not improbable, that the first deviation began in the compounds, such as *goldsmith*, *goldfinch*, *windmill*, *windward*, &c., (as it is a prevailing idiom of pronunciation to shorten simples in their compounds; see *Principles*, No. 515, and the word *KNOWLEDGE*;) and these at last corrupted the simples. But, whatever may have been the cause, the effect is now become so general, that reducing them to their true sound seems almost impracticable. Mr. Sheridan tells us, that Swift used to jeer those who pronounced *wind* with the *i* short, by saying, "I have a great *mînd* to *fînd* why you pronounce it *wînd*." A very illiberal criticism retorted this upon Mr. Sheridan by saying, "If I may be so *boold*, I should be glad to be *toold* why you pronounce it *goold*." The truth is, every child knows how these words ought to be pronounced according to analogy; but it requires some judgement, and an extensive acquaintance with polite and literary circles, to know which is the most current pronunciation. Where analogy is not so evident, and yet as real as in these words, it is some credit to a speaker to depart a little from custom in favour of analogy; but where every one knows as well as ourselves what ought to be the pronunciation, and yet where every one pronounces in opposition to it, we shall get nothing but contempt by departing from the general voice. With respect to the words in question, my observation falls me if *wind*, as a single word, is not more fixed in the sound of short *i* than *gold* in the sound of *oo*: the true sound of this last word seems not quite irrecoverable, except in the compound *goldsmith*; but the compounds of *wind*, such as *windy*, *windmill*, *windward*, &c., must, in my opinion, be given up: nor, till some superior spirit, uniting the politeness of a Chesterfield with the genius of a Swift, descends to vindicate the rights of an injured word, do I think that *wînd* will, in prose and familiar language, ever be a fashionable pronunciation. The language of Scripture seems to have native dignity and solemnity sufficient to authorize the long sound, but no other. Mr. Sheridan and Mr. Scott give the same preference to the first sound of this word that I

have done. Dr. Kenrick and Mr. Barclay give only the short sound. Mr. Perry joins them in this sound, but says in dramatic scenes it has the long one. Mr. Nares says it has certainly the short sound in common usage, but that all our best poets rhyme it with *mînd*, *kînd*, &c.; and Mr. Smith observes, that it is now the polite pronunciation, though against analogy. *W.*

WORSER, wår'-sår. *a.* A barbarous word, formed by corrupting *worse* with the usual comparative termination. *Shakespeare*.

WORSHIP §, wår'-ship. *n. s.* [peopðrýpe, Sax.] Dignity; eminence; excellence. *Spenser*. A character of honour. *Shak.* A title of honour. *Shak.* A term of ironical respect. *Pope*. Adoration; religious act of reverence. *Pearson*. Honour; respect; civil deference. *St. Luke*, xiv. Idolatry of lovers; submissive respect. *Shakespeare*.

To WORSHIP, wår'-ship. *v. a.* To adore; to honour or venerate with religious rites. *Exod.* xxxiv. To respect; to honour; to treat with civil reverence. *Shak.* To honour with amorous respect. *Carew*.

To WORSHIP, wår'-ship. *v. n.* To perform acts of adoration. 1 *Kings*, xii.

WORSHIPFUL, wår'-ship-fål. *a.* Claiming respect by any character or dignity. *South*. A term of ironical respect. *Shakespeare*.

WORSHIPFULLY, wår'-ship-fål-è. *ad.* Respectfully. *Shakespeare*.

WORSHIPPER, wår'-ship-pår. *n. s.* Adorer; one that worships. *South*.

WORST, wårst. 165. *c.* [the superlative of *bad*, formed from *worse*: *bad, worse, worst.*] Most bad; most ill. *Locke*.

WORST, wårst. *n. s.* The most calamitous or wicked state; the utmost height or degree of any thing ill. *Digby*.

To WORST, wårst. *v. a.* To defeat; to overthrow. *Suckling*.

WORSTED, wårst'-td. 99, 169. *n. s.* [from *Worsted*, a town in Norfolk, famous for the woollen manufacture.] Woollen yarn; wool spun. *Pope*.

WORT, wårt. 165. *n. s.* [pýpt, peopt, Sax.; *worte*, Dut.] Originally a general name for an herb; whence it still continues in many, as *liverwort*, *spleenwort*. A plant of the cabbage kind. *Beaumont and Fletcher*. [pýpt, Sax.] New beer, either unfermented, or in the act of fermentation. *Bacon*.

To WORTH, or **WURTH**, wårth. *v. a.* To betide; to happen to. This word was formerly common in conjunction with *wo*; as, *wo worth thee*, i. e. *wo be to thee*. *Spenser*.

WORTH, in the termination of the names of places, comes from popð, a court or farm, or popðtɔ, a street or road. *Gibson*.

WORTH §, wårth. 165, 467. *n. s.* [peopð, Sax.] Price; value. *Hooker*. Excellence; virtue. *Sidney*. Importance; valuable quality. *Hooker*.

WORTH, wårth. *a.* Equal in price to; equal in value to. *Shak.* Deserving of, either in a good or bad sense. Equal in possessions to. *Shakespeare*.

WORTHILY, wår'-thè-è. *ad.* Suitably; not below the rate of. *Ray*. Deservedly; according to merit. *Milton*. Justly; not without cause. *Hooker*.

WORTHINESS, wår'-thè-nès. *n. s.* Desert; merit. *Hooker*. Excellence; dignity; virtue. *Sidney*. State of being worthy; quality of deserving. *Sidney*.

WORTHLESS, wårth'-lès. *a.* Having no virtues, dignity, or excellence. *Shak.* Having no value. *Prim*.

WORTHLESSNESS, wårth'-lès-nès. *n. s.* Want of excellence; want of dignity; want of value. *More*.

WORTHY, wår'-thè. *a.* Deserving; such as merits. *Sidney*. Valuable; noble; illustrious; having excellence or dignity. *Hooker*. Having worth; having virtue. *Shak.* Not good: a term of ironical commendation. *Dryden*. Suitable for any quality, good or bad; equal in value; equal in dignity. *Milton*. Suitable to any thing bad. *Shakespeare*. Deserving of ill. *Deut.* xxv.

WORTHY, wår'-thè. *n. s.* A man laudable for any eminent quality, particularly for valour. *Brown*.

To WORTHY, wår'-thè. *v. a.* To render worthy; to aggrandize; to exalt. *Shakespeare*. *Ob. J.*
To WOT, wót. } *v. n.* [pat, from ptcen, Sax.,
To WOTE*, wòte. } whence *weet*, of which the pret
erit was *wot*.] To know; to be aware. *Spenser*
Ob. J.

Mr. Elphinstone is singular in pronouncing this word [wot] so as to rhyme it with *hut*; Mr. Sheridan, Mr. Scott, W. Johnston, Mr. Perry, and Mr. Smith, rhyme it with *not*. *W.*

WOULD, wóld. 320. The preterit of *will*. It is generally used as an auxiliary verb with an infinitive, to which it gives the force of the subjunctive mood. *Ray*. Was or am resolved; I wish or wished to I am or was willing. *Sidney*. It is a familiar term for *wish to do*, or *to have*. *Shak.* Should wish *Waller*. It is used in old authors for *should*. *Bacon*. It has the signification of I wish, or I pray. *Shak.*

WOULDING, wóld'-ing. *n. s.* Motion of desire; disposition to any thing; propensity; inclination; incipient purpose. *Hammond*.

WOUND §, wóund, or wóund. 315. [wóund, or wóund, Jones; wóund, *Fulton and Knight*, *n. s.* [pund, Sax. *wonde*, Dutch; *wunda*, M. Goth.] A hurt given by violence. *Shakespeare*.

The first pronunciation of this word, though generally received among the polite world, is certainly a capricious novelty: a novelty either generated by false criticism, to distinguish it from the preterit of the verb to *wind*, of which there was not the least danger of interference, (see **BOWL**;) or more probably from an affectation of the French sound of this diphthong, which, as in *pour*, and some other words, we find of late to have prevailed. The stage is in possession of this sound, and what Swift observes of newspapers, with respect to the introduction of new and fantastical words, may be applied to the stage, with respect to new and fantastical modes of pronunciation. (See **SIGH**.) That the other pronunciation was the established sound of this word, appears from the poets, who rhyme it with *bound*, *found*, *ground*, and *around*; and it is still so among the great bulk of speakers, who learn this sound at school, and are obliged to unlearn it again when they come into the conversation of the polite world. Mr. Sheridan, Mr. Scott, and Mr. Elphinstone, adopt the first sound of this word; but Dr. Kenrick and W. Johnston the second. Mr. Perry gives both, but prefers the first; and though Mr. Smith, in his vocabulary, has classed it with *sound* and *found*, he says *second* is the common pronunciation. I am, however, of Mr. Nares' opinion, who says this pronunciation ought to be entirely banished. But where is the man bold enough to risk the imputation of vulgarity by such an expulsion? *W.*

To WOUND, wóund, or wóund. *v. a.* To hurt by violence. *Deut.* xxxii.

WOUND, wóund. The preterit and part. pass. of *wind*. *Chapman*.

WOUNDER, wóund'-år, or wóund'-år. *n. s.* One that wounds.

WOUNDLESS, wóund'-lès. *a.* Exempt from wounds. *Spenser*.

WOUNDWORT, wóund'-wårt. *n. s.* A plant. *Miller*.

WOUNDY. *a.* Excessive: a low, bad word. *L'Estrange*.

WOVE, wóve. The preterit and part. pass. of *weave*. *Milton*.

WOVEN, wó'-vn. 103. The part. pass. of *weave*. *Shakespeare*.

WOX, wóks. } The preterit of *wax*. Became
WOXE, wóks. } *Spenser*. *Ob. J.*

WOXEN, wók'-sn. The participle of *To wax*. *Spenser*. *Ob. J.*

WRACK §, rák. *n. s.* [*wrack*, Dutch; *pñæce*, Sax. See **WRECK**.] Destruction of a ship by winds or rocks. *Dryden*. Ruin; destruction. *Sidney*.

To WRACK, rák. 474. *v. a.* To destroy in the water; to wreck. It seems in Milton to mean *to rock*, to shake. *Milton*. To torture; to torment: common ly written *rack*. *Cowley*.

WRACKFUL*, rák'-fål. *a.* Ruinous; destructive. *Drayton*.

WRAITH*, ráth. *n. s.* [perhaps a corruption of *swarth* or *swairth*.] The apparition of a person.

about to die, as pretended in parts of the north. *Grose.*

To WRA'NGLE §, râng'-gl. 405. *v. n.* [*wrang*, *wrangen*, Teut.] To dispute peevishly; to quarrel perversely; to altercate; to squabble. *Shakspeare.*

WRA'NGLE, râng'-gl. *n. s.* A quarrel; a perverse dispute. *Swift.*

WRA'NGLER, râng'-gl.-ûr. *n. s.* A perverse, peevish, disputative man. *Shakspeare.*

To WRAP, râp. 474. *v. a.* pret. and part. pass. *wrapped* or *wrapt*. [*uraffia*, Dan.] To roll together; to complicate. *St. John*, xx. To involve; to cover with something rolled or thrown round. *Dryden.* To comprise; to contain. *Addison*.—*To wrap up.* To involve totally. *Shak.* [often corruptly written for *rap* or *rape*, from *rapio*, Lat.] To snatch up miraculously. *Locke.* To transport; to put in ecstasy: for *rapt*. *Cowley.*

§ This word is often pronounced *rap*, rhyming with *top*, even by speakers much above the vulgar. They have a confused idea, that a preceding *w* makes the *a* broad, and do not attend to the intervening *r*, which bears the power of the *w*, and necessarily preserves the *a* in its short Italian sound. Mr. Sheridan, Mr. Scott, W. Johnston, Dr. Kenrick, Mr. Perry, and Mr. Smith, pronounce it as I have done. *W.*

WRA'PPER, râp'-pûr. 98. *n. s.* One that wraps. That in which any thing is wrapped. *Addison.*

WRA'PPING*, râp'-pîng. *n. s.* That in which any thing is wrapped. *Bp. Rainbow.*

WRATH §, rôth, or râth. 474. [râth, *Jones*, *Fulton* and *Knight*.] *n. s.* [ppað, Sax.] Anger; fury; rage. 2 *Cor.* xii.

§ The first pronunciation of this word is by far the more usual, but the *a* is more analogical. The *w* has no power over the *a*, for the same reason as in the preceding word. A want of attending to this, and, perhaps, confounding this word with the obsolete adjective *wroth*, are the reasons of the present currency of this erroneous pronunciation. Mr. Sheridan, Mr. Scott, W. Johnston, Dr. Kenrick, Mr. Nares, and Mr. Smith, adopt the first sound; and Mr. Perry alone the last; but, in a case where analogy is so clear, his authority ought, in my opinion, to outweigh them all. *W.*

WRA'THFUL, rôth'-fûl, or râth'-fûl. *a.* Angry; furious; raging. *Spenser.*

WRA'THFULLY, rôth'-fûl-lê, or râth'-fûl-lê. *ad.* Furiously; passionately. *Shakspeare.*

WRA'THLESS, rôth'-lê, or râth'-lê. *a.* Free from anger. *Waller.*

To WRAW*, râwl. *v. n.* To cry as a cat. *Spenser.*
To WREAK §, rêke. *v. a.* old preterit and part. pass. *wroke* and *wroken*; now *wreaked*. [ppæcan, Sax.; *wrecken*, Dutch; *recken*, Germ.] To revenge. *Spenser.* To execute any violent design. *Milton.* It is corruptly written for *reck*, to heed; to care. *Shakspeare.*

§ The diphthong in this word has the sound I have given it, in Sheridan, Scott, W. Johnston, Dr. Kenrick, Perry, Smith, and Barclay. *W.*

WREAK, rêke. 474. *n. s.* Revenge; vengeance. *Spenser.* Passion; furious fit. *Titus Andronicus.* *Ob. J.*

WRE'AKFUL, rêke'-fûl. *a.* Revengeful; angry: not in use. *Shakspeare.*

WREATH §, rêth, or rêthe. 467. *n. s.* [ppæð, Sax.] Any thing curled or twisted. *Bacon.* A garland; a chaplet. *Shakspeare.*

§ I have placed what I think the best usual mode of pronouncing this word first, because I think it so much more agreeable to analogy than the second. Nouns and verbs spelled alike, and ending with a hissing consonant, seem, throughout the whole language, to be distinguished from each other by the former giving the sharp, and the latter the flat sound to the consonant. See *Principles*, No. 437, 467, 499. *W.*

To WREATH, rêthe. *v. a.* pret. *wreathed*; part. pass. *wreathed*, *wreathen*, [ppîðan, Sax.] To curl; to twist; to convolve. *Shak.* Used for *to writhe*. *Gay.* To interweave; to entwine one in another. *Exod.* xxviii. To encircle, as a garland. *Prior.* To encircle as with a garland; to dress in a garland. *Dryden.*

To WREATH, rêthe. *v. n.* To be interwoven; to be intertwined. *Dryden.*

WRE'ATHY, rê'-thê. *a.* Spiral; curled; twisted. *Brown.* Covered with a wreath. *Dryden.*

WRECK §, rêk. 474. [See *SHIPWRECK*.] *n. s.* [ppæce, Sax.; *wracke*, Dutch.] Destruction by being driven on rocks or shallows at sea; destruction by sea. *Spenser.* Dissolution by violence. *Milton.* Ruin; destruction. *Shak.* The thing wrecked: as, The ship was considered as a *wreck*. *Shak.* Dead, undigested stems of grasses and weeds in a ploughed land. *Grose.*

§ Mr. Sheridan alone has given the sound of *a* to the *e* in this word; Mr. Scott, W. Johnston, Dr. Kenrick, Mr. Perry, and Mr. Smith, pronounce it as I have done. *W.*

To WRECK, rêk. *v. a.* To destroy by dashing on rocks or sands. *Spenser.* To ruin. *Daniel.* Used for *wreak*, in its different senses of *revenge* and *execute*. *Shakspeare.*

To WRECK, rêk. *v. n.* To suffer wreck. *Milton.*

WRE'CKFUL*, rêk'-fûl. *a.* Causing wreck. *Spenser.*

WREN, rên. 474. *n. s.* [ppenna, Sax.] A small bird. *Brown.*

XEB

XER

X Is a letter, which, though found in Saxon words, begins no word in the English language. *Dr. Johnson.*—An attempt has lately been made to introduce, from the French, the last of three or four words [those marked thus*]: two seem to have been once received; and the sea term is yet in use. *Todd.*

X It may be observed, that in words from the Greek, where *x* is initial, it is always pronounced like *z*. For the true pronunciation of this letter, when medial or final in English words, see *Principles*, No. 476. *W.*

X* The numeral letter for ten.

XYSTER†, zîs'-tûr. *n. s.* A surgeon's instrument to scrape and shave bones with.

YEA

YEL

Y At the beginning of words, is commonly taken, though perhaps erroneously, for a consonant; at the end, and when it follows a consonant, it is a vowel, and has the sound of *i*. It is used at the end of words, and whenever two *i*'s would come together; and in words derived from the Greek, to express the *u*. *Y* was much used by the Saxons, whence *y* is found for *i* in the old English writers. *Y* is, in old English, sometimes prefixed as an increasing syllable to preterits and passive participles of verbs. It seems borrowed from *ge*, the Saxon *augmentum* of the preterit. 180, 482.

YACHT, yôt. 356. *n. s.* [a Dutch word.] A small ship for carrying passengers. *Cook's Voyage*.

☞ This word is pronounced as I have marked it by Mr. Sheridan, Mr. Scott, W. Johnston, Mr. Perry, Mr. Nares, and Mr. Smith; Dr. Kenrick pronounces it *yat*, rhym'ng it with *hat*; and Mr. Barclay *yaut*, rhyming with *nought*. *W*.

YAM*, yâm. *n. s.* A root that grows in America and the South Sea islands. *Cook's Voyage*.

To YAP*, yâp. *v. n.* [a contraction of *yelp*.] To bark. *L'Estrange*.

YARD, yârd. 78. *n. s.* [ȝearð, Sax.] Enclosed ground adjoining to a house. *Brown*. [ȝeðð, Sax.] A measure of three feet. *Bacon*. The supports of the sails. *Dryden*.

YARDLAND*, yârd'-lând. *n. s.* [yard and land.] A quantity of land, various, according to the place: as, at Wimbledon in Surrey it is but fifteen acres; in other counties, twenty; in some, twenty-four; in some, thirty; and in others, forty acres. *Cowel*.

YARDWAND, yârd'-wônd. *n. s.* A measure of a yard. *Collier*.

YARE, yâre. *a.* [ȝeapre, Sax.] Ready; dexterous; nimble; eager. *Shakespeare*.

To YARR, yâr. *v. n.* [from the sound.] To growl, or snarl like a dog. *Ainsworth*.

YARROW, yâr'-rô. 81. *n. s.* A plant. *Drayton*.

YATE*, *n. s.* [ȝeat, Sax.] Still our northern word for *gate*; pronounced *yet*, or *yat*. *Spenser*.

YAW*, yâw. *n. s.* The unsteady motion which a ship makes in a great swell, when, in steering, she inclines to the right or left of her course. *Gifford*.

YAWL, or **YAUL***, yâwl. 219. *n. s.* A little vessel belonging to a ship, for convenience of passing to and from it. *Drummond*.

To YAWL*, yâwl. *v. n.* See To **YELL**. To cry out. *Fairfax*.

To YAWN*, yâwn. 219. *v. n.* [ȝeonan, Sax.] To gape; to oscitate; to have the mouth opened involuntarily by fumes, as in sleepiness. *Shak.* To open wide. *Shak.* To express desire by yawning. *Hooker*.

YAWN, yâwn. *n. s.* Oscitation. *Pope*. Gape; hiatus. *Addison*.

YA-WNING, yâwn'-ing. 410. *a.* Sleepy; slumbering. *Shakespeare*.

YCLA'D, è-klàd'. part. for *clad*. Clothed. *Shak.*

YCLEPED, è-klèp'. [clepan, Sax.] Called; termed; named. *Milton*.

YDRA'D, è-drâd'. part. pass. of *To dread*. *Spenser*.

YE, yè. The nominative plural of *thou*.

YEA, yè. 227. [yâ, Jones; yâ, yè, Fulton and Knight.] *ad.* [ea, or ȝea, Sax.] Yes. A particle of affirmation meaning, It is so, or, Is it so?

Gen. iii. A particle by which the sense is intended or enforced: not only so, but more than so. *Shak.*

☞ Mr. Sheridan, Mr. Scott, W. Johnston, Mr. Smith, and Mr. Fry, pronounce this word so as to rhyme with *pay*, *pay*, &c. But Steele or Brightland, Dr. Jones who wrote *The New Art of Spelling* in Queen Anne's time, Dr. Kenrick and Mr. Perry, pronounce it like the prenoun *ye*. Though so many are against me, I do not hesitate to pronounce the latter mode the best; first, as it is more agreeable to the general sound of the diphthong; next, as it is more related to its familiar substitute *yes*; and, lastly, unless my memory greatly fails me, because it is always so pronounced when contrasted with *nay*; as in that precept of the Gospel, "Let your communication be *yea*, *yea*, and *ay*, *ay*." *W*.

To YEAD, or **YEDE**, yèd. *v. n.* preterit *yode*. [ȝeod, Sax.] To go; to march. *Spenser. Ob. J.*

To YEAN, yèe. 227. *v. n.* [ȝanian, Sax.] To bring young. *Dryden*.

YEANED*, yèend. part. *a.* Brought forth as a lamb. *Fletcher*.

YEANLING, yèe'-ling. 410. *n. s.* The young of sheep. *Shakespeare*.

YEAK*, yèe. 227. *n. s.* [ȝeap, Sax.] Twelve months, or three hundred sixty-five days. *Watts*. It is often used plurally, without a plural termination. *Shak.* [In the plural.] Old age. *Bacon*.

YEARED*, yèerd. *a.* Containing years; numbering years. *B. Jonson*.

YE'ARBOOK*, yèe'-bôôk. *n. s.* Law reports published annually. *Blackstone*.

YE'ARLING, yèe'-ling. 410. *a.* Being a year old. *Pope*.

YE'ARLY, yèe'-lè. *a.* Annual; happening every year; lasting a year. *Shakespeare*.

YE'ARLY, yèe'-lè. *ad.* Annually; once a year. *Dryden*.

To YEARN*, yèrn. 234. *v. n.* [ȝýrnan, ȝeopnian, Sax.] To feel great internal uneasiness: it implies tenderness or pity. *Spenser*.

To YEARN, yèrn. *v. a.* To grieve; to vex. *Shak.*

YE'ARNFUL*, yèrn'-fûl. *a.* Mournful. *Danion and Pythias. Ob. T.*

YE'ARNING*, yèrn'-ing. *n. s.* Act or state of being moved with pity or tenderness. *Calamy*.

YEAST. See **YEST**.

YELK, yèlk. *n. s.* [ȝealepe, Sax.] The yellow part of the egg: commonly pronounced and often written *yolk*. *Bacon*.

☞ It is commonly pronounced, says Johnson, and often written, *yolk*. To which we may add, that, when the word is so written, the *l* is silent, and the word pronounced *yoke*. But Johnson seems justly to have preferred the former mode of writing and pronouncing this word, as more agreeable both to etymology and the best usage. *W*.

To YELL*, yèll. *v. n.* [ȝýllan, Sax.; yla, Su. Goth. and Icel.; ūlaw, Gr.; ululo, Lat.] To cry out with horror and agony. *Spenser*.

To YELL*, yèll. *v. a.* To utter with a yell. *Shak.*

YELL, yèll. *n. s.* A cry of horror. *Shakespeare*.

YELLOW*, yèl'-lò. *a.* [ȝealep, Sax.] Being of a bright, glaring colour, as gold. *Milton*.

☞ Mr. Sheridan, Mr. Nares, Mr. Scott, Dr. Jones, and Mr. Fry, pronounce this word as if written *yellow*, rhyming with *tallow*. But Dr. Kenrick, W. Johnston, Mr. Smith, and Mr. Perry, preserve the *e* in its pure sound, and rhyme the word with *mellow*. The latter mode is, in my opinion, clearly the best, both as more agreeable to analogy, and the best usage; for I am much deceived if the former pronunciation do not border closely on the vulgar. *W*.

—nô, môve, nôr, nôt;—tûbe, tâb, bâll;—âll;—pôund;—thin, THIS.

YELLOW*, yêl'-lô. n. s. Yellow colour. *Newton*.

To YELLOW*, yêl'-lô. v. a. To render yellow. *Shakspeare*.

To YE'LOW*, yêl'-lô. v. n. To grow yellow. *Dyer*.

YE'LOWBOY, yêl'-lô-bôê. n. s. A gold coin: a very low word. *Arbuthnot*.

YE'LOWGOLDS*, yêl'-lô-gôldz. n. s. A flower. *B. Jonson*.

YE'LOWHAMMER, yêl'-lô-hâm-mûr. n. s. A bird.

YE'LOWISH, yêl'-lô-îsh. a. Approaching to yellow. *Woodward*.

YE'LOWISHNESS, yêl'-lô-îsh-nês. n. s. The quality of approaching to yellow. *Boyle*.

YE'LOWNESS, yêl'-lô-nês. n. s. The quality of being yellow. *Bacon*. Jealousy. *Shakspeare*.

YE'LLOWS, yêl'-lôze. n. s. A disease in horses. *Farrier's Dict.*

To YELP, yêlp. v. n. [*gealpan*, Sax.] To bark as a beagle-hound after his prey. *Fulke*.

YEO'MAN, yô'-mân. 260. n. s. [*gumr*, Goth.; *guma*, Sax.] A man of a small estate in land; a farmer; gentleman farmer. *Locke*. A kind of title given to soldiers; whence we have still *yeomen* of the guard. *Spenser*. It was probably a freeholder not advanced to the rank of a gentleman. *Shak*. It seems to have had likewise the notion of a gentleman servant. *Spenser*.

Junius gives us a great variety of derivations of this word, but seems most to approve of that from *gaeman* in the old Frisick, signifying a countryman or villager; and this word is derived farther by Junius from the Greek *γαῖα*, *γαῖν*, *γῆ*, which, he tells us, does not only signify the land in general, but any great portion of land. Skinner says it may be derived from the Anglo-Saxon *gemene*, or the Teutonic *gemein*, a common man, or one of the commonalty; or from *evemman*, a shepherd; from *goodman*, an appellation given to inferior people; from *gemana*, a companion; from *geongman*, a young man; from *jeman*, an ordinary man, or any body, like the Spanish *hidalgo*; but he prefers its derivation from the Anglo-Saxon *guma*, a painful or laborious man.

But, however widely etymologists are divided in the derivation of this word, orthoëpists are not less different in their pronunciation of it. Mr. Sheridan, Mr. Scott, Mr. Coots, (author of the Elements of Grammar,) Steele's Grammar, (published in Queen Anne's time,) Mr. Barclay, Mr. Smith, and Buchanan, pronounce it with the diphthong short, as if written *yëmman*; Mr. Elphinstone (who quotes Langham, the famous reformer of orthography in Queen Elizabeth's time, for the same pronunciation) sounds the *eo* like *eo*; and Dr. Jones, the author of *The New Art of Spelling*, in Queen Anne's time, pronounces it in the same manner. To which we may add Ben Jonson, who says, that *yeoman*, *people*, and *jeopardy*, were truer written *yëman*, *pëpe*, *jëpardy*. But W. Johnston, Mr. Perry, Entick, and Fry, [also Jones, Fulton and Knight,] pronounce the *eo* like long open *o*, as if written *yôman*: and this last appears to me to be the most received pronunciation. It is that which we constantly hear applied to the king's body guard, and it is that which has always been the pronunciation on the stage; an authority which, in this case, may not, perhaps, improperly be called the best echo of the publick voice. I well remember hearing Mr. Garrick pronounce the word in this manner, in a speech in King Lear: "Tell me, fellow, is a madman a gentleman, or a yôman?" *W.*

YEO'MANLY*, yô'-mân-lê. a. Of or belonging to a yeoman. *B. Jonson*.

YEO'MANRY, yô'-mân-rê. 260. n. s. The collective body of yeomen. *Bacon*.

To YERK, yêrk. v. a. [probably of the same as *jerk*.] To throw out or move with a spring. A leaping horse is said to *yerk*, when he flings and kicks with his whole hind quarters. *Farrier's Dict.* To lash; to strike; to beat. *Spenser*.

To YERK*, yêrk. v. n. To move as with jerks. *Beaumont and Fletcher*.

YERK, yêrk. n. s. A quick motion.

To YERN, yêrn. v. a. See YEARN.

YES, yis. 101. ad. [*ÿpe*, Sax.] A term of affirmation; the affirmative particle opposed to *no*. *More*.

It is a word of enforcement: even so; not only so, but more. *Bacon*.

This word is worn into a somewhat slenderer sound than what is authorized by the orthography; but *e* and *i* are frequently interchangeable, and few changes can be better established than this. W. Johnston and Mr. Perry are the only orthoëpists, who give the sound of the vowels, that do not mark this change; but Mr. Sheridan, Mr. Scott, Dr. Kenrick, Mr. Nares, Mr. Smith, and Dr. Jones, in his *New Art of Spelling*, confirm this change, and rhyme it with *hiss*, *miss*, *bliss*, &c.—See *BEEN* and *DESPATCH*. *W.*

YEST, yêst. n. s. [*ÿert*, Sax.] The foam, spume, or flower of beer in fermentation; barm. *Hudibras*. The spume on troubled water; foam; froth. *Shakspeare*.

Dr. Johnson has very properly spelled this word *yest*, from the Saxon *gest*, and not *yeast*, as we sometimes see it; and this spelling decides its pronunciation. Dr. Jones spells it *yeast*, and gives the diphthong its long sound; Mr. Nares pronounces the word in the same manner, but spells it *yest*; Dr. Kenrick spells it *yest*, but rhymes it with *mist*; Mr. Barclay pronounces it *yeest*; Mr. Perry writes it *yëast* and *yëst*; but Mr. Sheridan, Mr. Scott, and Mr. Smith, write it as Dr. Johnson has done, and pronounce it as I have done; and, I think, not only more agreeable to analogy, which forbids us to pronounce the *e* long, when followed by *st* in the same syllable, (see *LEAST*); but, if I mistake not, more consonant to polite usage. The vulgar do not only pronounce the diphthong long, but sink the *y*, and reduce the word to *east*. *W.*

YESTER, yês'-tûr. a. [*ÿertenn*, *ÿertpan*, Sax.; *hesternus*, Lat.; *hesern*, old Eng.] Being next before the present day. It is not often used but in composition with another word, as *day* or *night*. *Dryden*.

YESTERDAY, yês'-tûr-dâ. n. s. [*ÿertpanbæg*, Sax.] The day last past; the day next before to-day. *Job*, viii.

Though *yes*, from its continual use, is allowably worn into the somewhat easier sound of *yis*, there is no reason why *yesterday* should adopt the same change, and, though I cannot pronounce this change vulgar, since Mr. Sheridan, Dr. Kenrick, Mr. Nares, and Mr. Scott, have adopted it, I do not hesitate to pronounce the regular sound, given by W. Johnston, as the more correct and agreeable to the best usage. *W.*

YESTERDAY, yês'-tûr-dâ. ad. On the day last past. *Bacon*.

YESTERNIGHT, yês'-tûr-nlê. n. s. The night before this night.

YESTERNIGHT, yês'-tûr-nlê. ad. On the night last past. *Shakspeare*.

YE'STY, yês'-tê. a. [*ÿrig*, Sax.] Frothy; spumy foamy. *Shakspeare*.

YET, yêt. conjunct. [*ÿÿc*, *ÿet*, *ÿeta*, Sax.] Nevertheless; notwithstanding; however. *Daniel*.

The *e* in this word is frequently changed by incorrect speakers into *i*; but, though this change is agreeable to the best and most established usage in the word *yes*, in *yet* it is the mark of incorrectness and vulgarity.

Dr. Kenrick is the only orthoëpist who gives any countenance to this incorrectness, by admitting it as a second pronunciation; but Mr. Sheridan, Mr. Scott, W. Johnston, Mr. Perry, and Mr. Smith, give the regular sound only. *W.*

YET, yêt. ad. Beside; over and above. *Atterbury* Still; the state still remaining the same. *Addison* Once again. *Pope*. At this time; so soon; hither to: with a negative before it. *Bacon*. At least; at all. *Baker*. It denotes continuance and extension, greater or smaller: as, a little longer, *yet* a little longer. *Dryden*. Still; in a new degree: as, *yet* blacker. *L'Estrange*. Even; after all: a kind of emphatical addition to a negative. *Whitgift*. Hitherto: sometimes with *as* before it. *Hooker*.

YE'VEN, for *given*. *Spenser*.

YEW, yôd. n. s. [*ÿp*, Sax.; *yvo*, Welsh.] A tree of tough wood, used for bows, and planted in churchyards. *Miller*.

YE'WEN, yôd'-n. a. Made of the wood of yew. *Spenser*.

YEX, yêks. n. s. [*hick*, *hickse*, Belg.; *ÿeocrunç*, Sax.] The hiccough. *Holland*.

To YEX, yêks. *v. n.* To have the hiccough. *Hulst.*

YFÈRE, è-fère'. *ad.* [ÿfere, Sax.] Together. *Spenser.*

To YIELD, yèld. 275. *v. a.* [ÿelðan, Sax.] To produce; to give in return for cultivation or labour. *Gen. iv.* To produce in general. *Job. xxiv.* To afford; to exhibit. *Sidney.* To give as claimed of right. *Milton.* To allow; to concede. *Hammond.* To permit; to grant. *Dryden.* To emit; to expire. *Gen. xlix.* To resign; to give up. *Sidney.* To surrender. *Knolles.*

To YIELD, yèld. *v. n.* To give up the contest; to submit. *Daniel.* To comply with any person, or motive power. *Hooker.* To comply with things required or enforced. *Bacon.* To concede; to admit; to allow; not to deny. *Hakewill.* To give place as inferior in excellence or any other quality. *Dryden.*

YIE/LDABLENESS*, yèld'-â-bl-nês. *n. s.* Disposition to concede or comply with. *Bp. Hall.*

YIE/LDANCE*, yèld'-ânse. *n. s.* Act of producing. *Bp. Hall.* Act of complying with; concession. *Bp. Hall.*

YIE/LDER, yèld'-âr. *n. s.* One who yields. *Shak.*

YIE/LDING*, yèld'-îng. *n. s.* Act of giving up; submission. *Shakespeare.*

YIE/LDINGLY*, yèld'-îng-lê. *ad.* With compliance. *Warner.*

YIE/LDINGNESS*, yèld'-îng-nês. *n. s.* Disposition to give up any point. *Id. Halifax.* Quality of yielding. *Paley.*

YOKE, yôke. *n. s.* [ÿeoc, Sax.; *jock*, Dutch.] The bandage placed on the neck of draught oxen. *Numb. xix.* A mark of servitude; slavery. *Shak.* A chain; a link; a bond. *Dryden.* A couple; two; a pair; it is used in the plural with the singular termination. *Shakespeare.*

To YOKE, yôke. *v. a.* To bind by a yoke to a carriage. *Dryden.* To join or couple with another. *Shakespeare.* To enslave; to subdue. *Shakespeare.* To restrain; to confine. *Bacon.*

To YOKE*, yôke. *v. n.* To be joined together. *Milton.*

YOKE-ELM, yôke'-êlm. *n. s.* A tree. *Ainsworth.*

YOKEFELLOW, yôke'-fêl-lô. } *n. s.* Companion

YOKEMATE, yôke'-mâte. } in labour. *Shak.*

Mate; fellow; commonly partner in marriage. *Hudibras.*

YOLD, for yielded. *Spenser.* Obsolete.

YOLK, yôke. *n. s.* See YELK. The yellow part of an egg. *Ray.*

To YOLP*. See To YELL.

YON, yôn. } *a.* [ÿeond, Sax.] Being

YOND, yônd. } at a distance within

YONDER, yôn'-dâr. 98. } view. *Bacon.*

There is a vulgar pronunciation of this word in London, as if written *yander*. This cannot be too carefully avoided. *W.*

YON, yôn. } *ad.* At a distance within

YOND, yônd. } view: it is used when we

YONDER, yôn'-dâr. } direct the eye from another thing to the object. *Shakespeare.*

YOND, yônd. *a.* Mad; furious: perhaps transported with rage; under alienation of mind: in which sense it concurs with the rest. *Spenser.*

YORE, or of Yore, yôre. *ad.* [ÿeogapa, Sax.] Long. *Spenser.* Of old time; long ago. *Drayton.*

YOU, yô. 8, 315. *pron.* [eop, ruh, Sax.; of ÿe, yæ.] The oblique case of *ye*. *Eph. iii.* It is used in the nominative in common language, when the address is to persons; and, though first introduced by corruption, is now established. *Dryden.* It is the ceremonial word for the second person singular, and is always used, except in solemn language. *Prior.* It is used indefinitely, as the French *on*; any one whosoever. *Addison.* *You* is used in the sub-

sequent members of a sentence, as distinguished from *ye*. *Pope.*

YOUNG, yûng. *a.* [iong, ÿeong, Sax.; *jong*, Dutch.] Being in the first part of life; not old: used of animal life. *Corew.* Ignorant; weak. *Shak.* It is sometimes applied to vegetable life; as, *young trees*. *Bacon.*

YOUNG, yûng. 314. *n. s.* The offspring of animals collectively. *Shakespeare.*

YOUNGISH, yûng'-ish. 381. *a.* Somewhat young. *Tatler.*

YOUNGLING, yûng'-ling. 410. *n. s.* [ÿeongling, Sax.] Any creature in the first part of life. *Spenser.*

YOUNGLY*, yûng'-lê. *a.* Youthful. *Gower.*

YOUNGLY, yûng'-lê. 381. *ad.* Early in life. *Shak.*

Ignorantly; weakly.

YOUNGSTER, yûng'-stâr. } *n. s.* A young per-

YOUNKER, yûngk'-ûr. 98. } son: in contempt.

Shakespeare.

YOUNGTH, yûngth. *n. s.* Youth. *Spenser.* *Ob. J.*

YOUR, yôor. *pronoun.* [eopen, Sax.] Belonging to you: it is used properly when we speak to more than one, and ceremoniously and customarily when to only one. *Shak.* *Your* is used in an indeterminate sense: as, among your antiquaries. *Felton.* *Yours* is used when the substantive goes before or is understood: as, *This is your book*, *This book is yours*. *Shakespeare.*

This word is nearly under the same predicament as the pronoun *my*. When the emphasis is upon this word, it is always pronounced full and open, like the noun *ever*: as, "The moment I had read *your* letter I sat down to write *mine*;" but when it is not emphatical, it generally sinks into *yur*, exactly like the last syllable of *taxe-yer*: as, "I had just answered *yur* first letter as *yur* last arrived." Here, if we were to say, "I had just answered *your* first letter as *your* last arrived," with *your* sounded full and open like *ever*, as in the former sentence, every delicate ear would be offended. This obscure sound of the possessive pronoun *your* always takes place when it is used to signify any species of persons or things in an indeterminate sense. Thus Addison, speaking of those metaphors which professional men most commonly fall into, says, "Your men of business usually have recourse to such intances as are too mean and familiar."—*Spectator*, No. 421. *W.*

YOURSELF, yûr-sêlf. *n. s.* You, even you; ye, not others. *Shak.* In the oblique cases it has the sense of reciprocation, or reference to the same subject mentioned before: as, *You love only yourself*: *You have betrayed yourselves* by your rashness. *Law.* It is sometimes reciprocal in the nominative: as, *Be but yourselves*. *Pope.*

The pronunciation of *your* in this word is a confirmation of the observations on the foregoing word. *W.*

YOUTH, yôuth. *n. s.* [ÿeouð, Sax.] The part of life succeeding to childhood and adolescence; the time from fourteen to twenty-eight. *Raleigh.* A young man. *Shakespeare.* Young men: collectively. *B. Jonson.*

YOUTHFUL, yôuth'-fûl. *a.* Young. *Shak.* Suitable to the first part of life. *Milton.* Vigorous as in youth. *Bentley.*

YOUTHFULLY, yôuth'-fûl-lê. *ad.* In a youthful manner.

YOUTHLY, yôuth'-lê. *a.* Young; early in life.

Spenser. *Ob. J.*

YOUTHY, yôuth'-ê. 381. *a.* Young; youthful. *Spectator.*

YPIGHT. *part.* [*y* and *pight*, from *pitch*.] Fixed. *Spenser.*

To YUCK, yûk. *v. n.* [*jeucken*, Dut.] To itch. *Grose.*

YULE, yûle. *n. s.* [*jûl*, Su. Goth.; *jule*, Dan.; *jol*, Icel.; *ÿeol*, Sax.] A word adopted, and formerly much in use, for the times of Christmas and Lammas. *Hammond.*

YUX, yûks. *n. s.* [ÿeoc, Sax. See YEX.] The hiccough.

—nò, mòve, nòr, nòt; —tùbe, túb, búll; —díl; —pòdnd; —thin, THIS.

Z Is found in the Saxon alphabets, set down by grammarians, but is read in no word originally Teutonic: its sound is uniformly that of a hard s. No word of English original begins with z.

For the true name of this letter, see *Principles*, No. 483. *W.*

ZA'FFAR, { zâf-fâr. } *n. s.* A mass made of the
ZA'FFIR, { zâf-fâr. } calx of cobalt powdered
fine, mixed with three times its weight of powdered
flints: this from its hardness has been mistaken for
a native mineral. *Hill*.

ZA'NY ð, zâ-né. *n. s.* [*zanni*, Ital.] One employed
to raise laughter by his gestures, actions, and
speeches; a merry-andrew; a buffoon. *Shak.*

To **ZA'NY***, zâ-né. *v. a.* To mimic. *Beaumont and Fletcher*.

ZA'RNICH, zâr-ník. *n. s.* A substance in which or-
piment is found. *Hill*.

ZEAF*, zè. *n. s.* A kind of corn. *Chambers*.

ZEAL ð, zèle. *n. s.* [*ζῆλος*, Gr.; *zelus*, Lat.] Passiona-
te ardour for any person or cause. *Hooker*.

To **ZEAL***, zèle. *v. n.* To entertain zeal. *Bacon*.
Ob. T.

ZEAL'ED*, zèèld. *a.* Filled with zeal. *Fuller*.
Ob. T.

ZEAL'LESS*, zèle-lès. *a.* Wanting zeal. *Ham-
mond*.

ZEAL'OT, zèl'-ût, or zè-lûit. 235. *n. s.* [*zeloteur*,
Fr.; *ζηλωτής*, Gr.] One passionately ardent in any
cause: generally used in dispraise. *White*.

There are few words better confirmed by authority in
their departure from the sound of their simple than
this and *zealous*. Dr. Ash and Bailey are the only
lexicographers, who (if we may judge by the posi-
tion of the accent) give the long sound to this word, as
in *zeal*; and even these give the short sound to *zealous*.
Dr. Kenrick gives both sounds to both words, but pre-
fers the short sound by placing it first; but Mr. Elphin-
ston, Mr. Sheridan, Mr. Nares, Mr. Smith, Mr. Perry,
Barclay, and Entick, give both these words the short
sound. As the word *zealous* may either come from the
Latin *zelus*, or rather *zelosus*, or be a formative of our
own from *zeal*, as *villanous*, *libellous*, &c., from *villanus*,
libel, &c., analogy might very allowably be pleaded for
the long sound of the diphthong; and, if custom were
less decided, I should certainly give my vote for it; but
as propriety of pronunciation may be called a compound
ratio of usage and analogy, the short sound must in this
case be called the proper one.—See *KNOWLEDGE*, and
Principles, No. 515. *W.*

ZEALOTRY*, zèl'-ût-rè. *n. s.* Behaviour of a zealot.
Bp. Taylor.

ZEAL'OUS, zèl'-ûs, or zè-lûs. *a.* Ardently passion-
ate in any cause. *Bp. Taylor*.

ZEALOUSLY, zèl'-ûs-lè, or zè-lûs-lè. *ad.* With
passionate ardour. *Milton*.

ZEALOUSNESS, zèl'-ûs-nès, or zè-lûs-nès. *n. s.*
The quality of being zealous.

ZE'BRÀ*, zè-brâ. *n. s.* An Indian ass, naturally
striped. *Harknessworth*.

ZE'CHIN, tshè-kèen', *n. s.* [from *Zecha*, a place in
Venice where the mint is settled for coinage.] A
gold coin worth about nine shillings sterling.

ZED, zèd, or iz'-zûrd. *n. s.* The name of the letter z.
Shakspeare.

For the proper name of this letter, see *Principles*,
No. 483. *W.*

ZE'DOARY, zèd'-ô-â-rè. *n. s.* [*zedoaire*, Fr.] A spi-
cy plant, somewhat like ginger in its leaves, but of
a sweet scent. *Bp. Hall*.

ZEN'ITH, zè-nîth. *n. s.* [Arabic.] The point over
head opposite to the nadir. *Brown*.

I never once called in doubt the pronunciation of this
word, till I was told that mathematicians generally
made the first syllable short. Upon consulting our or-
thoëpists, I find all who have the word, and who give
the quantity of the vowels, make the e long, except En-
tick. Thus Sheridan, Kenrick, Scott, Buchanan, W.
Johnston, and Perry, pronounce it long; and, if this ma-
jority were not so great and so respectable, the analogy

of words of this form ought to decide.—See *Principles*,
No. 514.—See *CLEF* and *CONSTRUE*. *W.*

ZE'PHYR, zèf-fêr. 543. } *n. s.* [*zephyrus*, Lat.]
ZE'PHYRUS, zèf-fêr-ûs. } The west wind; and,
poetically, any calm, soft wind. *Milton*.

ZEST ð, zèst. *n. s.* The peel of an orange squeezed
into wine. A relish; a taste added. *Young*.

To **ZEST**, zèst. *v. a.* To heighten by an additional
relish.

ZETE'TICK, zè-tèf'-îk. 509. *a.* [from *ζητέω*.] Pro-
ceeding by inquiry.

ZEUG'MA, zûg'-mâ. 92. *n. s.* [from *ζεύγω*.] A
figure in grammar, when a verb agreeing with di-
vers nouns, or an adjective with divers substantives,
is referred to one expressly, and to the other
by supplement; as, Lust overcame shame, boldness
fear, and madness reason.

ZIG-ZAG ðs, zig'-zâg. *n. s.* A line with sharp and
quick turns. *Pope*.

ZIG-ZAG*, zig'-zâg. *a.* Having sharp and quick
turns. *Graves*.

To **ZIG-ZAG***, zig'-zâg. *v. a.* To form into sharp
and quick turns. *Warton*.

To PROGNOSTICK*, *v. a.* To foretell. *Hacket.* Not in use.

To PROGRESS, prô-grêss'. *v. n.* To move forward; to advance; to pass. *Webster's Dict.* The verb to *progress*, with the accent on the first syllable, is found in early English writers, and it is in Johnson's Dictionary, but noted as *not used*. But this word is, in the United States, pronounced with the accent on the last syllable, and it has, together with its participle, *progressing*, been much used in this country, both in conversation and writing, since the Revolution. It has been censured and ridiculed, however, by American, as well as English critics; and it is less used, at present, by authors of reputation, in this country, than formerly. It is not wholly without recent English authority: "As he *progressed* in years," *Translation of Anquetil's Universal History*, vol. ix. p. 246. See also the newspaper report of the *Rt. Hon. R. Peel's Speech* on the late change of the English ministry. *Pick. Vocab.*

—nò, mòve, nòr, nòt; —tùbe, túb, búll; —díl; —pòund; —thin, THIS.

not exclusively, in the plural. It is not in the English dictionaries, but it has been, of late, used by English as well as American writers: "There are but two cataracts, which are not falls, but mere rapids." *Quarterly Review*. "At this cataract, or rather rapid." *Dr. S. Butler's Geography*.

RASCALITY, [J.] Dr. Johnson's only definition of this word is, "The low, mean people." The definition which Mr. Todd gives to the word *scoundrelism* is, "Baseness; rascality;" which is the sense in which *rascality* is now chiefly used.

RA'SHLING*, rāsh'-līng. *n. s.* One who acts without caution, or reflection. *Sylvester*.

To RAUT*, rāwt. *v. n.* To bellow; to roar. See *To ROAR*.

PREFACE.

THE Critical Pronouncing Dictionary of the English Language naturally suggested an idea of the present work. Proper names from the Greek and Latin form so considerable a part of every cultivated living language, that a dictionary seems to be imperfect without them. Polite scholars, indeed, are seldom at a loss for the pronunciation of words they so frequently meet with in the learned languages; but there are great numbers of respectable English scholars, who, having only a tincture of classical learning, are much at a loss for a knowledge of this part of it. It is not only the learned professions that require this knowledge, but almost every one above the merely mechanical. The professors of painting, statuary, and music, and those who admire their works; readers of history, politics, poetry; all who converse on subjects ever so little above the vulgar, have so frequent occasion to pronounce these proper names, that whatever tends to render this pronunciation easy must necessarily be acceptable to the publick.

The proper names in Scripture have still a higher claim to our attention. That every thing contained in that precious repository of divine truth should be rendered as

easy as possible to the reader, cannot be doubted: and the very frequent occasions of pronouncing Scripture proper names, in a country where reading the Scripture makes part of the religious worship, seem to demand some work on this subject more perfect than any we have hitherto seen.

I could have wished it had been undertaken by a person of more learning and leisure than myself; but we often wait in vain for works of this kind, from those learned bodies which ought to produce them, and at last are obliged, for the best we can get, to the labours of some necessitous individual. Being long engaged in the instruction of youth, I felt the want of a work of this kind, and have supplied it in the best manner I am able. If I have been happy enough to be useful, or only so far useful as to induce some abler hand to undertake the subject, I shall think my labour amply rewarded. I shall still console myself with reflecting, that he who has produced a prior work, however inferior to those that succeed it, is under a very different predicament from him who produces an after-work, inferior to those that have gone before.

TO THE SECOND EDITION.

THE favourable reception of the first edition of this work has induced me to attempt to make it still more worthy of the acceptance of the publick, by the addition of several critical observations, and particularly by two Terminational Vocabularies, of Greek and Latin, and Scripture Proper Names. That so much labour should be bestowed upon an inverted arrangement of these words, when they had already been given in their common alphabetical order, may be matter of wonder to many persons, who will naturally inquire into the utility of such an arrangement. To these it may be answered, that the words of all languages seem more related to each other by their terminations than by their begin-

nings; that the Greek and Latin languages seem more particularly to be thus related; and classing them according to their endings seemed to exhibit a new view of these languages, both curious and useful: for, as their accent and quantity depend so much on their termination, such an arrangement appeared to give an easier and more comprehensive idea of their pronunciation than the common classification by their initial syllables. This end was so desirable as to induce me to spare no pains, however dry and disgusting, to promote it; and, if the method I have taken has failed, my labour will not be entirely lost, if it convinces future prosodists that it is not worthy of their attention.

INTRODUCTION.

THE pronunciation of the learned languages is much more easily acquired than that of our own. Whatever might have been the variety of the different dialects among the Greeks, and the different provinces of the Romans, their languages, now being dead, are generally pronounced according to the respective analogies of the several languages of Europe, where those languages are cultivated, without partaking of those anomalies to which the living languages are liable.

Whether one general, uniform pronunciation of the ancient languages be an object of sufficient importance to induce the learned to depart from the analogy of their own language, and to study the ancient Latin and Greek pronunciation, as they do the etymology, syntax, and prosody of those languages, is a question not very easy to be decided. The question becomes still more difficult, when we consider the uncertainty we are in respecting the ancient pronunciation of the Greeks and Romans, and how much the learned are divided among themselves about it.* Till these points are settled, the English may well be allowed to follow their own pronunciation of Greek and Latin, as well as other nations, even though it should be confessed that it seems to depart more from what we can gather of the ancient pronunciation, than

either the Italian, French, or German.† For why the English should pay a compliment to the learned languages, which is not done by any other nation in Europe, it is not easy to conceive; and as the colloquial communication of learned individuals of different nations so seldom happens, and is an object of so small importance when it does happen, it is not much to be regretted that when they meet they are scarcely intelligible to each other.‡

But the English are accused not only of departing from the genuine sound of the Greek and Roman vowels, but of violating the quantity of these languages more than the people of any other nation in Europe. The author of the Essay upon the Harmony of Language gives us a detail of the particulars by which this accusation is proved: and this is so true a picture of the English pronunciation of Latin, that I shall quote it at length, as it may be of use to those who are obliged to learn this language without the aid of a teacher:

“The falsification of the harmony by English scholars in their pronunciation of Latin, with regard to essential points, arises from two causes only: first, from a total inattention to the length of vowel sounds, making them long or short merely as chance directs; and, secondly, from sounding double consonants as only one letter.

* Middleton contends, that the initial *c* before *e* and *i* ought to be pronounced as the Italians now pronounce it; and that *Cicero* is neither *Sicero*, as the French and English pronounce it; nor *Kikero*, as Dr. Bentley asserts; but *Tchitchero*, as the Italians pronounce it at this day. This pronunciation, however, is derided by Lipsius, who affirms, that the *c* among the Romans had always the sound of *k*. Lipsius says, too, that of all the European nations the British alone pronounce the *i* properly; but Middleton asserts, that of all nations they pronounce it the worst. *Middleton De Lat. Liter. Pronun. Dissert.*

Lipsius, speaking of the different pronunciation of the letter *G* in different countries, says:

Nos hodie (de literâ *G* loquente) quàm peccamus? Itolorum enim plerique ut *Z* exprimunt, Galli et Belgæ ut *J* consonantem. Itaque illorum est *Lezere*, *Fuzere*; nostrum, *Leiere*, *Fuiere*, (*Lejere*, *Fujere*). Omnia impenitè, ineptè. Germanos saltem audite, quorum sonus hic germanus, *Legere*, *Tegere*; ut in *Lego*, *Tego*, nec unquam variant: at nos ante *I*, *E*, *Æ*, *Y*, semper dicimusque *Jennam*, *Jetulos*, *Jingivam*, *Jyrum*; pro istis, *Gennam*, *Gætulos*, *Gingivam*, *Gyrum*. Mutemus aut vapulemus.—*Lipsius. De Rect. Pron. Ling. Lat.* page 71.

Hinc factum est ut tanta in pronunciando varietas extiteret ut pauci inter se in literarum sonis consentiant. Quod quidem mirum non esset, si indocti tantùm à doctis in eo, ac non ipsi etiam aliqui eruditi inter se magna contentione dissiderent.—*Adôlp. Meier. De Lin. Græc. vet. Pronun.* cap. ii. page 15.

† Monsieur Launecelot, the learned author of the Port-Royal Greek Grammar, in order to convey the sound of the long Greek vowel *η*, tells us, it is a sound between the *e* and the *a*, and that Eustathius, who lived towards the close of the twelfth century, says that *βῆ*, *βῆ*, is a sound made in imitation of the bleating of a sheep; and quotes to this purpose this verse of an ancient writer called Cratinus:

‘Ο δ’ ἡλιθίος ὥσπερ προβάτων, βῆ, βῆ, λέγων βαδίζει.

Is fatuus perinde ac ovis, bē, bē, dicens, incedit.

He, like a silly sheep, goes crying baa.

Caninius has remarked the same, *Hellen.* p. 26. *E* tongo, cujus sonus in ovium balatu sentitur, ut Cratinus et Varro tradiderunt. The sound of the *e* long may be perceived in the bleating of sheep, as Cratinus and Varro have handed down to us.

Eustathius likewise remarks upon the 499 v. of Iliad I. that the word βλόψ ἴσεν δ’ τῆς κλεψύδρας ἤχος μεμητικὸς κατὰ τοὺς παλαιούς; βῆ ἔχει μέμνησιν προβάτων φωνῆς. Κράτινος. Βλόψ est Clepsydre sonus, ex imitatione secundum veteres: et βῆ imitatur vocem ovium. *Blops*, according to the ancients, is a sound in imitation of the

Clepsydra, as *baa* is expressive of the voice of sheep. It were to be wished that the sound of every Greek vowel had been conveyed to us by as faithful a testimony as the *η*; we should certainly have had a better idea of that harmony for which the Greek language was so famous, and in which respect Quintilian candidly yields it the preference to the Latin.

Aristophanes has handed down to us the pronunciation of the Greek diphthong *αὐ* *αὐ*, by making it expressive of the barking of a dog. This pronunciation is exactly like that preserved by nurses and children among us to this day in *bow wow*. This is the sound of the same letters in the Latin tongue; not only in proper names derived from Greek, but in every other word where this diphthong occurs. Most nations in Europe, perhaps all but the English, pronounce *audio* and *laudo* as if written *ovdio* and *lovdo*; the diphthong sounding like *ou* in *loud*. Agreeably to this rule, it is presumed that we formerly pronounced the apostle *Paul* nearer the original than at present. In Henry the Eighth's time it was written *St. Poule's*, and sermons were preached at *Poule's Cross*. The vulgar, generally the last to alter, either for the better or worse, still have a jingling proverb with this pronunciation, when they say, as *old as Poules*.

The sound of the letter *υ* is no less sincerely preserved in Plautus, in Menæch. page 622, edit. Lambin, in making use of it to imitate the cry of an owl—

“MEN. Egon dedi? PEN. Tu, Tu, istic, inquam, vin’ afferri noctuam,
“Quæ tu, tu, uque dicat tibi? nam nos jam nos defessi sumus.”

“It appears here,” says Mr. Forster, in his defence of the Greek accents, page 129, “that an owl’s cry was *tu, tu*, to a Roman ear, as it is *too, too*, to an English.” Lambin, who was a Frenchman, observes on the passage, “Alludit ad noctuæ vocem seu cantum, *tu, tu*, seu *tau, tou*.” He here alludes to the voice or noise of an owl. It may be farther observed, that the English have totally departed from this sound of the *υ* in their own language, as well as in their pronunciation of Latin.

† Erasmus se adfuisse olim commemorat cum die quodam solenni complures principum legati ad Maximilianum Imperatorem salutandi causâ advenissent; Singulosque Gallum, Germanum, Danum, Scotum, &c. orationem Latinam, ita barbarè ac vèstè pronunciâsse, ut Italî quibusdam, nihil nisi risum moverint, qui eos non Latinè sed suâ quemque linguâ, locutos jurâssent.—*Middleton, De Lat. Lit. Pronun.*

The love of the marvellous prevails over truth: and I question if the greatest diversity in the pronunciation of Latin exceeds that of English at the capital and in some of the counties of Scotland, and yet the inhabitants of both have no great difficulty in understanding each other.

The remedy of this last fault is obvious. With regard to the first, we have already observed, that each of our vowels hath its general long sound, and its general short sound totally different. Thus the short sound of *e* lengthened is expressed by the letter *a*, and the short sound of *i* lengthened is expressed by the letter *e*: and with all these anomalies usual in the application of vowel characters to the vowel sounds of our own language, we proceed to the application of vowel sounds to the vowel characters of the Latin. Thus, in the first syllable of *sidus* and *nomen*, which ought to be long, and of *miser* and *onus*, which ought to be short, we equally use the common long sound of the vowels; but in the oblique cases, *sideris nominis, miseri, oneris*, &c., we use quite another sound, and that a short one. These strange anomalies are not in common to us with our southern neighbours, the French, Spaniards, and Italians. They pronounce *sidus* according to our orthography, *seelus*, and in the oblique cases preserve the same long sound of the *i*: *nomen* they pronounce as we do, and preserve in the oblique cases the same long sound of the *o*. The Italians also, in their own language, pronounce doubled consonants as distinctly as the two most discordant mutes of their alphabet. Whatever, therefore, they may want of expressing the true harmony of the Latin language, they certainly avoid the most glaring and absurd faults in our manner of pronouncing it.

"It is a matter of curiosity to observe with what regularity we use these solecisms in the pronunciation of Latin. When the penultimate is accented, its vowel, if followed but by a single consonant, is always long, as in Dr. Forster's examples. When the antepenultimate is accented, its vowel is, without any regard to the requisite quantity, pronounced short, as in *mirabile, frigidus*; except the vowel of the penultimate be followed by a vowel, and then the vowel of the antepenultimate is, with as little regard to true quantity, pronounced long; as in *maneo, redeat, odium, imperium*. Quantity is, however, vitiated to make *i* short even in this case, as in *oblivio, vinea, virum*. The only difference we make in pronunciation between *vinea* and *venia* is, that to the vowel of the first syllable of the former, which ought to be long, we give a short sound; to that of the latter, which ought to be short, we give the same sound, but lengthened. *U* accented is always, before a single consonant, pronounced long, as in *humerus, fugiens*. Before two consonants no vowel sound is ever made long, except that of the diphthong *au*; so that, whenever a doubled consonant occurs, the preceding syllable is short.* Unaccented vowels we treat with no more ceremony in Latin than in our own language." *Essay upon the Harmony of Language*, page 224. Printed for Robson, 1774.

This, it must be owned, is a very just state of the case; but, though the Latin quantity is thus violated, it is not, as this writer observes in the first part of the quotation, merely as *chance directs*, but, as he afterwards observes, *regularly*, and, he might have added, according to the analogy of English pronunciation, which, it may be observed, has a genius of its own: and which, if not so well adapted to the pronunciation of Greek and Latin as some other modern languages, has as fixed and settled rules for pronouncing them as any other.

The learned and ingenious author next proceeds to show the advantages of pronouncing our vowels so as to express the Latin quantity: "We have reason to suppose," says he, "that our usual accentuation of Latin, however it may want of many elegancies in the pronunciation of the Augustan age, is yet sufficiently just to give with tolerable accuracy that part of the general harmony of the language of which accent is the efficient. We have also pretty full information from the poets what syllables ought to have a long, and what a short quantity. To preserve, then, in our pronunciation, the true harmony of the language, we have only to take care

to give the vowels a long sound or a short sound, as the quantity may require; and, when doubled consonants occur, to pronounce each distinctly." *Ibid.* page 223.†

In answer to this plea for alteration, it may be observed, that, if this mode of pronouncing Latin be that of foreign nations, and were really so superior to our own, we certainly must perceive it in the pronunciation of foreigners, when we visit them, or they us: but I think I may appeal to the experience of every one who has had an opportunity of making the experiment, that, so far from a superiority on the side of the foreign pronunciation, it seems much inferior to our own. I am aware of the power of habit, and of its being able, on many occasions, to make the worse appear the better reason; but if the harmony of the Latin language depended so much on a preservation of the quantity as many pretend, this harmony would surely overcome the bias we have to our own pronunciation; especially if our own were really so destructive of harmony as it is said to be. Till, therefore, we have a more accurate idea of the nature of quantity, and of that beauty and harmony of which it is said to be the efficient in the pronunciation of Latin, we ought to preserve a pronunciation which has naturally sprung up in our own soil, and is congenial to our native language. Besides, an alteration of this kind would be attended with so much dispute and uncertainty as must make it highly impolitic to attempt it.

The analogy, then, of our own language being the rule for pronouncing the learned languages, we shall have little occasion for any other directions for the pronunciation of the Greek and Latin proper names, than such as are given for the pronunciation of English words. The general rules are followed almost without exception. The first and most obvious powers of the letters are adopted, and there is scarcely any difficulty but in the position of the accent; and this depends so much on the quantity of the vowels, that we need only inspect a dictionary to find the quantity of the penultimate vowel, and this determines the accent of all the Latin words; and, it may be added, of almost all Greek words likewise.‡ Now, in our pronunciation of Latin words, whatever be the quantity of the first syllable in a word of two syllables, we always place the accent on it: but, in words of more syllables, if the penultimate be long, we place the accent on that; and if short we accent the antepenultimate.

The Rules of the Latin Accentuation are comprised in a clear and concise manner by Sanctius within four hexameters:

Accentum in se ipsa monosyllaba dictio ponit.

Exacuit sedem dissyllabon omne priorem.

Ex tribus, extollit primam penultima curta:

Extollit seipsam quando est penultima longa.

These rules I have endeavoured to express in English verse:

Each monosyllable has stress of course:

Words of two syllables the first enforce:

A syllable that's long, and last but one,

Must have the accent upon that or none;

But if this syllable be short, the stress

Must on the last but two its force express.

The only difference that seems to obtain between the pronunciation of the Greek and Latin languages, is that, in the Latin, *ti* and *si*, preceded by an accent, and followed by another vowel forming an improper diphthong, are pronounced, as in English, like *sh* or *zh*; as *natio, nation*; *persuasio, persuasion*, &c.; and that, in the Greek, the same letters retain their pure sound, as *φίλοντια, δύνοσια, προβατιον*, κ. τ. λ. § This difference, however, with very few exceptions, does not extend to proper names; which, coming to us through, and being mingled with, the Latin, fall into the general rule. In the same manner, though in Greek it was an established maxim, that if the last syllable

* This corruption of the true quantity is not, however, peculiar to the English; for Beza complains in his country: *Hinc enim fit ut in Græca oratione vel nullum, vel prorsus corruptum numerum intelligas, dum multæ breves producantur, et contrâ plurimæ longæ corripuntur.*—*Beza de Germ. Pron. Græca Lingua*, p. 50.

† By what this learned author has observed of our vicious pronunciation of the vowels, by the long and short sound of them, and from the instances he has given, he must mean that length and shortness which arises from extending and contracting them, independently of the obstruction which two consonants are supposed to occasion in forming the long quantity. Thus we are to pronounce *manus* as if written *pay-nus*, or as we always hear the word *panis* (bread); for in this sound of *pannus* there seems to be no necessity for pronouncing the two consonants distinctly or separately, which he seems to mean by distinctly, because the quantity is shown by the long sound of the vowel: but if by distinctly he means

separately, that is, as if what is called in French the *chêva* or mute *e* were to follow the first consonant, this could not be done without adding a syllable to the word, and the word *pannus* would in that case certainly have three syllables, as if written *pan-eh-nus*.—*See Observations on the Greek and Latin Accent and Quantity*, sect. 24.

‡ That is, in the general pronunciation of Greek; for, let the written accent be placed where it will, the *quantitative* accent, as it may be called, follows the analogy of the Latin.

§ "The Greek language," says the learned critick, "was happy in not being understood by the Goths, who would as certainly have corrupted the *τ* in *αἰρία, ὄριον*, &c., into *αἰαία, ὠριον*, &c. as they did the Latin *motio* and *docco* into *moshio* and *doshco*." This, however, may be questioned; for if, in Latin words, this impure sound of *t* takes place only in those words where the accent is on the pre-

* Ainsworth on the letter *T*.

ble was long, the accent could scarcely be higher than the penultimate; yet in our pronunciation of Greek, and particularly of proper names, the Latin analogy of the accent is adopted; and, though the last syllable is long in *Demosthenes*, *Aristophanes*, *Theramenes*, and *Deiphobe*, yet, as the penultimate is short, the accent is placed on the antepenultimate, exactly as if they were Latin.*

As these languages have been long dead, they admit of no new varieties of accent like the living languages. The common accentuation of Greek and Latin may be seen in *Lexicons* and *Graduses*; and where the ancients indulged a variety, and the moderns are divided in their opinions about the most classical accentuation of words, it would be highly improper, in a work intended for general use, to enter into the thorny disputes of the learned; and it may be truly said, in the rhyming adage,

When doctors disagree,
Disciples then are free.

ceding vowel, as in *natio*, *facio*, &c., but not when the accent follows the *t*, and is on the following vowel, as in *satietas*, *societas*, &c., why should we suppose any other mode of pronunciation would have been adopted by the Goths in their pronouncing the Greek? Now, no rule of pronunciation is more uniform in the Greek language than that which places an acute accent on the *iota* at the end of words, when this letter is succeeded by a long vowel; and, consequently, if the accent be preserved upon the proper letter, it is impossible the preceding *t* and *s* should go into the sound of *sh*: why, therefore, may we not suppose that the very frequent accentuation of the penultimate *i* before a final vowel preserved the preceding *τ* from going into the sound of *sh*, as it was a difference of accentuation that occasioned this impure sound of *t* in the Latin language? for, though *i* at the end of words, when followed by a long vowel, or a vowel once long and afterwards contracted, had always the accent on it in Greek; in Latin the accent was always on the preceding syllable in words of this termination: and hence seems to have arisen the corruption of *t* in the Gothic pronunciation of the Latin language.

It is highly probable, that, in Lucian's time, the Greek *τ*, when followed by *i* and another vowel, had not assumed the sound of *σ*; for the sigma would not have failed to accuse him of a usurpation of her powers, as he had done of her character: and, if we have preserved the *τ* pure in this situation when we pronounce Greek, it is, perhaps, rather to be placed to the preserving power of the accented *i* in so great a number of words, than any adherence to the ancient rules of pronunciation, which invariably affirm, that the consonants had but one sound; unless we except the *γ* before *γ*, *κ*, *χ*, *ξ*; as *γγελος*,

This, however, has not been entirely neglected. Where there has been any considerable diversity of accentuation among our prosodists, I have consulted the best authorities, and have sometimes ventured to decide; though, as Labbe says, "Sed his de rebus, ut aliis multis, malo doctorum iudicium expectare, quam meam in medium proferre sententiam."

But the most important object of the present work is settling the *English quantity*, (see Rules 20, 21, 22,) with which we pronounce Greek and Latin proper names, and the sounds of some of the consonants. These are points in a state of great uncertainty, and are to be settled, not so much by a deep knowledge of the dead languages, as by a thorough acquaintance with the analogies and general usage of our own tongue. These must, in the nature of things, enter largely into the pronunciation of a dead language; and it is from an attention to these that the author hopes he has given to the publick a work not entirely unworthy of their acceptance.

ἀγκυρα, *ἀγκύρα*, κ. τ. λ. where the *γ* is sounded like *v*: but this, says Henry Stephens, is an error of the copyists, who have a little extended the bottom of the *v*, and made a *γ* of it; for, says he, it is ridiculous to suppose that *v* was changed into *γ*, and at the same time that *γ* should be pronounced like *v*. On the contrary, Scaliger says, that where we find a *v* before these letters, as *avkupa*, it is an error of the copyists, who imagined they better expressed the pronunciation by this letter; which, as Vossius observes, should seem to demand something particular and uncommon.

It is reported of Scaliger, that, when he was accosted by a Scotchman in Latin, he begged his pardon for not understanding him, as he had never learned the Scotch language. If this were the case with the pronunciation of a Scotchman, which is so near that of the continent, what would he have said to the Latin pronunciation of an Englishman? I take it, however, that this diversity is greatly exaggerated.

* This, however, was contrary to the general practice of the Romans; for Victorinus in his Grammar says, *Græca nomina, si iisdem literis proferuntur, (Latine versa) Græcos accentus habebunt*: nam cum dicimus *Thyas*, *Nais*, acutum habebit posterior accentum; et cum *Themistio*, *Calypso*, *Theano*, ultimam circumflecti videbimus, quod utrumque Latinus sermo non patitur, nisi admodum raro. "If Greek nouns turned into Latin are pronounced with the same letters, they have the Greek accent: for, when we say *Thyas*, *Nais*, the latter syllable has the acute accent; and when we pronounce *Themistio*, *Calypso*, *Theano*, we see the last syllable is circumflexed; neither of which is ever seen in Latin words, or very rarely." RULES

FOR PRONOUNCING THE VOWELS OF

GREEK AND LATIN PROPER NAMES.

1. EVERY vowel, with the accent on it, at the end of a syllable, is pronounced, as in English, with its first long open sound: thus *Cato*,* *Philomela*, *Ori'on*, *Pho'cion*, *Lu'cifer*, &c., have the accented vowels sounded exactly as in the English words *pa'per*, *me'tre*, *spi'der*, *no'ble*, *tu'tor*, &c.

2. Every accented vowel, not ending a syllable, but followed by a consonant, has the short sound as in English: thus *Man'tias*, *Pen'theus*, *Pin'darus*, *Col'chis*, *Cur'tius*, &c., have the short sound of the accented vowels, as in *man'ner*, *plen'ty*, *prin'ter*, *col'lar*, *cur'few*, &c.

3. Every final *i*, though unaccented, has the long open sound: thus the final *i* forming the genitive case, as in *magis'tri*, or the plural number, as in *De'cii*, has the long open sound, as in *vial*; and this sound we give to this vowel in this situation, because the Latin *i* final in genitives, plurals, and preterperfect tenses of verbs, is always long; and consequently, where the accented *i* is followed by *i* final, both are pronounced with the long diphthongal *i*, like the noun *eye*, as *Achi'vi*.†

4. Every unaccented *i*, ending a syllable not final, as that in the second of *Alci'biades*, the *Hern'ci*, &c., is pronounced like *e*, as if written *Alci'biades*, the *Hern'ci*, &c. So the last syllable but one of the *Fabi'i*, the *Horat'i*, the *Cur'iati*, &c., is pronounced as if written *Fa-be-i*, *Ho-ra-she-i*, *Cu-re-a-she-i*; and therefore, if the unaccented *i* and the diphthong *e* conclude a word, they are both pronounced like *e*, as *Harpy'ie*, *Har'py'-e-e*.

5. The diphthongs *æ* and *æ*, ending a syllable with the accent on it, are pronounced exactly like the long English *e*, as *Cæ'sar*, *Æ'ta*, &c., as if written *Cæ'sar*, *Æ'ta*, &c.; and like the short *e*, when followed by a consonant in the same syllable, as *Dæ'dalus*, *Æ'dipus*, &c., pronounced as if written *Dæ'dalus*, *Æ'dipus*, &c. The vowels *ei* are generally pronounced like long *i*.†—For the vowels *eu* in final syllables, see the word *IDOMENEUS*; and for the *ou* in the same syllables, see the word *ANTINOUS*, and similar words, in the *Terminational Vocabulary*.

6. *Y* is exactly under the same predicament as *i*. It is long when ending an accented syllable, as *Cy'rus*; or when ending an unaccented syllable, if final, as *Æ'ry*, *Æ'py*, &c.; short when joined to a consonant, in the same syllable, as *Lyc'i'das*; and sometimes long and sometimes short, when ending an initial syllable not under the accent, as *Lyc'cur'i-gus*, pronounced with the first syllable like *lie*, a falsehood; and *Lysimachus*, with the first syllable like the first of *legion*; or nearly as if divided into *Lys-im-a-chus*, &c. See *Principles of English Pronunciation*, No. 117, 118, &c., and 185, 186, 187.

7. *A*, ending an unaccented syllable, has the same obscure sound as in the same situation in English words; but it is a sound bordering on the Italian *a*, or the *a* in *fa'ther*, as *Dia'na*, where the difference between the accented and unaccented *a* is palpable. See *Principles*

of *English Pronunciation* [referred to the *Critical Pronouncing Dictionary*, No. 92, and the letter *A*.

8. *E* final, either with or without the preceding consonant, always forms a distinct syllable, as *Penelope*, *Hypocrene*, *Evoo*, *Amphitrite*, &c. When any Greek or Latin word is anglicised into this termination, by cutting off a syllable of the original, it becomes then an English word, and is pronounced according to our own analogy: thus *Acidalius*, altered to *Acidale*, has the final *e* sunk, and is a word of three syllables only: *Proserpine*, from *Proserpina*, undergoes the same alteration. *Thebes* and *Athens*, derived from the Greek *Θῆβη* and *Ἀθῆναι*, and the Latin *Thebæ* and *Athenæ*, are perfectly anglicised; the former into a monosyllable, and the latter into a dissyllable: and the Greek *Κρήνη* and the Latin *Creta* have both sunk into the English monosyllable *Crete*: *Hecate*, likewise, pronounced in three syllables when Latin, and in the same number in the Greek word *Ἑκάτη*, in English is universally contracted into two, by sinking the final *e*. Shakspeare seems to have begun, as he has now confirmed this pronunciation, by so adapting the word in *Macbeth*:

“Why, how now, Hecat? you look angrily.”—*Act IV.*

Perhaps this was no more than a poetical license in him; but the actors have adopted it in the songs in this tragedy:

“He-cate, He-cate, come away!”

And the play-going world, who form no small portion of what is called the better sort of people, have followed the actors in this word, and the rest of the world have followed them.

The Roman magistrate, named *ædilis*, is anglicised by pronouncing it in two syllables, *ædile*. The capital of Sicily, *Syracuse*, of four syllables, is made three in the English *Syracuse*; and the city of *Tyrrus*, of two syllables, is reduced to a monosyllable in the English *Tyre*.

Rules for pronouncing the Consonants of Greek and Latin Proper Names.

9. *C* and *g* are hard before *a*, *o*, and *u*, as *Cato*, *Comus*, *Cures*, *Galba*, *Gorgon*, &c.; and soft before *e*, *i*, and *y*, as *Cebes*, *Scipio*, *Scylla*, *Cinna*, *Geryon*, *Geta*, *Gillus*, *Gyges*, *Gymnosophista*, &c.‡

10. *T*, *s*, and *c*, before *ia*, *ie*, *ii*, *io*, *iu*, and *eu*, preceded by the accent, in Latin words, as in English, change into *sh* and *zh*, as *Tat'ion*, *Stati'us*, *Porti'us*, *Portia*, *Soci'as*, *Cadu'ceus*, *Acci'us*, *Helveti'i*, *Mas'ia*, *Her'siod*, &c., pronounced *Tashean*, *Sasheus*, *Porsheus*, *Porshea*, *Sosheas*, *Cadusheus*, *Aksheus*, *Helveshet*, *Mezhea*, *Hezhead*, &c. See *Principles of English Pronunciation*, No. 357, 450, 451, 459, 463. But, when the accent is on the first of the diphthongal vowels, the preceding consonant does not go

* This pronunciation of *Cato*, *Plato*, *Cleopatra*, &c., has been but lately adopted. Quin, and all the old dramatic school, used to pronounce the *a* in these and similar words like the *a* in *father*. Mr. Garrick, with great good sense, as well as good taste, brought in the present pronunciation, and the propriety of it has made it now universal.

† This is the true analogical pronunciation of this letter, when ending an accented syllable; but a most disgraceful affectation of foreign pronunciation has exchanged this full diphthongal sound for the meager, squeezed sound of the French and Italian *i*, not only in almost every word derived from those languages, but in many which are purely Latin, as *Faustina*, *Messalina*, &c. Nay, words from the Saxon have been equally perverted, and we hear the *i* in *Elfrida*, *Edwina*, &c., turned into *EL-freeda*, *ED-weena*, &c. It is true this is the sound the Romans gave to their *i*; but the speakers here alluded to are perfectly innocent of this, and do not pronounce it in this manner for its antiquity, but its novelty.

‡ See *ELEGEIA*, *HYGEIA*, &c., in the *Terminational Vocabulary of Greek and Latin Proper Names*.

§ That this general rule should be violated by smatterers in the learned languages, in such words as *gymnastic*, *heterogeneous*, &c., is not to be wondered at; but that men of real learning, who do not want to show themselves off to the vulgar by such inuendoes of their erudition, should give into this irregularity, is really surprising. We laugh at the pedantry of the age of James the First, where there is scarcely a page in any English book, that is not sprinkled with twenty Greek and Latin quotations; and yet do not see the similar pedantry of interlarding our pronunciation with Greek and Latin sounds; which may be affirmed to be a greater perversion of our language than the former. In the one case, the introduction of Greek and Latin quotations does not interfere with the English phraseology; but in the other the pronunciation is disturbed, and a motley jargon of sounds introduced as inconsistent with true taste as it is with neatness and uniformity.

RULES FOR PRONOUNCING GREEK AND LATIN PROPER NAMES.

into *sh*, but preserves its sound pure, as *Miltiades*, *Antisthenes*, &c. See the word *SATIETY*, in the *Critical Pronouncing Dictionary*.

11. *T* and *s*, in proper names, ending in *tia*, *sia*, *cyon*, and *sion*, preceded by the accent, change the *t* and *s* into *sh* and *zh*. Thus *Phocion*, *Sicyon*, *Cercyon*, are pronounced exactly in our own analogy, as if written *Phoshcan*, *Sishean*, and *Sershean*: *Artemisia* and *Aspasia* sound as if written *Artemisheea* and *Aspuzheea*: *Galatia*, *Aratia*, *Alotia*, and *Battia*, as if written *Galasheea*, *Arasheea*, *Alo-sheea*, and *Basheea*: and if *Atia*, the town in Campania, is not so pronounced, it is to distinguish it from *Asia*, the eastern region of the world. But the termination *sion* (of which there are not even twenty examples in proper names throughout the whole Greek and Latin languages) seems to preserve the *t* from going into *sh*, as the last remnant of a learned pronunciation; and to avoid, as much as possible, assimilating with so vulgar an English termination: thus, though *Æsion*, *Jasion*, *Dionysion*, change the *s* into *z*, as if written *Æzion*, *Jazion*, *Dionizion*, the *z* does not become *zh*: but *Philistion*, *Gratation*, *Eurytion*, *Dotion*, *Androktion*, *Hippotion*, *Iphition*, *Orryktion*, *Motion*, *Polyktion*, *Stratotion*, *Sotition*, *Æantion*, *Pallantion*, *Ætion*, *Hippocratotion*, and *Amphicytion* preserve the *t* in its true sound: *Hephastion*, however, from the frequency of appearing with Alexander, has deserted to the small class of his Greek companions, and joined the English multitude, by rhyming with *question*; and *Tatian* and *Theodotion* seem perfectly anglicised. With very, very few exceptions, therefore, it may be concluded, that Greek and Latin proper names are pronounced alike, and that both of them follow the analogy of English pronunciation.

12. *Ch*. These letters before a vowel are always pronounced like *k*, as *Chabrias*, *Colchis*, &c.; but when they come before a mute consonant at the beginning of a word, as in *Chthonia*, they are mute, and the word is pronounced as if written *Thonia*. Words beginning with *Sche*, as *Schedius*, *Scheria*, &c., are pronounced as if written *Skedius*, *Sheria*, &c.; and *c* before *n* in the Latin prænomens *Cneus* or *Cneus*, is mute; so in *Cnopus*, *Cnosus*, &c., and before *t* in *Cteutus*, and *g* before *n* in *Gnidus*; pronounced *Nopus*, *Nosus*, *Teatus*, and *Nidus*.

13. At the beginning of Greek words we frequently find the uncombinable consonants *mn*, *tm*, &c., as *Mnemiosyne*, *Mnesidamus*, *Mneus*, *Mnesteus*, *Timolus*, &c. These are to be pronounced with the first consonant mute, as if written *Mnemiosyne*, *Mnesidamus*, *Mneus*, *Nesteus*, *Molus*, &c., in the same manner as we pronounce the words *bellum*, *pneumatick*, *gnomon*, *mnemonicks*, &c., without the initial consonant. The same may be observed of the *c* hard like *k*, when it comes before *t*, as *Ctesiphon*, *Ctesipus*, &c. Some of these words we see sometimes written with an *e* or *i* after the first consonant, as *Menesteus*, *Timolus*, &c., and then the initial consonant is pronounced.

14. *Ph*, followed by a consonant, is mute, as *Phthia*, *Phthiotis*, pronounced *Thia*, *Thiotis*, in the same manner as the naturalized Greek word *Phisitick*, pronounced *Tisitick*.

15. *Ps*: *p* is mute also in this combination, as *Psyche*, *Psammetichus*, &c., pronounced *Syke*, *Sammeticus*, &c.

16. *Pt*: *p* is mute in words beginning with these letters, when followed by a vowel, as *Ptolemy*, *Pterilas*, &c., pronounced *Tolomy*, *Terilas*, &c.: but when followed by *l*, the *t* is heard, as in *Ptolemaeus*: for, though we have no words of our own with these initial consonants, we have many words that end with them, and they are certainly pronounced. The same may be observed of the *z* in *Zimelaces*.

17. The letters *s*, *z*, and *z*, require but little observation, being generally pronounced as in pure English words. It may, however, be remarked, that *s*, at the end of words, preceded by any of the vowels but *e*, has its pure hissing sound; as *mas*, *dis*, *os*, *mus*, &c.: but when *e* precedes, it goes into the sound of *z*, as *pes*, *Thersites*, *vates*, &c. It may also be observed, that, when it ends a word preceded by *r* or *n*, it has the sound of *z*. Thus the letter *s* in *mens*, *Mars*, *mors*, &c., has the same sound as in the English words *hens*, *stars*, *wars*, &c. *X*, when beginning a word or syllable, is pronounced like *z*; as *Xerxes*, *Xenophon*, &c., are pronounced *Zerkses*, *Zenophon*, &c. *Z* is uniformly pronounced as in English words: thus the *z* in *Zeno* and *Zeugma* is pronounced as we hear it in *zeal*, *zone*, &c.

Rules for ascertaining the English Quantity of Greek and Latin Proper Names.

18. It may at first be observed, that, in words of two syllables, with but one consonant in the middle, whatever be the quantity of the vowel in the first syllable in Greek or Latin, we always make it long in English: thus *Crates*,

the philosopher, and *crates*, a hurdle; *decus*, honour, and *dado*, to give up; *ovo*, to triumph, and *ovum*, an egg; *Muma*, the legislator, and *Mumen*, the divinity, have the first vowel always sounded equally long by an English speaker, although in Latin the first vowel in the first word of each of these pairs is short.*

19. On the contrary, words of three syllables, with the accent on the first, and with but one consonant after the first syllable, have that syllable pronounced short, let the Greek or Latin quantity be what it will: thus *regulus* and *remora* *micimus* and *minium*, are heard with the first vowel short in English pronunciation, (though the first word of each pair has its first syllable long in Latin:) and the *u* in *fumigo* and *fugio* is pronounced long in both words, though in Latin the last *u* is short. This rule is never broken but when the first syllable is followed by *s* or *i* followed by another vowel: in this case the vowel in the first syllable is long, except that vowel be *i*: thus *lamia*, *genius*, *Libya*, *doceo*, *cupio*, have the accent on the first syllable, and this syllable is pronounced long in every word but *Libya*, though in the original it is equally short in all.

20. It must have frequently occurred to those who instruct youth, that, though the quantity of the accented syllable of long proper names has been easily conveyed, yet that the quantity of the preceding unaccented syllables has occasioned some embarrassment. An appeal to the laws of our own language would soon have removed the perplexity, and enabled us to pronounce the initial unaccented syllables with as much decision as the others. Thus every accented antepenultimate vowel but *u*, even when followed by one consonant only, is, in our pronunciation of Latin, as well as in English, short: thus *fabula*, *separo*, *diligo*, *nobilis*, *excumis*, have the first vowels pronounced as in the English words *capital*, *celebrate*, *simony*, *solitude*, *luculent*, in direct opposition to the Latin quantity, which makes every antepenultimate vowel, in all these words but the last, long; and this *e* pronounce long, though short in Latin. But, if a semi-consonant diphthong succeed, then every such vowel is long but *i*, in our pronunciation of both languages; and *Euganeus*, *Eugenia*, *filius*, *folium*, *dubia*, have the vowel in the antepenultimate syllable pronounced exactly as in the English words *satiare*, *menial*, *delirious*, *notorious*, *penurious*; though they are all short in Latin but the *i*, which we pronounce short, though in the Latin it is long.

21. The same rule of quantity takes place in those syllables which have the secondary accent: for, as we pronounce *lamentation*, *demonstration*, *diminution*, *domination*, *lucubration*, with every vowel in the first syllable short but *u*, so we pronounce the same vowels in the same manner in *lamentatio*, *demonstratio*, *diminutio*, *dominatio*, and *lucubratio*: but, if a semi-consonant diphthong succeed the secondary accent, as in *Ariovistus*, *Heliodorus*, *Gabinianus*, *Herodianus*, and *Volusianus*, every vowel preceding the diphthong is long but *i*; just as we should pronounce these vowels in the English words *ambability*, *mediatation*, *propitiation*, *exortation*, *centuriator*, &c. For the nature of the secondary accent, see *Principles of English Pronunciation*, No. 544.

22. But, to reduce these rules into a smaller compass, that they may be more easily comprehended and remembered, it may be observed, that, as we always shorten every antepenultimate vowel with the primary accent but *u*, unless followed by a semi-consonant diphthong, though this antepenultimate vowel is often long in Greek and Latin, as *Æschylus*, *Æschines*, &c., and the antepenultimate *i*, even though it be followed by such a diphthong, as *Eleusinia*, *Ocrisia*, &c.,—so we shorten the first syllable of *Æsculapius*, *Ænobarbus*, &c., because the first syllable of both these words has the secondary accent: but we pronounce the same vowels long in *Æthiopia*, *Ægialeus*, *Haliartus*, &c., because this accent is followed by a semi-consonant diphthong.

23. This rule sometimes holds good where a mute and liquid intervene, and determines the first syllable of *Adrianus*, *Adriatick*, &c., to be long like *ay*, and not short like *add*: and it is on this analogical division of the words, so little understood or attended to, that a perfect and a consistent pronunciation of them depends. It is this analogy that determines the first *u* to be long in *stupidus*, and the *y* short in *clypea*, though both are short in the Latin; and the *o* in the first syllable of *Coriolanus*, which is short in Latin, to be long in English.

24. The necessity of attending to the quantity of the vowel in the accented syllable has sometimes produced a division of words in the following Vocabulary that does not seem to convey the actual pronunciation. Thus the words *Sulpitius*, *Anicurus*, *Artemisium*, &c., being divided into *Sulpi-i-us*, *Ani-i-cu-rus*, *Ar-te-mis-i-um*, &c., we fancy the syllable after the accent deprived of a consonant closely united with it in sound, and which, from such a

* The only word occurring to me at present, where this rule is not observed, is *canon*, a rule, which is always

pronounced like the word *cannon*, a piece of ordnance.

RULES FOR PRONOUNCING GREEK AND LATIN PROPER NAMES.

union, derives an aspirated sound, equivalent to *sh*. But, as the sound of *t*, *c*, or *s*, in this situation, is so generally understood, it was thought more eligible to divide the words in this manner, than into *Sul-pi-ti-us*, *Ani-ci-um*, *Ar-te-mi-si-um*, as, in the latter mode, the *i* wants its shortening consonant, and might, by some speakers, be pronounced, as it generally is in Scotland, like *ee*. The same may be observed of *c* and *g*, when they end a syllable, and are followed by *e* or *i*, as in *Ac-c-ra-tus*, *Ac-i-da-li-a*, *Tig-el-li-us*, *Teg-y-ra*, &c.; where the *c* and *g* ending a syllable, we at first sight think them to have their hard sound; but, by observing the succeeding vowel, we soon perceive them to be soft, and only made to end a syllable in order to determine the shortness of the vowel which precedes.

25. The general rule, therefore, of quantity, indicated by the syllabication adopted in the Vocabulary, is, that, when a consonant ends a syllable, the vowel is always short, whether the accent be on it or not; and that, when a vowel ends a syllable with the accent on it, it is always long: that the vowel *u*, when it ends a syllable, is long, whether the accent be on it or not; and that the vowel *i*, (3,) (4,) when it ends a syllable without the accent, is pronounced like *e*; but, if the syllable be final, it has its long open sound, as if the accent were on it; and the same may be observed of the letter *y*.

Rules for placing the Accent of Greek and Latin Proper Names.

26. Words of two syllables, either Greek or Latin, whatever be the quantity in the original, have, in English pronunciation, the accent on the first syllable: and, if a single consonant come between two vowels, the consonant goes to the last syllable, and the vowel in the first is long: as *Cato*, *Ceres*, *Comus*, &c. See *Principles of English Pronunciation* No. 503, and the word *DRAMA*.

27. Polysyllables, adopted whole from the Greek or Latin into English, have generally the accent of the Latin: that is, if the penultimate be long, the accent is on it, as *Severus*, *Democedes*, &c.; if short, the accent is on the antepenultimate, as *Demosthenes*, *Aristophanes*, *Posthumus*, &c. See *Introduction*.

28. When Greek or Latin proper names are anglicised, either by an alteration of the letters, or by cutting off the latter syllables, the accent of the original, as in appellatives under the same predicament, is transferred nearer to the beginning of the word. Thus *Proserpina* has the accent on the second syllable; but, when altered to *Proserpine*, it transfers the accent to the first. The same may be observed of *Homerus*, *Virgilius*, *Horatius*, &c., when anglicised to *Homer*, *Virgil*, *Horace*, &c. See the word *ACADEMY*, in the *Critical Pronouncing Dictionary*.

29. As it is not very easy, therefore, so it is not necessary, to decide where doctors disagree. When reasons lie deep in Greek and Latin etymology, the current pronunciation will be followed, let the learned do all they can to hinder it: thus, after *Hyperion* has been accented by our best poets, according to our own analogy, with the accent on the antepenultimate, as Shakespeare:

"Hyperion's curls, the front of Jove himself." *Hamlet*.

"——— that was to this

"Hyperion to a satyr."—*Ibid*.

"——— next day after dawn,

"Doth rise and help Hyperion to his horse."—*Hen. V*.

So Cooke, in his translation of *Hesiod's Theogony*, follows the accentuation of Shakespeare:

"Hyperion and Japhet, brothers, join:

"Thea and Rhea of this ancient line

"Descend; and Themis boasts the source divine." }

"The fruits of Thia and Hyperion rise,

"And with refulgent lustre light the skies."

After this established pronunciation, I say, how hopeless, as well as useless, would it be to attempt the penultimate accentuation, which yet ought, undoubtedly, to be preserved in reading or speaking Greek or Latin compositions; but, in reading or speaking English, must be left to those who would rather appear learned than judicious. But *Acirion*, *Arion*, *Amphion*, *Echion*, *Orion*, *Ixion*, *Pandion*, *Asion*, *Alphion*, *Erion*, *Ophion*, *Methion*, *Arion*, *Eion*, *Thlecion*, and *Sandion*, preserve their penultimate accent invariably: while *Ethalion*, a word of the same form and origin, is pronounced with the accent on the antepenultimate, like *Deucalion* and *Pygmalion*: and this, if I mistake not, is the common pronunciation

of a ship in the British navy, so called from the name of one of the Argonauts, who accompanied Jason in his expedition to Colchis to fetch the golden fleece.

30. The same difficulty of deciding between common usage and classical propriety, appears in words ending in *ia*, as *Alexandria*, *Antiochia*, *Seleucia*, *Samaria*, *Iphigenia*, and several others, which were pronounced by our ancestors, as appears from their poetry, according to our own analogy, with the accent on the antepenultimate syllable; and there is no doubt but every word of this form would have fallen into the same accentuation, if classical criticism had not stepped in and prevented it. A philosophical grammarian would be apt to think we are not much obliged to scholars for this interruption of the vernacular current of pronunciation; but, as there is so plausible a plea as that of reducing words to their original languages, and as a knowledge of these languages will always be an honourable distinction among men, it is strongly to be suspected, that these words will not long continue in their plain homespun English dress. This critical correction, however, seems to have come too late for some words, which, as Pope expresses it, have "slid into verse," and taken possession of our ears: and therefore, perhaps, the best way of disposing of them will be to consider them as the ancients did the quantity of certain doubtful syllables, and to pronounce them either way. Some, however, seem always to have preserved the accent of their original language, as *Thalia* and *Sophia*: but *Iphigenia*, *Antiochia*, *Seleucia*, and *Samaria*, have generally yielded to the English antepenultimate accent; and *Erythra*, *Deidamia*, *Laodamia*, *Hippodamia*, *Apamia*, *Iuthia*, and *Orithyia*, from their seldom appearing in mere English composition, have not often been drawn aside into plain English pronunciation. The same may be observed of words ending in *niceus* or *nice*: if they are compounded of the Greek *νικη*, the penultimate syllable is always long, and must have the accent, as *Stratoniceus*, *Berenice*, &c.: if this termination be what is called a gentile, signifying a man by his country, the penultimate is short, and the accent is on the antepenultimate; as *Macedoniceus*, *Sardoniceus*, *Britanniceus*, &c. See *ANDRONICUS*.

31. Thus we see many of these proper names are of dubious accentuation: and the authorities which may be produced on both sides sufficiently show us the utility of criticising beyond a certain point. It is in these as in many English words: there are some which, if mispronounced, immediately show a want of education; and there are others which, though not pronounced in the most erudite manner, stamp no imputation of ignorance or illiteracy. To have a general knowledge, therefore, of the pronunciation of these words, seems absolutely necessary for those who would appear respectable in the more respectable part of society. Perhaps no people on earth are so correct in the accentuation of proper names as the learned among the English. The Port-Royal Grammar informs us, that, "notwithstanding all the rules that can be given, we are often under the necessity of submitting to custom, and of accommodating our pronunciation to what is received among the learned, according to the country we are in." "So we pronounce," says the grammarian, "*Aristobulus*, *Basilus*, *Idolium*, with the accent on the antepenultimate, though the penultimate is long, because it is the custom: and, on the contrary, we pronounce *Andre'as*, *ide'a*, *Mari'a*, &c., with the accent on the penultimate, though it is short, because it is the custom of the most learned. The Italians," continues he, "place the accent on the penultimate of *antonasi'a*, *harmoni'a*, *philosophi'a*, *theologi'a*, and similar words, according to the Greek accent, because, as Riccioli observes, it is the custom of their country. Alvarez and Gretser think we ought always to pronounce them in this manner, though the custom, not only of Germany and Spain, but of all France, is against it: but Nebrisensis authorizes this last pronunciation, and says, that it is better to place the accent of these vowels on the antepenultimate syllable; which shows," concludes the grammarian, "that, when we once depart from the ancient rules, we have but little certainty in practice, which is so different in different countries."

But, however uncertain and desultory the accentuation of many words may be, it is a great satisfaction to a speaker to know that they are so. There is a wide difference between pronouncing words of this kind ignorantly and knowingly. A person, who knows that scholars themselves differ in the pronunciation of these words, can always pronounce with security: but one, who is unacquainted with the state of the accent, is not sure that he is right when he really is so, and always pronounces at his peril.

* * It is hoped the candid peruser of this work will make allowances for an occasional error in dividing a syllable or placing an accent, when he reflects on the difficulty with which such a work must necessarily be at-

tended. The author flatters himself, however, that such attention has been paid both to the compilation and the proofs, that the fewest errors imaginable have escaped him.

PRONUNCIATION

OF

GREEK AND LATIN PROPER NAMES.

INITIAL VOCABULARY.

* * When a word is succeeded by a word printed in Italicks, the latter word is merely to spell the former as it ought to be pronounced. Thus *A-ban'-she-as* is the true pronunciation of the preceding word *A-ban'-ti-as*: and so of the rest.

* * The figures annexed to the words refer to the Rules prefixed to the work. Thus the figure 3 after *A-chæ-i* refers to Rule the 3d, for the pronunciation of the final i; and the figure 4 after *A'-bi-i* refers to Rule

the 4th, for the pronunciation of the unaccented i, not final: and so of the rest.

* * When the letters *Eng.* are put after a word, it is to show that this word is the preceding word anglicised. Thus *Lu'-can*, *Eng.* is the Latin word *Lu-ca'-nus*, changed into the English *Lucan*.

[The letter (a) annexed to a word, refers the reader to *Notices respecting Walker's Pronunciation of several Words*, found on page 1134.]

* Every a ending a syllable, with the accent upon it, is pronounced like the a in the English words *fa-vour*, *ta-per*, &c. See Rule the 1st prefixed to this Vocabulary.

† Every unaccented a, whether initial, medial, or final, ending a syllable, has an obscure sound, bordering on the a in *father*. See Rule the 7th, prefixed to this Vocabulary.

‡ *Achabytos*.—Ch, in this and all the subsequent words,

have the sound of k. Thus *Achabytos*, *Achea*, *Achates* &c., are pronounced as if written *Åkabytos*, *Åkea*, *Åkates*, &c. See Rule the 12th.

§ *Æa*.—The diphthong is merely ocular, for the a has no share in the sound, though it appears in the type. Indeed, as we pronounce the æ, there is no middle sound between that letter and e, and therefore we have adopted

the last vowel, and relinquished the first. This, among other reasons, makes it probable that the Greeks and Romans pronounced the *a* as we do in *water*, and the *e* as we hear it in *where* and *there*; the middle or mixt sound, then, would be like *a* in *father*, which was probably the sound they gave to this diphthong.

* *Ægis*.—This diphthong, though long in Greek and Latin, is in English pronunciation either long or short, according to the accent or position of it. Thus, if it immediately precedes the accent, as in *Ægeus*, or with the accent on it, before a single consonant, in a word of two syllables, it is long, as in *Ægis*; before two consonants it is short, as in *Ægles*; or before one only, if the accent be on the antepenultimate, as in *Æropus*.—For the exceptions to this rule, see Rule 22.

† One of the generals of Valentinian the Third; which, Labbe tells us, ought properly to be written *Ætius*; that is without the diphthong. We may observe, that, as this

word comes from the Greek, but is latinized, it is pronounced with the *t* like *sh*, as if written *Æshius*; but the preceding word *Ætion*, being pure Greek, does not conform to this analogy.—See Rule the 11th and 29th.

‡ *Alcinous*.—There are no words more frequently mispronounced by a mere English scholar than those of this termination. By such a one we sometimes hear *Alcinous* and *Antinous* pronounced in three syllables, as if written *Al-ci-nouz* and *An-ti-nouz*, rhyming with *vows*; but classical pronunciation requires that these vowels should form distinct syllables.

§ *Aleius Campus*.—

“Least from this flying steed unrein'd, (as once
“Bellerophon, though from a lower clime,
“Dismounted, on th' *Aleian* field I fall,
“Erroneous there to wander, and forlorn.”

* *Alexander*.—This word is as frequently pronounced with the accent on the first as on the third syllable.

† *Amphigenia*.—See *IPHIGENIA*, and Rule 30, prefixed to this Vocabulary.

‡ This epithet, from the Greek *αναδω*, *emergens*, signifying rising out of the water, is applied to the picture of Venus rising out of the sea, as originally painted by Apelles. I doubt not that some, who only hear this word, without seeing it written, suppose it to mean *Anno Domini*, the year of our Lord.

§ *Andronicus*.—This word is uniformly pronounced by our prosodists with the penultimate accent; and yet, soaverse is an English ear to placing the accent on the penultimate i, that by all English scholars we hear it placed

upon the antepenultimate syllable. That this was the pronunciation of this word in Queen Elizabeth's time, appears plainly from the tragedy of *Titus Andronicus*, said to be written by Shakspeare; in which we every where find the antepenultimate pronunciation adopted. It may indeed be questioned, whether Shakspeare's learning extended to a knowledge of the quantity of this Greco-Latin word; but, as Mr. Steevens has justly observed, there is a greater number of classical allusions in this play than are scattered over all the rest of the performances on which the seal of Shakspeare is indubitably fixed; and therefore it may be presumed, that the author could not be ignorant of the Greek and Latin pronunciation of this word, but followed the received English pronunciation of his time; and which, by all but professed scholars, is still continued.—See ΣΟΦΗΚΟΝΙΣ

* *Antiochia*.—For words of this termination, see *IR-IGENIA*, and No. 30 of the Rules prefixed to this Vocabulary.

† *Apotheosis*.—When we are reading Latin or Greek, this word ought to have the accent on the penultimate syllable; but in pronouncing English we should accent the antepenultimate:

"Allots the prince of his celestial line
"An *apothéosis* and rites divine."—*Garth*.

‡ *Arbaces*.—Lempriere, Gouldman, Gesner, and Littleton, accent this word on the first syllable, but Ainsworth and Holyoke on the second; and this is so much more agreeable to an English ear, that I should prefer it, though I have, out of respect to authorities, inserted the other, that the reader may choose which he pleases. Labbe has not got this word.

§ *Arbela*, the city of Assyria, where the decisive battle was fought between Alexander and Darius, and the city in Palestine of that name, have the accent on the penul-

timate; but *Arbela*, a town in Sicily, has the accent on the antepenultimate syllable.

|| *Archidamus*.—Ainsworth, Gouldman, Littleton, and Holyoke, place the accent on the antepenultimate syllable of this word, but Lempriere and Labbe on the penultimate. I have followed Lempriere and Labbe, though, in my opinion, wrong; for, as every word of this termination has the antepenultimate accent, as *Polydamas*, *Theodamas*, &c., I know not why this should be different, though Labbe tells us, that the learned are of his opinion.

¶ *Areopagus*.—Labbe tells us, that the penultimate syllable of this word is, beyond all controversy, short,—quidquid nonnulli in tantâ luce etiamnum æcuciant.—Some of these blind men are, Gouldman, Holyoke, and Littleton;—but Lempriere and Ainsworth, the best authorities, agree with Labbe.

** *Argives*.—I have observed a strong propensity in school-boys to pronounce the *g* in these words hard, as in the English word *give*. This is, undoubtedly, because their masters do so; and they will tell us, that the Greek

gamma should always be pronounced hard in words from that language. What, then, must we alter that long catalogue of words where this letter occurs, as in *Genesis, genius, Diogenes, Egyptus, &c.*? The question answers itself.

* *Araces*.—Gouldman, Lempriere, Holyoke, and Labbe, accent this word on the first syllable, and unquestionably not without classical authority; but Ainsworth, and a still greater authority, general usage, have, in my opinion, determined the accent of this word on the second syllable.

† *Artemis*.—

"The sisters to Apollo tune their voice,
"And, *Artemis*, to thee whom darts rejoice."

Cooke's *Hesiod. Theog.* v. 17.

† *Artemita*.—Ainsworth places the accent on the antepenultimate syllable of this word; but Lempriere, Gouldman, and Holyoke, more correctly, in my opinion, on the penultimate.

§ *Atrebatas*.—Ainsworth accents this word on the antepenultimate syllable; but Lempriere, Gouldman, Holyoke, and Labbe, on the penultimate; and this is, in my opinion, the better pronunciation.

* *Bellerus*.—Ali our lexicographers unite in giving this word the antepenultimate accent; but Milton seems to have sanctioned the perultimate, as much more agreeable to English ears, in his *Lycidas*:

“Or whether thou, to our moist vows denied,
“Sleep’st by the fable of *Bellerus* old.”

Though it must be acknowledged that Milton has in this word deserted the classical pronunciation, yet his author-

ity is sufficient to make us acquiesce in his accentuation in the above-mentioned passage.

† *Bianor*.—Lempriere accents this word on the first syllable: but Labbe, Ainsworth, Gouldman, and Holyoke, on the second; and these agree with Virgil, *Ecl. ix. v. 60*.

† *Britones*.—Labbe tells us, that this word is sometimes pronounced with the penultimate accent, but more frequently with the antepenultimate.

* Candace.—Lempriere, Labbe, and Ainsworth, accent this word on the first syllable, but Gouldman and Holyoke on the second; and I am much mistaken if the

general ear has not sanctioned this latter pronunciation, and given it the preference.

* *Chabes*.—The *ch* in this, and all words from the Greek and Latin, must be pronounced like *k*.
† *Charmione*.—Dryden, in his tragedy of *All for Love*, has anglicised this word into *Charmion*;—the *ch* pronounced as in *charm*.

† *Chrysaor*.—

"Then started out, when you began to bleed,
The great *Chrysaor*, and the gallant steed."
Cooke's *Hædod*, *Thæog*

* *Cleomenes*.—There is an unaccountable caprice in Dryden's accentuation of this word, in opposition to all prosody; for, through the whole tragedy of this title, he places the accent on the penultimate instead of the antepenultimate syllable.

† *Cleopatra*.—The learned editor of Labbe tells us, this word ought to be pronounced with the accent on the antepenultimate, *Cle-op'-a-tra*, though the penultimate accentuation, he says, is the more common.

† *Cnacadium*.—*C* before *n*, in this and the succeeding words, is mute; and they must be pronounced as if written *Nacadium*, *Nacalis*, &c.

§ *Collina*.—Lempriere accents this word on the antepenultimate; but Ainsworth, Gouldman, and Holyoke, more properly, on the penultimate.

|| *Colotes*.—Ainsworth and Lempriere accent this word on the antepenultimate syllable; but Labbe, Gouldman and Holyoke, more agreeably to the general ear, on the penultimate.

* See IPHIGENIA.—

"Neptune, who shakes the earth, his daughter gave,
"Cymopolia, to reward the brave."

Cooke's Hesiod. Theog. v. 1132.

† Cytherea.—

"Behold a nymph arise, divinely fair,
"Whom to Cythera first the surges bear,

"And Aphrodite, from the foam, her name,
"Among the race of gods and men the same;
"And Cythera from Cythera came."

Cooke's Hesiod. Theog. v. 299

‡ Cytheris.—

— Mere poetry —

"Your Roman wits, your Gallus and Tibullus
"Have taught you this from Cytheris and Delia."

1074 Dryden, All for Love

* *Delphi*.—This word was, formerly, universally written *Delphes*; till Mr. Cumberland, a gentleman no less remarkable for his classical erudition than his dramatick abilities, in his *Widow of Delphi*, rescued it from the vulgarity in which it had been so long involved.

† *Diomedes*.—All words ending in *edes* have the same accentuation; as *Archimedes*, *Diomedes*, &c. The same

may be observed of words ending in *icles* and *ocles*, as *Iphicles*, *Damocles*, *Androcles*, &c. See the *Terminational Vocabulary*.

‡ *Dioscorus*.—An heresiarch of the fifth century.

§ *Dioscuri*.—The name given to Castor and Pollux, from the Greek *Διός* and *Κῆρος*, pro *Kēpos*, the sons of Jove.

* *Eridanus*.—"Alpheus and *Eridanus* the strong,

"That rises deep, and stately rolls along."

Cooke's *Hesiod. Theog.* v. 520.† *Erythea*.—

"Chrysæor, Love the guide, Calliræe led,

"Daughter of Ocean, to the genial bed,

"Whence Geryon sprung, fierce with his triple head; }
"Whom Hercules laid breathless on the ground
"In *Erythea*, which the waves surround."Cooke's *Hesiod. Theog.* v. 525

† *Eumenes*.—It is not a little surprising that so elegant a writer as Hughes should, throughout the whole tragedy of the *Siege of Damascus*, account this word on the penultimate syllable; especially as there is not a single proper name, of more than two syllables, in the Greek or Latin languages, of this termination, which has the penultimate syllable long.—Lee has done the same in the tragedy of *Alexander*, which would lead us to suppose there is something naturally repugnant to an English ear in the antepenultimate accentuation of these words, and something agreeable in the penultimate.

* *Euthalia*.—Labbe observes, that this word does not come from the muse *Thalia*, as some suppose, but from the masculine *Euthalios*, as *Eulalia*, *Eumenia*, *Eustolia*, *Eutropia*, *Emmelia*, &c., which are professedly accented on the antepenultimate.—See Rule 29.

† *Garganus*.—

“And high *Garganus*, on the Apulian plain,
“Is mark'd by sailors from the distant main.”

Wilkie, *Epigoniad*.

† *Granicus*.—As Alexander's passing the river *Granicus* is a common subject of history, poetry, and painting, it is not wonderful that the common ear should have given into a pronunciation of this word more agreeable to English analogy than the true classical accent on the penultimate syllable. The accent on the first syllable is now so fixed as to make the other pronunciation savour of pedantry.—See *ANDRONICUS*.

* *Hegemon*.—Gouldman and Holyoke accent this word on the antepenultimate syllable, but Labbe and Lempriere, more classically, on the penultimate.

† *Heligabalus*.—This word is accented on the penultimate syllable by Labbe and Lempriere; but, in my opinion, more agreeably to the general ear, by Ainsworth, Gouldman, and Holyoke, on the antepenultimate.

‡ *Heraclitus*.—This name of the weeping philosopher is so frequently contrasted with that of Democritus, the laughing philosopher that we are apt to pronounce both with the same accent; but all our prosodists are uniform in giving the antepenultimate accent to the latter, and the penultimate to the former word.

§ *Hippocrene*.—Nothing can be better established than the pronunciation of this word in four syllables, according to its original; and yet, such is the license of English poets, that they not unfrequently contract it to three. Thus Cooke, *Hesiod*, *Theog.* v. 9.

"And now to *Hippocrene* resort the fair;
"Or, Olmius, to thy sacred spring repair."

And a late translator of the Satires of Perseus:

"Never did I so much as sip,
"Or wet with *Hippocrene* a lip."

This contraction is inexcusable, as it tends to embarrass pronunciation, and lower the language of poetry.

* *Hybreas*.—Lempriere accents this word on the penultimate syllable; but Labbe, Gouldman, and Holyoke, more properly, on the antepenultimate.

† *Iapetus*.—

"Son of *Iâpetus*, o'er-subtle go

"And glory in thy artful theft below."

Cooke's Hesiod.

† *Idea*.—This word, as a proper name, I find in no lexicographer but Lempriere.

The English appellation, signifying an image in the mind, has uniformly the accent on the second syllable, as in the Greek *idea*, in opposition to the Latin, which we generally follow in other cases, and which, in this word, has the penultimate short, in Ainsworth, Labbe, and our best prosodists; and, according to this analogy, *idea* ought to have the accent on the first syllable, and that syllable short, as the first of *idiot*. But when this word is a proper name, as the daughter of Dardanus, I should suppose it ought to fall into the general analogy of pronouncing Greek names, not by accent, but by quantity; and, therefore, that it ought to have the accent on the first syllable; and, according to our own analogy, that syllable ought to be short, unless the penultimate in the Greek is a diphthong, and then, according to general usage, it ought to have the accent.

§ *Idomeneus*.—The termination of nouns in *eus* was, among the ancients, sometimes pronounced in two syllables,

and sometimes, as a diphthong, in one. Thus Labbe tells us, that *Achilleus*, *Agyleus*, *Phalaræus*, *Apsireus*, are pronounced commonly in four syllables, and *Nereus*, *Orpheus*, *Porteus*, *Teræus*, in three, with the penultimate syllable short in all; but that these words, when in verse, have generally the diphthong preserved in one syllable:

"Eumenidum veluti demens videt agmina Pentheus."
Virg.

He observes, however, that the Latin poets very frequently dissolved the diphthong into two syllables:

"Naiadum cæta, tantum non Orpheus Hebrum
"Pænaque respectus, et nunc manet Orpheus in te."

The best rule, therefore, that can be given to an English reader is, to pronounce words of this termination always with the vowels separated, except an English poet, in imitation of the Greeks, should preserve the diphthong; but, in the present word, I should prefer *I-dom-e-neus* to *I-dom-e-ne'-us*, whether in verse or prose.

|| See *IDOMENEUS*.

¶ *Imaus*.—All our prosodists make the penultimate syllable of this word short, and, consequently, accent it on the antepenultimate; but Milton, by a license he was allowed to take, accents it on the penultimate syllable:

"As when a vulture on *Imaus* bred,
"Whose snowy ridge the roving Tartar bounds."

* *Iphigenia*.—The antepenultimate syllable of this word had been in quiet possession of the accent for more than a century, till some Greekings of late have attempted to place the stress on the penultimate, in compliment to the original *Ἰφιγένεια*. If we ask our innovators on what principles they pronounce this word with the accent on the *i*, they answer, because the *i* stands for the diphthong *ei*, which, being long, must necessarily have the accent on it: but it may be replied, this was indeed the case in the Latin language, but not in the Greek, where we find a thousand long penultimates without the accent. It is true, one of the vowels which composed a diphthong in Greek, when this diphthong was in the penultimate syllable, generally had an accent on it, but not invariably; for a long penultimate syllable did not always attract the accent in Greek as it did in Latin. An instance of this, among thousands, is that famous line of dactyls in Homer's *Odyssey*, expressing the tumbling down of the stone of Sisyphus:

Ἀδ' τις ἔπειτα πέδιονος κυλινδέρω λᾶας ἀναιδός.—
Odys. b. 11.

Another striking instance of the same accentuation appears in the two first verses of the *Iliad*:

Μῆνιν ἄειδε θεὰ Πηληϊάδεω, Ἀχιλῆος
Οὐλομένην, ἣ μυρ' Ἀχαιοῖς ἄλγε' ἔθηκεν.

I know it may be said that the written accents we see on Greek words are of no kind of authority, and that we ought always to give accent to penultimate long quantity, as the Latins did. Not here to enter into a dispute about the authority of the written accents, the nature of the acute, and its connexion with quantity, which has divided the learned of Europe for so many years—till we have a clearer idea of the nature of the human voice, and the properties of speaking sounds, which alone can clear the difficulty—for the sake of uniformity, perhaps it were better to adopt the prevailing mode of pronouncing Greek proper names, like the Latin, by making the quantity of the penultimate syllable the regulator of the accent, though contrary to the genius of Greek accentuation, which made the ultimate syllable its regulator; and, if this syllable was long, the accent could never rise

higher than the penultimate. Perhaps in language, as in laws, it is not of so much importance that the rules of either should be exactly right, as that they should be certainly and easily known;—so the object of attention in the present case is not so much what ought to be done, as what actually is done;—and, as pedantry will always be more pardonable than *illiteracy*, if we are in doubt about the prevalence of custom, it will always be safer to lean to the side of the Greek or Latin than of our own language.

† *Iphimedia*.—This and the foregoing word have the accent on the same syllable, but for what reason cannot be easily conceived. That *Iphigenia*, having the diphthong *ei* in its penultimate syllable, should have the accent on that syllable, though not the soundest, is at least a plausible reason; but why should our prosodists give the same accent to the *i* in *Iphimedia*? which, coming from *φί* and *μείδω*, has no such pretensions. If they say it has the accent in the Greek word, it may be answered, this is not esteemed a sufficient reason for placing the accent in *Iphigenia*; besides, it is giving up the sheet-anchor of modern prosodists, the quantity, as the regulator of accent. We know it was an axiom in Greek prosody, that, when the last syllable was long by nature, the accent could not rise beyond the penultimate; but we know, too, that this axiom is abandoned in *Demosthenes*, *Aristoteles*, and a thousand other words. The only reason, therefore, that remains for the penultimate accentuation of this word, is, that this syllable is long in some of the best poets. Be it so. Let those, who have more learning and leisure than I have, find it out. In the interim, as this may perhaps be a long one, I must recur to my advice under the last word; though Ainsworth has, in my opinion, very properly left the penultimate syllable of both these words short, yet those, who affect to be thought learned, will always find their account in departing, as far as possible, from the analogy of their own language, in favour of Greek and Latin.

† *Lachesis*.—

"Clotho and Lachesis, whose boundless sway,

"With *Atropos* both men and gods obey."

Cooke's *Hesiod. Theog.* v. 335

* *Laomedea*.—

“Evagore, *Laomedea* join,
“And thou, Polynome, the num'rous line.

Cook's Hesiod. Theog. v. 399.

See *IPHIGENIA*.

† *Lasthenia*.—All the prosodists I have consulted, except Ainsworth, accent this word on the penultimate syllable; and, though English analogy would prefer the accent on the antepenultimate, we must necessarily yield to such a decided superiority of votes for the penultimate in a word so little anglicised by use.—See *IPHIGENIA*.

† *Leonatus*.—In the accentuation of this word I have followed Labbe and Lempriere: the former of whom says—*Quoniam de hac rore amplius cogitandum cum eruditus viris existimem.* Till, thea, these learned men

have considered this word, I think we may be allowed to consider it as formed from the Latin *leo* and *natus*. lion-born, and, as the *a* in *natus* is long, no shadow of reason can be given why it should not have the accent. This is the accentuation constantly given to it in the play of *Cymbeline*, and is, in my opinion, the best.

§ *Lucia*.—Labbe cries out loudly against those who accent this word on the penultimate, which, as a Latin word, ought to have the accent on the antepenultimate syllable. If once, says he, we break through rules, why should we not pronounce *Ammia*, *Anastasia*, *Cecilia*, *Leocadia*, *Natalia*, &c., with the accent on the penultimate likewise!—This ought to be a warning against our pronouncing the West-India island *St. Lucia*, as we sometimes hear it, *St. Luc'i-a*.

* *Lupercal*.—This word is so little interwoven with our language, that it ought to have its true Latin accent on the penultimate syllable. But wherever the antepenultimate accent is adopted in verse, as in Shakespeare's Julius Cæsar, where Antony says,

"You all did see that on the *Lupercal*
"I thrice presented him a kingly crown"—

we ought to preserve it.—Mr. Barry, the actor, who was

informed by some schoar of the Latin pronunciation of this word, adopted it in this place, and pronounced it *Lupercal*, which gratified every ear that heard him.

† *Maria*.—This word, says Labbe, derived from the Hebrew, has the accent on the second syllable; but when a Latin word, the feminine of *Marius*, it has the accent on the first.

* *Megara*.—I have in this word followed Labbe, Ainsworth, Gouldman, and Holyoke, by adopting the antepenultimate accent, in opposition to Lempriere, who accents the penultimate syllable.

† *Megaraeus*.—Labbe pronounces this word in four syllables, when a noun substantive; but Ainsworth marks it as a trisyllable, when a proper name; and, in my opinion, incorrectly.—See *Idomeneus*.

‡ *Melobosis*.—In this word I have given the preference to the antepenultimate accent, with Labbe, Gouldman, and Holyoke; though the penultimate, which Lempriere has adopted, is more agreeable to the ear.

§ *Mulucha*.—This word is accented on the antepenultimate by Labbe, Lempriere, and Ainsworth; and on the

penultimate by Gouldman and Holyoke. Labbe indeed says, *ut volueris*; and I shall certainly avail myself of this permission to place the accent on the penultimate; for, when this syllable ends with *u*, the English have a strong propensity to place the accent on it, even in opposition to etymology, as in the word *Arbutus*.

|| *Mycale* and *Mycone*.—An English ear seems to have a strong predilection for the penultimate accent on these words; but all our prosodists accent them on the antepenultimate. The same may be observed of *Mutina*. See note on *Oryx*.

¶ *Myrinus*.—Labbe is the only prosodist I have met with, who accents this word on the antepenultimate syllable; and, as this accentuation is so contrary to analogy

I have followed Lempriere, Ainsworth, Gouldman, and Holyoke, with the accent on the penultimate.—See the word in the *Terminational Vocabulary*.

* *Neobule*.—Labbe, Ainsworth, Gouldman, Littleton, and Holyoke, give this word the penultimate accent, and therefore I have preferred it to the antepenultimate accent, given it by Lempriere; not only from the number of authorities in its favour, but from its being more agreeable to analogy.

† *Neris*.—The authorities are nearly equally balanced between the penultimate and antepenultimate accent; and therefore I may say, as Labbe sometimes does, *ut volueris*; but I am inclined rather to the antepenultimate accent, as more agreeable to analogy, though I think the penultimate more agreeable to the ear.

‡ *Nereus*.—

“Old *Nereus* to the Sea was born of Earth—
“*Nereus*, who claims the precedence in birth

“To their descendants; him old god they call,
“Because sincere and affable to all.”

Cooke's Hesiod. Theog. v. 357.

§ *Nonacris*.—Labbe, Ainsworth, Gouldman, and Holyoke, give this word the antepenultimate accent; but Lempriere, Littleton, and the Graduses, place the accent, more agreeably to analogy, on the penultimate.

|| *Nunicus*.—

“Our fleet Apollo sends
“Where Tuscan Tiber rolls with rapid force,
“And where *Nunicus* opes his holy source.”

Dryden.

¶ *Nundina*.—Lempriere places the accent on the penultimate syllable of this word; but Labbe, Gouldman, and Holyoke, on the antepenultimate. Ainsworth marks it in the same manner among the appellatives, nor can there be any doubt of its propriety.

* *Oceana*.—So prone are the English to lay the accent on the penultimate of words of this termination, that we scarcely ever hear the famous *Oceana* of Harrington pronounced otherwise.

† *Æagarus*.—This diphthong, like *æ*, is pronounced as the single vowel *e*. If the conjecture concerning the sound of *æ* was right, the middle sound between the *o* and *e* of the ancients must, in all probability, have been the sound of our *a* in *water*.—See the word *Æa*.

† *Ogyges*.—This word is by all our prosodists accented on the first syllable, and, consequently, it must sound exactly as if written *Odd'-je-jes*; and this, however odd to an English ear, must be complied with.

§ *Omphale*.—The accentuation which a mere English speaker would give to this word was experienced a few

years ago by a pantomime called *Hercules* and *Omphale*; when the whole town concurred in placing the accent on the second syllable, till some classical scholars gave a check to this pronunciation by placing the accent on the first. This, however, was far from banishing the former manner, and disturbed the public ear without correcting it. Those, however, who would not wish to be numbered among the vulgar, must take care to avoid the penultimate accent.

|| *Orpheus*.—See *Idomeneus*.

†† *Oryx*.—

"And, at once, Broetas and *Oryx* slew:

"*Oryx*'s mother, Mycale, was known

"Down from her sphere to draw the lab'ring moon."

Garth's Ovid. Mæ.

* *Palmyra*.—Nothing can be better fixed in an English ear than the penultimate accentuation of this word: this pronunciation is adopted by Ainsworth and Lempriere. Gouldman and Holyoke seem to look the other way; but Labbe says the more learned give this word the antepenultimate accent, and that this accent is more agreeable to the general rule. Those, however, must be pedantic coxcombs, who should attempt to disturb the received pronunciation when in English, because a contrary accentuation may possibly be proved to be more agreeable to Greek or Latin.

† *Pammenes*.—I find this word nowhere but in Lempriere, who accents it on the penultimate; but, as all words of this termination have the antepenultimate accent, till this appears an exception, I shall venture to alter it.

‡ *Pantheon*.—This word is universally pronounced with the accent on the second syllable in English, but in Latin it has its first syllable accented, and this accentuation makes so slight a difference to the ear, that it ought to have the preference.

§ *Papias*.—This is the name of an early Christian writer, who first propagated the doctrine of the Millennium; and it is generally pronounced with the accent on the second syllable, but I believe corruptly, since Labbe has adopted the antepenultimate accent, who must be well acquainted with the true pronunciation of ecclesiastical characters.

|| *Parysatis*.—Labbe tells us that some prosodists contend that this word ought to be accented on the antepenultimate syllable, and we find Lempriere has so accented it; but so popular a tragedy as Alexander, which every where accents the penultimate, has fixed this pronunciation in our own country beyond a doubt.

¶ *Patroclus*.—Lempriere, Ainsworth, Gouldman, and Holyoke, accent the penultimate syllable of this word; but Labbe the antepenultimate: our Graduses pronounce it either way; but I do not hesitate to prefer the penultimate accent; and, till some good reason be given for the contrary, I think *Patrocles* the historian, and *Patrocli* a small island, ought to be pronounced with the same accent as the friend of Achilles.

* *Phalereus*.—There is some doubt among the learned whether this word ought to be pronounced in three or four syllables; that is, as *Phal-e-re-us* or *Pha-le-re-us*. The latter mode, however, with the accent on the antepenultimate, seems to be the most eligible.

† *Pharnaces*.—All our prosodists accent the antepenultimate syllable of this word; but an English ear is strongly inclined to accent the penultimate, as in *Arbaces* and *Arsaces*, which see.

‡ *Philomedea*.—

“Nor less by *Philomedea* known on earth;

“A name deriv'd immediate from her birth.”

Cooke's Hesiod. Theog. v. 311.

§ *Pleiades*.—

“When with their domes the slow-pac'd snails retreat

“Beneath some foliage from the burning heat

“Of the *Pleiades*, your tools prepare;

“The ripen'd harvest then deserves your care.”

Cooke's Hesiod, Works and Days.

The translator has adhered strictly to the original *Πληιάδες* in making this word four syllables. Virgil has done the same:

“*Pleiadas*, Hyadas, claramque Lycaonis Arcton.”

Georgic. I.

But Ovid has contracted this word into three syllables:

“*Pleiades* incipiunt humeros relevare paternos.”

Fasti, iv. p. 169.

The latter translators of the classics have generally contracted this word to three syllables. Thus in Ogilby's translation of Virgil's *Georgicks*, b. 1.

“First let the eastern *Pleiades* go down,

“And the bright star in Ariadne's crown.”

"The *Pleiades* and Hyades appear ;
"The sad companions of the turning year."

Creech's Manilius.

But Dryden has, to the great detriment of the poetical sound of this word, anglicised it, by squeezing it into two syllables :

"What are to him the sculpture of the shield,
 "Heav'n's planets, earth, and ocean's wat'ry field,
 "The *Pleiads*, Hyads, less and greater Bear,
 "Undipp'd in seas, Orion's angry star!"

Ovid's Met. b. 12.

This unpleasant contraction of Dryden's seems not to have been much followed. Elegant speakers are pretty uniform in preferring the trisyllable; but a considerable variety appears in the sound of the diphthong *ei*. Most speakers pronounce it like the substantive *eye*; and this pronunciation is defended by the common practice in most schools, of sounding the diphthong *ei* in this manner in appellatives; but though Greek appellatives preserve the original sound of their letters, as *φιδανρία, προβάτιον, κ. τ. λ.*, where the *t* does not slide into *sh*, as in Latin words; yet proper names, which are transplanted into all languages, partake of the soil into which they are received, and fall in with the analogies of the language which adopts them. There is, therefore, no more reason for preserving the sound of *ei* in proper names, than for pronouncing the *c* like *k* in *Phocion, Lacedæmon, &c.*

But perhaps it will be said, that our diphthong *ei* has the sound of *eye* as well as the Greek *ei*. To which it may be answered, that this is an irregular sound of these vowels, and can scarcely be produced as an example, since it exists but in *either*, *neither*, *height*, and *sleight*.

The two first words are more frequently and analogically pronounced *either, neither*; and *height* is often pronounced so as to rhyme with *weight*, and would, in all probability, be always so pronounced, but for the false supposition, that the abstract must preserve the sound of the verb or adjective from which it is derived; and with respect to *sleight*, though Dr. Johnson says it ought to be written *slight*, as we sometimes see it, yet, if we observe his authorities, we shall find that several respectable authors spelt the word in this manner; and if we consult Junius and Skinner, particularly the last, we shall see the strongest reason from etymology to prefer this spelling, as in all probability it comes from *sly*. The analogical pronunciation, therefore, of this diphthong in our own language is either as heard in *vein, rein, &c.* or in *perceive, receive, &c.* The latter is adopted by many speakers in the present word, as if written *Pleades*; but *Plyades*, though less analogical, must be owned to be the more polite and literary pronunciation.—See note on *Elegeia* in the *Terminational Vocabulary*.

* *Popilius Lænas*.—Nothing can show the dignity of the Roman commonwealth and the terror of its arms more than the conduct of this man. He was sent as an ambassador to Antiochus, king of Syria, and was commissioned to order that monarch to abstain from hostilities against Ptolemy, king of Egypt, who was an ally of Rome. Antiochus, who was at the head of his army when he received this order, wished to evade it by equivocal answers; but Popilius, with a stick which he had in his hand, made a circle round him on the sand, and bade him, in the name of the Roman senate and people, not to go beyond it before he spoke decisively. This boldness intimidated Antiochus: he withdrew his garrisons from Egypt, and no longer meditated a war against Ptolemy.

* *Sandace*.—A sister of Xorxes, which I find in no lexicographer but Lempriere, and in him with the accent on the first syllable; but, from its Greek original Σανδακην, it ought certainly to be accented on the second syllable.

† *Sapores*.—This word, says Labbe, is by Gavantus and others, ignorant of the Greek, accented on the first syllable.

‡ *Seleucia*.—Lempriere and Labbe accent this word on the penultimate; but Ainsworth, Gouldman, and Hol-yoke, on the antepenultimate. As this word, according to Strabo, has its penultimate formed of the diphthong *ei*, Σελευχεια, this syllable ought to have the accent; but, as the antepenultimate accent is so incorporated into our tongue, I would strongly recommend the pronunciation which an English scholar would give it at first sight, and that is, placing the accent on the *u*. This is the accent Milton gives it:

“ —————Eden stretch’d her line
“ From Auran eastward to the royal tow’rs
“ Of great Seleucia, built by Grecian kings.”

Par. Lost, b. 4.

If, however, the English scholar wishes to shine in the classical pronunciation of this word, let him take care to pronounce the *c* like *s* only, and not like *sh*, which sound

it necessarily has, if the accent be on the antepenulti-mate syllable.—See Rules 10 and 30.

§ *Serapis*.—There is not a dissenting voice among our prosodists against the pronouncing of this word with the accent on the penultimate syllable; and yet, to show the tendency of English pronunciation, when a ship of this name had a desperate engagement with one of the French, which attracted the attention of the publick, every body pronounced it with the accent on the first syllable. Mil-ton has done the same in his sublime description of the grandeurs of Pandemonium:

“ —————Not Babylon
“ Nor great Alcæon such magnificence
“ Equall’d in all their glories to enshrine
“ Belus or *Serapis* their gods; or seat
“ Their kings, when Egypt with Assyria strove,
“ In wealth and luxury”

Par. Lost, b. i. v. 717.

|| *Sergiolus*.—I find this word in no dictionary but Lempriere’s, and there the accent is placed upon the penultimate instead of the antepenultimate syllable.

¶ *Severus*.—This word, like *Serapis*, is universally mispronounced, by the mere English scholar, with the ac-cent on the first syllable.

* *Smintheus*.—This word, like *Orpheus*, and others of the same form, has the accent on the first syllable; but poets often contract the two last syllables into one; as *Pope*:

"O, *Smintheus*, sprung from fair Latona's line,
"Thou guardian pow'r of Cilla the divine!"

See *IDOMENEUS*.

† *Sophonricus*.—I find this word in no prosodist but *Labbe*: and he places the accent on the penultimate syllable, like most other words of this termination; unless, says he, any one thinks it more likely to be derived from *Sophon*, than from *victory*: that is, by uniting a general termination to the root of the word, than combining it with another word significant of itself: but as there is a Greek adjective *Σωφρονικός*, signifying *ordained by nature to temperance*, it is much more probable that *So-phronicus* is this adjective used substantively, than that it should be compounded of *Σωφρον* and *νικος*, *conquering temperance*; and therefore the antepenultimate accent seems preferable.

‡ *Sporades*.—This word has the accent placed on the first syllable by all our prosodists; but a mere English ear is not only inclined to place the accent on the second syllable, but to pronounce the word as if it were a dissyllable, *Spo-rades*; but this is so gross an error, that it cannot be too carefully avoided.

§ *Suidas*.—This word is generally heard, even among the learned, in two syllables, as if written *Sui-das*. *Labbe*, however, makes it three syllables, and accents the first; although, says he, by what right I know not, it is generally pronounced with the accent on the penultimate. It may be observed, that, if we place the accent on the first syllable, the *i* in the second must be pronounced like *e*; and that the general pronunciation, which *Labbe* complains of, that of placing the accent on the second syllable, must, in our English pronunciation of Greek or Latin words, preserve the *i* in its long open sound, as in *ide*: if, therefore, we pronounce the *i* in this manner, it is a sufficient proof that we place the accent on the penultimate syllable; which, though common, is, as *Labbe* observes, without good authority.

* *Taygetus* and *Taygete*.—All our prosodists but Lempière accent these words on the antepenultimate syllable, as if divided into *Ta-yg'-e-tus* and *Ta-yg'-e-te*. I am, therefore, rather inclined to suppose the quantity marked in his dictionary an error of the press. The lines in Lily's *Quæ Genus* will easily call to the recollection of every scholar how early he adopted the antepenultimate pronunciation.

† *Tartara*, *Taygetus*, sic *Tænara*, *Massica*, et altus "Gargarus."

† *Tereus*.—For words of this termination, see *IDOME-NEUS*.

† *Thebes*.—Thebes in Egypt was called *Hecatom'pylos*,

from having a hundred gates; and Thebes in Greece *Heptap'ylus*, from its seven gates.

§ *Thessalonica*.—This word, like every other of a similar termination, is sure to be pronounced, by a mere English scholar, with the accent on the third syllable; but this must be avoided on pain of literary excommunication.

|| *Thon*, a physician of Egypt.—Milton spells this word with the final *e*, making it one syllable only, and consequently pronouncing it so as to rhyme with *tone*:

"Not that Nepenthe, which the wife of *Thone*,

"In Egypt gave to Jove-born Helena,

"Is of such pow'r to stir up joy as this!"

* *Troilus*.—This word is almost always heard as if it were two syllables only, and as if written *Troy'-lus*. This is a corruption of the first magnitude; the vowels should be kept separate, as if written *Tro'-e-lus*. See *Zoilus*.

† *Tyaneus*.—This word is only used as an adjective to Apollonius, the celebrated Pythagorean philosopher and is formed from the town of *Tyana*, where he was born. The natural formation of this adjective would undoubtedly be *Tyaneus*, with the accent on the antepenultimate syllable. Labbe, at the word *Tyana*, says, "et inde deductum *Tyaneus*; quiddam sciam reclamare nonnullos sed immerito, ut satis norunt eruditi."

The numberless authorities which might be brought for pronouncing this word either way, sufficiently show how equivocal is its accent, and of how little importance it is to which we give the preference. My private opinion coincides with Labbe; but, as we generally find it written

with the diphthong, we may presume the penultimate accent has prevailed, and that it is the safest to follow.

‡ *Tydeus*.—This word, like several others of the same termination, was pronounced by the Greeks sometimes in three, and sometimes in two syllables, the *eu* considered as a diphthong. When it was pronounced in three syllables, the penultimate syllable was long, and the accent was on it, as we find it in a verse of Wilkie's *Epigoniad*:

"Venus, still partial to the Theban arms,
"Tydeus' son seduc'd by female charms"

But the most prevailing pronunciation was that with the antepenultimate accent, as we generally find it in Pope's Homer:

"Next came Idomeneus and Tydeus' son
"Ajax the less, and Ajax Telamon."

Pope's Hom. b. ii. v. 58.

See *IDOMENEUS*.

* *Venafrum*.—Though the accent may be placed either on the antepenultimate or the penultimate syllable of this word, the latter is by far the preferable, as it is adopted by Lempriere, Labbe, Gouldman, and other good authorities.

† *Verrugo*.—I have given this word the penultimate accent with Lempriere, in opposition to Ainsworth, who adopts the antepenultimate.

‡ *Zenodotus*.—All our prosodists but Lempriere give this word the antepenultimate accent; and, till a good

reason is given why it should differ from *Herodotus* I must beg leave to follow the majority.

§ *Zoilus*.—The two vowels in this word are always separated in the Greek and Latin, but in the English pronunciation of it they are frequently blended into a diphthong, as in the words *oil*, *boil*, &c. This, however, is an illiterate pronunciation, and should be avoided. The word should have three syllables, and be pronounced as if written *Zo'-e-lus*.

BY inspecting the foregoing Vocabulary, we see that, notwithstanding all the barriers with which the learned have guarded the accentuation of the dead languages, still some words there are which despise their laws, and boldly adopt the analogy of English pronunciation. It is true the catalogue of these is not very numerous: for, as an error of this kind incurs the penalty of being thought illiterate and vulgar, it is no wonder that a pedantick adherence to Greek and Latin should, in doubtful cases, be generally preferred.

But, as the letters of the dead languages have insensibly changed their sound by passing into the living ones, so it is impossible to preserve the accent from sliding sometimes into the analogies of our own tongue; and, when once words of this kind are fixed in the publick ear,

it is not only a useless, but a pernicious pedantry to disturb them. Who could hear without pity of Alexander's passing the river *Granicus*, or of his marrying the sister of *Parysatis*? These words, and several others, must be looked upon as planets shot from their original spheres, and moving round another centre.

After all the care, therefore, that has been taken to accent words according to the best authorities, some have been found so differently marked by different prosodists, as to make it no easy matter to know to which we shall give the preference. In this case I have ventured to give my opinion without presuming to decide, and merely as an *Εὔρωκλον*, or *Interim*, till the learned have pronounced the final sentence.

PREFACE

TO THE

TERMINATIONAL VOCABULARY.

TAKING a retrospective view of language, or surveying it in its terminations, affords not only a new, but an advantageous view of all languages. The necessity of this view induced me, several years ago, to arrange the whole English language according to its terminations; and this arrangement I found of infinite use to me in consulting the analogies of our tongue. A conviction of its utility made me desirous of arranging the Greek and Latin proper names in the same manner, and more particularly as the pronunciation of these languages depends more on the termination of words than any other we are acquainted with. Of such utility is this arrangement supposed to be in the Greek language, that the son of the famous Hooeven, who wrote on the Greek particles, has actually printed such a dictionary, which only waits for a preface to be published. The labour of such a selection and arrangement must have been prodigious; nor is the task I have undertaken in the present work a slight one; but the idea of rendering the classical pronunciation of proper names still more easy, encouraged me to persevere in the labour, however dry and fatiguing.

I flattered myself I had already promoted this end, by dividing the proper names into syllables upon analogical principles, but hoped I could still add to the facility of recollecting their pronunciation, by the arrangement here adopted; which, in the first place, exhibits the accent and quantity of every word by its termination.

In the next place, it shows the extent of this accentuation, by producing, at one view, all the words, differently accented, by which means may be formed the rule and the exception.

Thirdly, when the exceptions are but few, and less apt to be regarded, by seeing them contrasted with the rule, they are imprinted more strongly on the memory, and are the more easily recollected. Thus, by seeing that *Sperchius*, *Xenophontius*, and *Darius*, are the only words, of that very numerous termination, which have the accent on the penultimate, we are at perfect ease about all the rest.

Fourthly, by seeing that all words ending in *enes* have universally the antepenultimate accent, we easily recollect that the pronunciation of *Eumenes* with the accent on the penultimate is radically wrong, and is only tolerated because adopted by some respectable writers. Thus, too, the numerous termination in *ades* is seen to be perfectly antepenultimate; and the ambiguous termination in *ides* is freed in some measure from its intricacy, by seeing the extent of both forms contrasted. This contrast, without being obliged to go to Greek etymologies, shows at one view when this termination has the accent on the penultimate *i*, as in *Thyides*; and when it trans-

fers the accent to the antepenultimate, as in *Thucydides* which depends entirely on the quantity of the original word from which these patronymicks are formed.

And, lastly, when the number of words pronounced with a different accent are nearly equal, we can at least find some way of recollecting their several accentuations better than if they were promiscuously mingled with all the rest of the words in the language. By frequently repeating them as they stand together, the ear will gain a habit of placing the accent properly, without knowing why it does so. In short, if Labbe's *Catholic Indices*, which is in the hands of all the learned, be useful for readily finding the accent and quantity of proper names, the present Index cannot fail to be much more so, as it not only associates them by their accent and quantity, but according to their termination also; and, by this additional association, it must necessarily render any diversity of accent more easily perceived and remembered.

To all which advantages it may be added, that this arrangement has enabled me to point out the true sound of every termination; by which means those who are totally unacquainted with the learned languages will find themselves instructed in the true pronunciation of the final letters of every word, as well as its accent and quantity.

It need scarcely be observed, that, in the following Index, almost all words of two syllables are omitted: for, as dissyllables in the Greek and Latin languages are always pronounced with the accent on the first, it was needless to insert them. The same may be observed of such words as have the vowel in the penultimate syllable followed by two consonants, for, in this case, unless the former of these consonants was a mute, and the latter a liquid, the penultimate vowel was always long, and consequently always had the accent. This analogy takes place in our pronunciation of words from the Hebrew; which, with the exception of some few that have been anglicised, such as *Bethlehemite*, *Nazarene*, &c., have the accent, like the Greek and Latin words, either on the penultimate or antepenultimate syllable.

It might have been expected, that I should have confined myself to the insertion of proper names alone, without bringing in the gentile adjectives, as they are called which are derived from them. This omission would, undoubtedly, have saved me immense trouble; but these adjectives, being sometimes used as substantives, made it difficult to draw the line; and as the analogy of accentuation was, in some measure, connected with these adjectives, I hoped the trouble of collecting and arranging them would not be entirely thrown away.

* As the accent is never on the last syllable of Greek or Latin proper names, the final *a* must be pronounced as in English words of this termination; that is, nearly as the interjection *ah*!—See Rule 7, prefixed to the *Initial Vocabulary*.

† Of all the words ending in *ica*, *Cleonica*, *Veronica*, and *Thessalonica*, are the only three which have the penultimate accent.—See Rule the 29th, prefixed to the *Initial Vocabulary*, and the words *ANDRONICUS* and *SOPHRONICUS*.

‡ Labbe tells us that some of the most learned men pronounce this part of America with the accent on the penultimate syllable.

§ The vowels in this termination do not form a diphthong. The accent is upon the first *a*, the *i* is pronounced like *y* consonant in *year*, and the final *a* nearly like the *a* in *father*, or the interjection *ah*!—See Rule 7.

|| Words of this termination have the *cia* pronounced as if written *she-a*.—See Rule 10, prefixed to the *Initial Vocabulary*.

** See *IPHIGENIA*, in the *Initial Vocabulary*.

†† The ancients sometimes separated the vowels *ei* in this termination, and sometimes pronounced them as a diphthong. The general mode of pronouncing them with *u* is to consider them as a diphthong, and to pronounce it as long or double *e*; which, from its squeezed sound, approaches to the initial *y*, and makes these words pronounced as if written *El-e-jé-yah*, *Hy-jé-yah*, &c. This is the pronunciation which ought to be adopted; but scholars, who are fond of displaying their knowledge of Greek, will be sure to pronounce *Elegeia*, *Hygeia*, or rather *Hygieia*, *Anthēa*, and *Deiopeia*, with the diphthong like the noun *eye*; while *Cartheia*, or *Carteia*, *Aquileia*, *Pompeia*, and *Tarpeia*, of Latin original, are permitted to have their diphthongs sounded like double *e*, or, which is nearly the same thing if the vowels are separated, to sound the *e* long, as in *equal*, and the *i* as *y* consonant, articulating the final *a*.—See note on *Achaia*.

For a more complete idea of the sound of this diphthong, see the word *PLEIADES*, in the *Initial Vocabulary*. To which observations we may add, that, when this diphthong in Greek is reduced to the single long *i*: as Latin, as in *Iphigenia*, *Elegia*, &c., it is pronounced like single *i*, that is, like the noun *eye*.

* See Rule 4 of the Initial Vocabulary.

† The termination of *yæ*, with the accent on the preceding syllable, must be pronounced as two similar letters; that is, as if spelt *Halice-e-e*, *Min-e-e*, &c.—See Rule 4 of the Initial Vocabulary.

† The *i* in the penultimate syllables of these words, not having the accent, must be pronounced like *e*. This occasions a disagreeable hiatus between this and the last syllable, and a repetition of the same sound; but at the same time is strictly according to rule.—See Rule 4 of the Initial Vocabulary.

* It may be observed, that words of this termination are sometimes both substantives and adjectives. When they are substantives, they have the accent on the antepenultimate syllable, as *Nèleus*, *Prométhæus*, *Salmôneus*, &c.; and when adjectives, on the penultimate, as *Nèleus*, *Prométhæus*, *Salmôneus*, &c. Thus, *Èneus*, a king of Calydonia, is pronounced in two syllables; the adjective *Èneus*, which is formed from it, is a trisyllable; and *Ènéius*, another formative of it, is a word of four syllables. But these words, when formed into English adjectives, alter their termination with the accent on the penultimate:

"With other notes than to the Orphæan lyre."

ADVERTISEMENT.

THE true pronunciation of the Hebrew language, as Doctor Lowth observes, is lost. To refer us for assistance to the Masoretick points, would be to launch us on a sea without shore or bottom: the only compass, by which we can possibly steer on this boundless ocean, is the Septuagint version of the Hebrew Bible; and, as it is highly probable the translators transfused the sound of the Hebrew proper names into the Greek, it gives us something like a clew to guide us out of the labyrinth. But even here we are often left to guess our way: for the Greek word is frequently so different from the Hebrew, as scarcely to leave any traces of similitude between them. In this case custom and analogy must often decide, and the ear must sometimes solve the difficulty. But these difficulties relate chiefly to the *accentuation* of Hebrew words: and the method adopted in this point will be seen in its proper place.

I must here acknowledge my obligations to a very

learned and useful work—the Scripture Lexicon of Mr Oliver. As the first attempt to facilitate the pronunciation of Hebrew proper names, by dividing them into syllables, it deserves the highest praise: but, as I have often differed widely from this gentleman in syllabication, accentuation, and the sound of the vowels, I have thought it necessary to give my reasons for this difference, which will be seen under the Rules; of the validity of which reasons the reader will be the best judge.

N. B. As there are many Greek and Latin proper names in Scripture, particularly in the New Testament, which are to be met with in ancient history, some of them have been omitted in this selection; and therefore, if the inspector does not find them here, he is desired to seek for them in the Vocabulary of Greek and Latin Names.

RULES

FOR PRONOUNCING

SCRIPTURE PROPER NAMES.

1. IN the pronunciation of the letters of the Hebrew proper names, we find nearly the same rules prevail as in those of Greek and Latin. Where the vowels end a syllable with the accent on it, they have their long open sound, as *Na'-bal*, *Je'-hu*, *Su'-rach*, *Go'-shen*, and *Tu'-bal*. (See Rule 1st prefixed to the *Greek and Latin Proper Names*.)

2. When a consonant ends the syllable, the preceding vowel is short, as *Sam'-u-el*, *Lem'-u-el*, *Sim'-e-on*, *Sol'-o-mon*, *Sac'-oth*, *Syn'-a-gogue*. (See Rule 2d prefixed to the *Greek and Latin Proper Names*.) I here differ widely from Mr. Oliver; for I cannot agree with him that the *e* in *Abdiel*, the *o* in *Arnon*, and the *u* in *Ashur*, are to be pronounced like the *ee* in *seen*, the *o* in *tone*, and the *u* in *tune*, which is the rule he lays down for all similar words.

3. Every final *i*, forming a distinct syllable, though unaccented, has the long open sound, as *Al'-i*, *A-ris'-a-i*. (See Rule 4th prefixed to the *Greek and Latin Proper Names*.)

4. Every unaccented *i*, ending a syllable, not final, is pronounced like *e*, as *Al'-ri-el*, *Ab'-di-el*, pronounced *Al'-re-el*, *Ab'-de-el*. (See Rule 4th prefixed to the *Greek and Latin Proper Names*.)

5. The vowels *ai* are sometimes pronounced in one syllable, and sometimes in two. As the Septuagint version is our chief guide in the pronunciation of Hebrew proper names, it may be observed, that when these letters are pronounced as a diphthong in one syllable, like our English diphthong in the word *daily*, they are either a diphthong in the Greek word, or expressed by the Greek *ε* or *ι*, as *Ben-ai'-ah*, *Bavaia*; *Hu'-shai*, *Xvci*; *Hu'-rai*, *Oupi*, &c.; and that when they are pronounced in two syllables, as *Sham'-ma-i*, *Shash'-a-i*, *Ber-ai'-ah*, it is because the Greek words by which they are translated, as *Σαμμαι*, *Ξασις*, *Βαπαία*, make two syllables of these vowels. Mr. Oliver has not always attended to this distinction: he makes *Sim'-a-i* three syllables, though the Greek makes it but two in *Σινᾶ*. That accurate prosodist, Labbe, indeed, makes it a trisyllable; but he does the same by *Aaron* and *Canaan*, which our great classicist Milton uniformly reduces to two syllables, as well as *Sinai*. If we were to pronounce it in three syllables, we must necessarily make the first syllable short, as in *Shim'-e-i*; but this is so contrary to the best usage, that it amounts to a proof that it ought to be pronounced in two syllables, with the first *i* long, as in *Shi'-nar*. This, however, must be looked upon as a general rule only: these vowels in *Isaiah*, Græcised by *Hoatias*, are always pronounced as a diphthong, or, at least, with the accent on the *a*, and the *i* like *y* articulating the succeeding vowel: in *Caiaphas*, likewise, the *ai* is pronounced like a diphthong, though divided in the Greek *Καϊαπας*, which division cannot take place in this word, because the *i* must then necessarily have the accent, and must be pronounced as in *Isaac*, as Mr. Oliver has marked it, but I think contrary to universal usage. The only point necessary to be observed in the sound of this diphthong is, the slight difference we perceive between its medial and final position: when it is final, it is exactly like the English *ay* without the accent, as in *holysday*, *roundelay*, *gallo-way*; but when it is in the middle of a word, and followed by a vowel, the *i* is pronounced as if it were *y*, and as if this *y* articulated the succeeding vowel: thus *Ben-ai'-ah* is pronounced as if written *Ben-ai'-yah*.

6. *Ch* is pronounced like *k*, as *Chebar*, *Chemosh*, *Enoch*, &c., pronounced *Kebar*, *Ke-mosh*, *E-nock*, &c. *Cherubim* and *Rachel* seem to be perfectly anglicised, as the *ch* in these words is always heard as in the English words *cheer*, *child*, *riches*, &c. (See Rule 12 prefixed to the *Greek and Latin Proper Names*.) The same may be observed of *Cherub*, signifying an order of angels; but when it means a city of the Babylonish empire, it ought to be pronounced *Ke'-rub*.

7. Almost the only difference in the pronunciation of the Hebrew, and the Greek and Latin proper names, is in the sound of the *g* before *e* and *i*: in the two last languages this consonant is always soft before these vowels, as *Geltius*, *Gippius*, &c., pronounced *Jeltius*, *Jippius*, &c.; and in the first it is hard; as *Gera*, *Gerizim*, *Gideon*, *Gulgai*, *Megiddo*, *Megiddon*, &c. This difference is without all foundation in etymology; for both *g* and *c* were always hard in the Greek and Latin languages, as well as in the Hebrew; but the latter language being studied so much less than the Greek and Latin, it has not undergone that change which familiarity is sure to produce in all languages: and even the solemn distance of this language has not been able to keep the letter *c* from sliding into *s* before *e* and *i*, in the same manner as in the Greek and Latin: thus, though *Gehazi*, *Gideon*, &c., have the *g* hard, *Cedrom*, *Cedron*, *Cisai*, and *Citern*, have the *c* soft, as if written *Sedrom*, *Sedron*, &c. The same may be observed of *Igeabarim*, *Igeal*, *Nagge*, *Shage*, *Pagiel*, with the *g* hard, and *Ocidelus*, *Ocina*, and *Pharacicion*, with the *c* soft like *s*.

8. Gentiles, as they are called, ending in *ines* and *ites*, as *Philistines*, *Hivites*, *Hittites*, &c., being anglicised in the translation of the Bible, are pronounced like formatives of our own, as *Philistins*, *Whitfieldites*, *Jacobites*, &c.

9. The unaccented termination *ah*, so frequent in Hebrew proper names, ought to be pronounced like the *a* in *father*. The *a* in this termination, however, frequently falls into the indistinct sound heard in the final *a* in *Africa*, *Ætna*, &c.; nor can we easily perceive any distinction in this respect between *Elijah* and *Elisha*: but the final *h* preserves the other vowels open, as *Colchozeh*, *Silloh*, &c., pronounced *Colchozee*, *Sililo*, &c. (See Rule 7 prefixed to the *Greek and Latin Proper Names*.) The diphthong *ei* is always pronounced like *ee*: thus *Se-mi-el* is pronounced as if written *Se-mæ'-el*. But if the accent be on the *ah*, then the *a* ought to be pronounced like the *a* in *father*; as *Tah'-era*, *Tah'-pe-neis*, &c.

10. It may be remarked, that there are several Hebrew proper names, which, by passing through the Greek of the New Testament, have conformed to the Greek pronunciation; such as *Aceldama*, *Genesareth*, *Bethphage*, &c., pronounced *Aseldama*, *Jenezareth*, *Bethphaje*, &c. This is, in my opinion, more agreeable to the general analogy of pronouncing these Hebrew-Greek words than preserving the *c* and *g* hard.

Rules for ascertaining the English Quantity of the Vowels in Hebrew Proper Names.

11. With respect to the quantity of the first vowel in dissyllables, with but one consonant in the middle, I have followed the rule which we observe in the pronunciation of such dissyllables in Greek or Latin words; (see Rule 18 prefixed to the *Greek and Latin Proper Names*;) and that is, to place the accent on the first vowel, and to pronounce that vowel long, as *Ko'-rah*, and not *Kor'-ah*, *Mol'-och*, and not *Mol'-och*, as Mr. Oliver has divided them, in opposition both to analogy and the best usage. I have observed the same analogy in the penultimate of polysyllables, and have not divided *Balthasar* into *Bal-thas'-ar*, as Mr. Oliver has done, but into *Bal-tha'-sar*.

12. In the same manner, when the accent is on the antepenultimate syllable, whether the vowel end the syllable or be followed by two consonants, the vowel is always short, except followed by two vowels, as in Greek and Latin proper names. (See Rules prefixed to these names, No. 18, 19, 20, &c.) Thus *Jehosophat* has the accent on the antepenultimate syllable, according to Greek accentuation by quantity, (see *Introduction* to this work;) and this syllable, according to the clearest analogy of English pronunciation, is short, as if spelt *Je-hos-a-phat*

The secondary accent has the same shortening power in *Othonias*, where the primary accent is on the third, and the secondary on the first syllable, as if spelt *Oth-o-ni-as*: and it is on these two fundamental principles of our own pronunciation, namely, the lengthening power of the penultimate, and the shortening power of the antepenultimate accent, that I hope I have been enabled to regulate and fix many of those sounds, which were floating about in uncertainty, and which, for want of this guide, are differently marked by different orthoëpists, and often differently by the same orthoëpist. (See this fully explained and exemplified in *Principles of English Pronunciation*, No. 547, 530, &c.)

Rules for placing the Accent on Hebrew Proper Names.

13. With respect to the accent of Hebrew words, it cannot be better regulated than by the laws of the Greek language. I do not mean, however, that every Hebrew word, which is Græcised by the Septuagint, should be accented exactly according to the Greek rule of accentuation: for, if this were the case, every word ending in *el* would never have the accent higher than the preceding syllable; because it was a general rule in the Greek language, that, when the last syllable was long, the accent could not be higher than the penultimate: nay, strictly speaking, were we to accent these words according to the accent of that language, they ought to have the accent on the last syllable, because *Αβδηλ* and *Ισραηλ*, *Abd-el* and *Israel*, have the accent on that syllable. It may be said, that this accent on the last syllable is the grave, which, when on the last word of a sentence, or succeeded by an enclitic, was changed into an acute. But here, as in words purely Greek, we find the Latin analogy prevail; and, because the penultimate is short, the accent is placed on the antepenultimate, in the same manner as in *Socrates*, *Sosthenes*, &c., though the final syllable of the Greek words *Σωκράτης*, *Σωσθένης*, &c., is long, and the Greek accent on the penultimate. (See *Introduction* prefixed to the *Rules for pronouncing Greek and Latin Proper Names*.) It is this general prevalence of accenting according to the Latin analogy, that has induced me, when the Hebrew word has been Græcised in the same number of syllables, to prefer the Latin accentuation to what may be called our own. Thus *Cathua* coming to us through the Greek *Καθού*, I have accented it on the penultimate, because the Latins would have placed the accent on this syllable on account of its being long, though an English ear would be better pleased with the antepenultimate accent. The same reason has induced me to accent *Chaseba* on the antepenultimate, because it is Græcised into *Χαζεβή*. But when the Hebrew and Greek word does not contain the same number of syllables, as *Mes-a-bah*, *Μεσάβη*, *Ιά-υ-ελ*, *Ιούηλος*, it then comes under our own analogy, and we neglect the long vowel, and place the accent on the antepenultimate. The same may be observed of *Mordecai*, from *Μαρδοχαίου*.

14. As we never accept a proper name from the Greek on the last syllable, (not because the Greeks did not accent the last syllable, for they had many words accented in that manner, but because this accentuation was contrary to the Latin prosody;) so, if the Greek word be accented on any other syllable, we seldom pay any regard to it, unless it coincide with the Latin accent. Thus, in the word *Gederah*, I have placed the accent on the penultimate, because it is Græcised by *Γάδρα*, where the accent is on the antepenultimate; and this because the penultimate is long, and this long penultimate has always the accent in Latin. (See this farther exemplified, *Rule 18*, prefixed to the *Greek and Latin Proper Names*, and *Introduction*, near the end.) Thus, though it may seem at first sight absurd to derive our pronunciation of Hebrew words from the Greek, and then to desert the Greek for the Latin; yet, since we must have some rule, and, if possible, a learned one, it is very natural to lay hold of the Latin, because it is nearest at hand. For, as language is a mixture of reasoning and convenience, if the true reason lie too remote from common apprehension, another more obvious one is generally adopted; and this last, by general usage, becomes a rule superior to the former. It is true the analogy of our own language would be a rule the most rational; but while the analogies of our own language are so little understood, and the Greek and Latin languages are so justly admired, even the appearance of being acquainted with them will always be esteemed reputable, and infallibly lead us to an imitation of them, even in such points as are not only insignificant in themselves, but inconsistent with our vernacular pronunciation.

15. It is remarkable that all words ending in *ias* and *iah* have the accent on the *i*, without any foundation in

the analogy of Greek and Latin pronunciation, except the very vague reason that the Greek word places the accent on this syllable. I call this reason vague, because the Greek accent has no influence on words in *a-el*, *iel*, *ial*, &c.; as, *Ισραήλ*, *Αβδηλ*, *Βελιάλ*, κ. τ. λ.

Hence we may conclude the impropriety of pronouncing *Messias* with the accent on the first syllable, according to Labbe, who says we must pronounce it in this manner, if we wish to pronounce it like the French with the *os rotundum et facundum*; and, indeed, if the *i* were to be pronounced in the French manner, like *e*, placing the accent on the first syllable seems to have the bolder sound. This may serve as an answer to the learned critic, the editor of Labbe, who says, "the Greeks, but not the French, pronounce *ore rotundo*;" for, though the Greeks might place the accent on the *i* in *Μεσσίας*, yet, as they certainly pronounced this vowel as the French do, it must have the same slender sound, and the accent on the first syllable must, in that respect, be preferable to it; for the Greek *i*, like the same letter in Latin, was the slenderest of all the vowel sounds. It is the broad diphthongal sound of the English *i* with the accent on it, which makes this word sound so much better in English than it does in French, or even in the true ancient Greek pronunciation.

16. The termination *aim* seems to attract the accent on the *a* only in words of more than three syllables; as *El-phra-im* and *Mis-ra-im* have the accent on the antepenultimate; but *Ho-ro-al-im*, *Ram-a-tha-im*, &c., on the penultimate syllable. This is a general rule; but, if the Greek word have the penultimate long, the accent ought to be on that syllable; as, *Phar-na-im*, *Φαρσίμ*, &c.

17. *Kemuel*, *Jemuel*, *Nemuel*, and other words of the same form, having the same number of syllables as the Greek words into which they are translated, ought to have the accent on the penultimate, as that syllable is long in Greek; but *Emanuel*, *Samuel*, and *Lemuel*, are irrecoverably fixed in the antepenultimate accentuation, and show the true analogy of the accentuation of our own language.

18. Thus we see what has been observed of the tendency of Greek and Latin words, to desert their original accent, and to adopt that of the English, is much more observable in words from the Hebrew. Greek and Latin words are fixed in their pronunciation, by a thousand books written expressly upon the subject, and ten thousand occasions of using them; but Hebrew words, from the remote antiquity of the language, from the paucity of books in it, from its being originally written without points, and the very different style of its poetry from that of other languages, afford us scarcely any criterion to recur to for settling their pronunciation, which must, therefore, often be irregular and desultory. The Septuagint, indeed, gives us some light, and is the only star by which we can steer; but this is so frequently obscured as to leave us in the dark, and force us to pronounce according to the analogy of our own language. It were to be wished, indeed, that this were to be entirely adopted in Hebrew words, where we have so little to determine us; and that those words which we have worn into our own pronunciation were to be a rule for all others of the same form and termination: but it is easier to bring about a revolution in kingdoms than in languages. Men of learning will always form a sort of literary aristocracy; they will be proud of the distinction which a knowledge of languages gives them above the vulgar; and will be fond of showing this knowledge, which the vulgar will never fail to admire and imitate.

The best we can do, therefore, is to make a sort of compromise between this ancient language and our own: to form a kind of compound ratio of Hebrew, Greek, Latin, and English, and to let each of these prevail as usage has permitted them. Thus *Emanuel*, *Samuel*, *Lemuel*, which, according to the Latin analogy and our own, have the accent on the antepenultimate syllable, ought to remain in quiet possession of their present pronunciation, notwithstanding the Greek *Εμμανουήλ*, *Σαμυήλ*, *Δεμυήλ*; but *Elishua*, *Esdrælon*, *Gederah*, may have the accent on the penultimate, because the Greek words into which they are translated, *Ελισού*, *Εσδρηλώμ*, *Γάδρα*, have the penultimate long. If this should not appear a satisfactory method of settling the pronunciation of these words, I must entreat those who dissent from it to point out a better: a work of this kind was wanted for general use; it is addressed neither to the learned nor the illiterate, but to that large and most respectable part of society, who have a tincture of letters, but whose avocations deny them the opportunity of cultivating them. To these a work of this kind cannot fail of being useful; and by its utility to these the author wishes to stand or fall.

INITIAL VOCABULARY.

* * When a word is succeeded by a word printed in *Italicks*, this latter word is merely to spell the former as it ought to be pronounced. Thus *As'-e-fa* is the true pronunciation of the preceding word *Ac'-i-pha*: and so of the rest.

* * The figures annexed to the words refer to the Rules prefixed to the Vocabulary. Thus the figure 3 after *Ab'-di* refers to Rule the 3d, for the pronunciation of the final *i*; and the figure 5 after *A-bish'-a-i* refers to

Rule the 5th, for the pronunciation of the unaccented *ai*: and so of the rest.

* *Aaron*.—This is a word of three syllables in Labbe, who says it is used to be pronounced with the accent on the penultimate; but the general pronunciation of this word in English is in two syllables, with the accent on the first, and as if written *A'-ron*. Milton uniformly gives it this syllabication and accent:

“Till by two brethren (those two brethren call

“Moses and *Aaron*) sent from God to claim

“His people from inthralment.”

Par. Lost, b. xii. v. 170.

† *Abarim*.—This and some other words are decided in their accentuation by Milton in the following verses:

“From Aroar to Nebo, and the wild

“Of southmost *Abarim* in Hesebon,

“And Horonaim, Seon's realm, beyond

“The flow'ry dale of Sibma, clad with vines,

“And Eleale to th' Asphaltick pool.”

Par. Lost, b. i. v. 407.

“Yet his temple high

“Rear'd in Azotus, dreaded through the coast

“Of Palestine, in Gath and Ascalon,

“And *Accaron* and Gaza's frontier bounds.”—*Ib.* 463

† *Abram* or *Abraham*.—The first name, of two syllables, was the patriarch's original name, but God increased it to the second, of three syllables, as a pledge of an increase in blessing. The latter name, however, from the feebleness of the *h* in our pronunciation of it, and from the absence of the accent, is liable to such an hiatus, from the proximity of two similar vowels, that, in the most solemn pronunciation, we seldom hear this name extended to three syllables. Milton has but once pronounced it in this manner, but has six times made it only two syllables: and this may be looked upon as the general pronunciation.

‡ *Adonai*.—Labbe, says his editor, makes this a word of three syllables only; which, if once admitted, why, says he, should he dissolve the Hebrew diphthong in *Sadaï, Sinaï, Tolmaï*, &c., and at the same time make two syllables of the diphthong in *Casteu*, which are commonly united into one? In this, says he, he is inconsistent with himself.—See *SINAI*.

* *Anathema*.—Those who are not acquainted with the profound researches of verbal critics, would be astonished to observe what waste of learning has been bestowed on this word by Labbe, in order to show that it ought to be accented on the antepenultimate syllable. This pronunciation has been adopted by English scholars; though some divines have been heard from the pulpit to give it the penultimate accent, which so readily unites it in a trochaic pronunciation with *Maranatha*, in the first Epistle of St. Paul to the Corinthians: "If any man love not the Lord Jesus Christ, let him be *Anathema maranatha*."

† *Areopagus*.—There is a strong propensity, in English readers of the New Testament, to pronounce this word with the accent on the penultimate syllable; and even some foreign scholars have contended that it ought to be so pronounced, from its derivation from *Ἀρειος πᾶγος*, the Doric dialect for *πῆγη*, the fountain of Mars, which was on a hill in Athens, rather than from *Ἀρειος μάγος*, the hill of Mars. But Labbe very justly despises this derivation, and says, that, of all the ancient writers, none have said that the *Areopagus* was derived from a fountain, or from a country near to a fountain; but all have confessed that it came from a hill, or the summit of a rock, on which this famous court of judicature was built. Vossius tells us, that St. Augustine, De Civ. Dei, l. x. cap. 10, calls this word *pagum Martis*, the village of

Mars, and that he fell into this error because the Latin word *pagus* signifies a village or street; but, says he, the Greek word signifies a hill, which, perhaps, was so called from *παγὰ* or *πῆγη*, (that is, fountain,) because fountains usually take their rise on hills. Wrong, however, as this derivation may be, he tells us it is adopted by no less scholars than Beza, Bædæus, and Sigonius. And this may show us the uncertainty of etymology in language, and the security of general usage; but, in the present case, both etymology and usage conspire to place the accent on the antepenultimate syllable. Agreeably to this usage, we find the prologue to a play observe, that—

"The critics are assembled in the pit,
And form an *Areopagus* of wit."

† *Asmadai*.—Mr. Oliver has not inserted this word, but we have it in Milton:

"———On each wing
"Uriel and Raphael his vaunting foe,
"Though huge, and in a rock of diamond arm'd,
"Vanquish'd, Adramelech and *Asmadai*."

Par. Lost, b. vi. v. 363.

Whence we may guess the poet's pronunciation of it in three syllables; the diphthong sounding like the *ai* in *daily*.—See Rule 5, and the words *Sinai* and *Adonai*.

* *Aazel*.—This word is not in Mr. Oliver's Lexicon; but Milton makes use of it, and places the accent on the second syllable:

“—that proud honour claim'd

“*Aazel* as his right; a cherub tall.”

Par. Lost, b. i. v. 534.

† See *Canaan*, *Aaron*, and *Israel*.

‡ *Bethphage*.—This word is generally pronounced by the illiterate in two syllables, and without the second *h*, as if written *Bethl-page*.

* *Canaan*.—This word is not unfrequently pronounced in three syllables, with the accent on the second. But Milton, who in his *Paradise Lost* has introduced this word six times, has constantly made it two syllables, with the accent on the first. This is perfectly agreeable to the syllabication and accentuation of *Isaac* and *Balaam*, which are always heard in two syllables. This suppression of a syllable in the latter part of these words arises from the absence of accent: an accent on the second syllable would prevent the hiatus arising from the two vowels, as it does in *Baal* and *Baalim*, which are always heard in two and three syllables respectively.—See ADONAI.

† *Capernaum*.—This word is often, but improperly, pronounced with the accent on the penultimate.

‡ *Deborah*.—The learned editor of Labbe tells us, that this word has the penultimate long, both in Greek and Hebrew; and yet he observes that our clergy, when reading the Holy Scriptures to the people in English, always pronounce it with the accent on the first syllable; "and why not," says he, "when they place the accent on the first syllable of *orator*, *auditor*, and *successor*?" "But," continues he, "I suppose they accent them otherwise when they speak Latin." Who doubts it?

* *Israel*.—This word is colloquially pronounced in two syllables, and not unfrequently heard in the same manner from the pulpit. The tendency of two vowels to unite, when there is no accent to keep them distinct, is the cause of this corruption, as in *Canaan, Isaac*, &c.; but, as there is a greater difficulty in keeping separate two unaccented vowels of the same kind, so the latter corruption is more excusable than the former; and therefore, in my opinion, this word ought always in public pronunciation, especially in reading the Scripture, to be heard in three syllables. Milton introduces this word four times

in his *Paradise Lost*, and constantly makes it two syllables only. But those who understand English prosody know, that we have a great number of words which have two distinct impulses, that go for no more than a single syllable in verse, such as *heaven, given*, &c.: *higher* and *dyer* are always considered as dissyllables; and *hire* and *dire*, which have exactly the same quantity to the ear, but as monosyllables. *Israel*, therefore, ought always, in deliberate and solemn speaking, to be heard in three syllables. The same may be observed of *Raphael* and *Michael*.

* *Raphael*.—This word has uniformly the accent on the first syllable throughout Milton, though Græcised by *Ῥαφαήλ*; but the quantity is not so invariably settled by him; for, in his *Paradise Lost*, he makes it four times of three syllables, and twice of two. What is observed under *Israhel* is applicable to this word. Colloquially, we may pronounce it in two, as if written *Raphel*; but in deliberate and solemn speaking or reading, we ought to make the two last vowels to be heard separately and distinctly. The same may be observed of *Michael*, which Milton, in his *Paradise Lost*, uses six times as a word of three syllables, and eighteen times as a word of two only.

† *Sabathani*.—Some, says the editor of Labbe, place the accent on the antepenultimate syllable of this word, and others on the penultimate: this last pronunciation, he says, is most agreeable to the Hebrew word, the penultimate of which is not only long, but accented; and, as this word is Hebrew, it is certainly the preferable pronunciation.

† *Sabaath*.—This word should not be confounded in its pronunciation with *Sabbath*, a word of so different a signification. *Sabaath* ought to be heard in three syllables, by keeping the *a* and *o* separate and distinct. This, it must be confessed, is not very easy to be done, but is absolutely necessary to prevent a very gross confusion of ideas, and a perversion of the sense.

§ *Satan*.—There is some dispute, among the learned, about the quantity of the second syllable of this word, when Latin or Greek, as may be seen in Labbe, but none about the first. This is acknowledged to be short, and this has induced those critics who have great knowledge of Latin, and very little of their own language, to pronounce the first syllable short in English, as if written *Sattan*. If these gentlemen have not perused the Principles of Pronunciation, prefixed to the Critical Pronouncing Dictionary, I would take the liberty of referring them to what is there said, for full satisfaction, for whatever relates to deriving English quantity from the Latin. But for those who have not an opportunity of inspecting that work, it may, perhaps, be sufficient to observe, that no analogy is more universal than that which, in a Latin word of two syllables, with but one consonant in the middle,

and the accent on the first syllable, leads us to pronounce that syllable long. This is, likewise, the genuine pronunciation of English words of the same form; and, where it has been counteracted, we find a miserable attempt to follow the Latin quantity in the English word, which we entirely neglect in the Latin itself, (see *Introduction*, page 1059.) *Cato* and *Plato* are instances where we make the vowel *a* long in English, where it is short in Latin, and *caligo* and *cogito*, where we make the *a* and *o* in the first syllable short in English, when it is long in Latin. Thus, if a word of two syllables, with one consonant in the middle, and the accent on the first, which, according to our own vernacular analogy, we should pronounce as we do *Cato* and *Plato*, with the first vowel long; if this word happens to be derived from a word of three syllables in Latin, with the first short, this is looked upon as a good reason for shortening the first syllable of the English word, as in *magick*, *placid*, *tepid*, &c., though we violate this rule in the pronunciation of the Latin words *caligo*, *cogito*, &c., which, according to this analogy, ought to be *cal-e-i-go*, *cog-e-i-to*, &c., with the first syllable long.

This pedantry, which ought to have a harsher title, has considerably hurt the sound of our language, by introducing into it too many short vowels, and consequently rendering it less flowing and sonorous. The tendency of the penultimate accent to open and lengthen the first vowel in dissyllables, with but one consonant in the middle, in some measure counteracts the shortening tendency of two consonants, and the almost invariable shortening tendency of the antepenultimate accent; but this analogy, which seems to be the genuine operation of nature, is violated by these ignorant critics from the pitiful ambition of appearing to understand Latin. As the first syllable, therefore, of the word in question, has its first vowel pronounced short for such miserable reasons as have been shown, and this short pronunciation does not seem to be general, as may be seen under the word in the Critical Pronouncing Dictionary, we ought certainly to incline to that pronunciation which is so agreeable to the analogy of our own language, and which is, at the same time, so much more pleasing to the ear.—See *Principles* prefixed to the *Critical Pronouncing Dictionary*, No. 543, 544, &c., and the words *DRAMA* and *SATIRE*.

* *Siloe*.—This word, according to the present general rule of pronouncing these words, ought to have the accent on the second syllable, as it is Græcised by Σιλωά; but Milton, who understood its derivation as well as the present race of critics, has given it the antepenultimate accent, as more agreeable to the general analogy of accenting English words of the same form:

“———Or if Sion hill
“Delight thee more, or *Siloe's* brook that flow'd
“Fast by the oracle of God———”

If criticism ought not to overturn settled usages, surely when that usage is sanctioned by such a poet as Milton, it ought not to be looked upon as a license, but an authority.

With respect to the quantity of the first syllable, analogy requires that, if the accent be on it, it should be short.—See Rules prefixed to the *Greek and Latin Proper Names*, No. 19.

† *Sinai*.—If we pronounce this word after the Hebrew, it has three syllables; if after the Greek, Σινά, two only; though it must be confessed, that the liberty allowed to poets of increasing the end of a line with one,

and sometimes two syllables, renders their authority, in this case, a little equivocal. Labbe adopts the former pronunciation, but general usage seems to prefer the latter; and, if we almost universally follow the Greek in other cases, why not in this? Milton adopts the Greek:

“Sing, heav'nly muse! that on the secret top
“Of Oreb or of *Sinai* didst inspire
“That shepherd———”
“God, from the mount of *Sinai*, whose gray top
“Shall tremble, he, descending, will himself,
“In thunder, lightning, and loud trumpets' sound,
“Ordain them laws.”

Par. Lost, b. xii. v. 227.

We ought not, indeed, to lay too much stress on the quantity of Milton, which is often so different in the same word; but these are the only two passages in his *Paradise Lost* where this word is used; and, as he has made the same letters a diphthong in *Asmadai*, it is highly probable he judged that *Sinai* ought to be pronounced in two syllables.—See Rules prefixed to this Vocabulary, No. 5.

* *Zabulon*.—"Notwithstanding," says the editor of Labbe, "this word in Greek, *Ζαβουλων*, has the penultimate long, yet in our churches we always hear it without the acute on the antepenultimate. Those who thus pronounce it plead that, in Hebrew, the penultimate vowel is short; but in the word *Zerobabel*, *Ζεροβαβελ*, they follow a different rule; for, though the penultimate in Hebrew is long, they pronounce it with the antepenultimate accent."

‡ Words of this termination have the accent of the

words from which they are formed, and on this account are sometimes accented even on the preantepenultimate syllable; as *Bethlehemite*, from *Bethlehem*, and so of others. Words of this termination, therefore, of two syllables, have the accent on the penultimate syllable; and words of three or more, on the same syllable as their primitives.—See Rule 8th.

NOTICES

RESPECTING

WALKER'S PRONUNCIATION OF SEVERAL PROPER NAMES.

BY comparing Walker's 5th Rule for pronouncing Greek and Latin Proper Names, and his 9th Rule for pronouncing Scripture Proper Names, with his Notes, in the Terminational Vocabulary, on the terminations *eia* and *eius*, a manifest inconsistency will be perceived. A similar inconsistency is also found in his mode of placing the accent, in words of these terminations, in the Initial Vocabulary. The following words he has accented thus;—*Ale'ius*, *Alphe'ius*, *En'eia*, *Apule'ia*, *Apule'ius*, *Aquile'ia*, *Atte'ius*, *Canule'ia*, *Canule'ius*, *Deiope'ia*, *Dryope'ia*, *Hyge'ia*, *Luce'ia*, *Nere'ius*, *Nise'ia*, *Nyse'ius*, *Oce'ia*, *Paror'e'ia*, *Pelopelia*, *Phille'ius*, *Te'ia*, *Te'ius*, *Ve'ia*, *Ve'ii*, *Velle'ius*, *Vulture'ius*;—and the following thus;—*Antei'us*, *Cartei'a*, *Petre'ius*, *Pompei'a*, *Pompei'us*, *Pompei'us*, *Procule'ius*, *Sale'ius*, *Sature'ium*, *Sature'ius*, *Saufe'ius*, *Septimule'ius*, *Tarpei'a*, *Tarpei'us*. A part of these words are classed by Walker under the penultimate accent, and a part under the antepenultimate; but the difference of accentuation here exhibited does not correspond to his difference of classification. But, though Walker's remarks, as well as his practice, are inconsistent, yet he clearly expresses his preference for the pronunciation indicated by placing the accent on the letter *e*; as in the former part of the words above enumerated. This is also the accentuation of Scheller, in his Latin

and German Lexicon, of the Latin Gradus, and other authorities. An alteration has, therefore, been made in this edition, with regard to those words above mentioned, which have the accent on the letter *i*; and both classes of these words will be found to be accented, in the Initial Vocabulary, by the same rule.

In the Initial Vocabulary of *Greek and Latin Proper Names*, the word *Alexandria* had the accent on the penultimate, and *Syene* on the antepenultimate; but in the Initial Vocabulary of *Scripture Proper Names*, and in both of the Terminational Vocabularies, *Alexandria* has the antepenultimate, and *Syene* the penultimate accent. The accent of these, in the Initial Vocabulary, has been corrected. A similar inconsistency has been removed respecting the word *Heliogabalus*.

Amasa and *Mazzerath*, among the Scripture Names, were found to have the penultimate accent in the Initial Vocabulary, and the antepenultimate in the Terminational. The former has been altered. Other inconsistencies or errors, also, have been corrected.

To the word *Nemea* Walker gives the penultimate accent, as also does Labbe; but the penultimate syllable is short in *Virgil*, and is thus pronounced by the Latin Gradus, Holyoke, and Scheller. *Editor*.

ADVERTISEMENT.

AFTER the many learned pens which have been employed on the subject of the following Observations, the Author would have been much ashamed of obtruding his humble opinion on so delicate a point, had he not flattered himself that he had taken a material circumstance into the account, which had been entirely overlooked by almost every writer he had met with.

It is not a little astonishing, that, when the nature of the human voice forms so great a part of the inquiry into accent and quantity, its most marking distinctions should have been so little attended to. From a perusal of every

writer on the subject,* one would be led to suppose that high and low, loud and soft, and quick and slow, were the only modifications of which the voice was susceptible; and that the inflections of the voice, which distinguish speaking from singing, did not exist. Possessed, therefore, of this distinction of sounds, the Author at least brings something new into the inquiry: and if, even with this advantage, he should fail of throwing light on the subject, he is sure he shall be entitled to the indulgence of the learned, as they fully understand the difficulty of the question.

* The only exception to this general assertion is Mr. Steele, the author of *Prosodia Rationalis*; but the design of this gentleman is not so much to illustrate the accent and quantity of the Greek language, as to prove the possibility of forming a notation of speaking sounds for our own, and of reducing them to a musical scale, and accompanying them with instruments. The attempt is undoubtedly laudable, but no farther useful than to show the impossibility of it by the very method he has taken to explain it; for it is wrapped up in such an impenetrable cloud of music as to be unintelligible to any but mu-

sicians; and the distinctions of sound are so nice and numerous as to discourage the most persevering student from labouring to understand him. After all, what light can we expect will be thrown on this subject by one who, notwithstanding the infinitesimal distinctions he makes between similar sounds, says, that the *u* in *ugly*, and the *e* in *met* and *get*, are diphthongs; that the *a* in *may* is long, and the same letter in *nation* short; and that the *u* in *you, use, &c.*, is always acuto-grave, and the *i* in *idle, try, &c.*, grave-acute?

PREPARATORY OBSERVATIONS.

AS a perusal of the Observations on Greek and Latin Accent and Quantity requires a more intimate acquaintance with the nature of the voice than is generally brought to the study of that subject, it may not be improper to lay before the reader such an explanation of speaking sounds, as may enable him to distinguish between high and loud, soft and low, forcibleness and length, and feebleness and shortness, which are so often confounded, and which consequently produce such confusion and obscurity among our best prosodists.

But, as describing such sounds upon paper as have no definite terms appropriated to them, like those of music, is a new and difficult task, the reader must be requested to give as nice an attention as possible to those sounds and inflections of voice, which spontaneously annex themselves to certain forms of speech, and which, from their familiarity, are apt to pass unnoticed. But, if experience were out of the question, and we were only acquainted with the organick formation of human sounds, we must necessarily distinguish them into five kinds: namely, the monotone, or one sound continuing a perceptible time in one note, which is the case with all musical sounds; a sound beginning low and sliding higher, or beginning high and sliding lower, without any perceptible intervals, which is essential to all speaking sounds. The two last may be called simple slides or inflections; and these may be so combined as to begin with that which rises, and end with that which falls, or to begin with that which falls, and end with that which rises; and, if this combination of different inflections be pronounced with one impulse or explosion of the voice, it may not improperly be called the circumflex or compound inflection; and this monotone, the two simple and the two compound inflections, are the only modifications, independent on the passions, of which the human voice is susceptible.

The different States of the Voice.

The modifications of the voice, which have just been enumerated, may be called absolute; because they cannot be converted into each other, but must remain decidedly what they are; while different states of the voice, as high and low, loud and soft, quick and slow, are only comparative terms, since what is high in one case may be low in another, and so of the rest. Beside, therefore, the modifications of voice which have been described, the only varieties remaining, of which the human voice is capable, except those produced by the passions, are high, low, loud, soft, quick, slow, forcible, and feeble. Though high and loud, and low and soft, are frequently confounded, yet, when considered distinctly, their difference is easily understood; as, if we strike a large bell with a deep tone, though it gives a very loud tone, it will still be a low one; and if we strike a small bell with a high tone, it will still be a high tone, though the stroke be ever so soft: a quick tone in music is that in which the same tone continues but a short time, and a slow tone where it continues longer; but in speaking, a quick tone is that when the slide rises from low to high, or from high to low, in a short time, and a slow tone the reverse: while forcible and feeble seem to be severally compounded of two of these simple states; that is, force seems to be loudness and quickness, either in a high or low tone also; and feebleness seems to be softness and slowness, either in a high or a low tone likewise. As to the tones of the passions, which are so many and various, these, in the opinion of one of the best judges in the kingdom, are *qualities* of sound, occasioned by certain vibrations of the organs of speech, independent on high, low, loud, soft, quick, slow, forcible, or feeble: which last may not improperly be called different *quantities* of sound.

It may not, perhaps, be unworthy of observation, how few are these principles, which, by a different combination with each other, produce that almost unbounded variety of which human speech consists. The different quantities of sound, as these different states of the voice may be called, may be combined so as to form new varieties with any other that are not opposite to them. Thus high may be combined with either low or soft, quick or slow; that is, a high note may be sounded either in a loud

or a soft tone, and a low note may be sounded either in a loud or a soft tone also, and each of these tones may be pronounced either in a longer or a shorter time; that is, more slowly or quickly; while forcible seems to imply a degree of loudness and quickness, and feeble a degree of softness and slowness, either in a high or a low tone. These combinations may, perhaps, be more easily conceived by classing them in contrast with each other

High, loud, quick.

Low, soft, slow.

Forcible may be { high, loud, and quick; or
low, loud, and quick
Feeble may be { high, soft, and slow; or
low, soft, and slow.

The different combinations of these states may be thus represented:

| | |
|------------------------------|-----------------------------|
| High, loud, quick, forcible. | Low, loud, quick, forcible. |
| High, loud, slow. | Low, loud, slow. |
| High, soft, quick. | Low, soft, quick. |
| High, soft, slow, feeble. | Low, soft, slow, feeble. |

When these states of the voice are combined with the five modifications of voice above-mentioned, the varieties become exceedingly numerous, but far from being incalculable: perhaps they may amount (for I leave it to arithmeticians to reckon them exactly) to that number into which the ancients distinguished the notes of music, which, if I remember right, was about two hundred.

These different states of the voice, if justly distinguished and associated, may serve to throw some light on the nature of accent. If, as Mr. Sheridan asserts, the accented syllable be only louder, and not higher than the other syllables, every polysyllable is a perfect monotone. If the accented syllable be higher than the rest, which is the general opinion both among the ancients and moderns, this is true only when a word is pronounced alone, and without reference to any other word; for, when suspended at a comma, concluding a negative member followed by an affirmative, or asking a question beginning with a verb; if the unaccented syllable or syllables be the last, they are higher than the accented syllable, though not so loud. So that the true definition of accent is this: *If the word be pronounced alone, and without any reference to other words, the accented syllable is both higher and louder than the other syllables, either before or after it; but, if the word be suspended, as at the comma, if it end a negative member followed by an affirmative, or if it conclude an interrogative sentence beginning with a verb, in each case the accented syllable is louder and higher than the preceding, and louder and lower than the succeeding syllables.* This will be sufficiently exemplified in the following pages. In the mean time it may be observed, that, if a degree of swiftness enter into the definition of force, and the accented syllable be the most forcible, it follows that the accent does not necessarily lengthen the syllable, and that, if it fall on a long vowel, it is only a longer continuation of that force with which it quickly or suddenly commenced: for, as the voice is an efflux of air, and air is a fluid, like water, we may conceive a sudden gust of this fluid to continue either a longer or a shorter time, and thence form an idea of long or short quantity. If, however, this definition of force, as applied to accent, should be erroneous or imaginary, let it be remembered it is an attempt to form a precise idea of what has hitherto been left in obscurity; and that, if such an attempt should fail, it may at least induce some curious inquirer to show where it fails, and to substitute something better in its stead.

If these observations are just, they may serve to show how ill founded is the opinion of that infinite variety of voice of which speaking sounds consist. That a wonderful variety may arise from the key in which we speak, from the force or feebleness with which we pronounce, and from the tincture of passion or sentiment we infuse into the words, is acknowledged: but, speak in what key we will, pronounce with what force or feebleness we please, and infuse whatever tincture of passion or sentiment we can imagine into the words, still they must

necessarily be pronounced with one of the foregoing modifications of the voice. Let us go into whatever twists or zig-zags of tone we will, we cannot go out of the boundaries of these inflections. These are the outlines on which all the force and colouring of speech is laid; and these may be justly said to form the first principles of speaking sounds.

Exemplification of the different Modifications of the Voice. The Monotone, the Rising Inflection, the Falling Inflection, the Rising Circumflex, and the Falling Circumflex.

Though we seldom hear such a variety in reading or speaking as the sense and satisfaction of the ear demand, yet we hardly ever hear a pronunciation perfectly monotonous. In former times, we might have found it in the midnight pronunciation of the belman's verses at Christmas; and now the town crier, as Shakspeare calls him, sometimes gives us a specimen of the monotonous in his vociferous exordium—"This is to give notice!" The clerk of a court of justice also promulgates the will of the court by that barbarous metamorphosis of the old French word *Oyez! Oyez!* Hear ye! Hear ye! into *O yes! O yes!* in a perfect sameness of voice. But, however ridiculous the monotone in speaking may be in the above-mentioned characters, in certain solemn and sublime passages in poetry, it has a wonderful propriety, and, by the uncommonness of its use, it adds greatly to that variety with which the ear is so much delighted.

This monotone may be defined to be a continuation or sameness of sound upon certain words or syllables, exactly like that produced by repeatedly striking a bell: such a stroke may be louder or softer, but continues in exactly the same pitch. To express this tone, a horizontal line may be adopted; such a one as is generally used to signify a long syllable in verse. This tone may be very properly introduced in some passages of Akenside's *Pleasures of Imagination*, where he so finely describes the tales of horror related by the village matron to her infant audience—

"Breathing astonishment! of witching rhymes
And evil spirits; of the death-bed call
To him who robb'd the widow, and devour'd
The orphan's portion; of unquiet souls
Ris'n from the grave to ease the heavy guilt
Of deeds in life conceal'd; of shapes that walk
At dead of night, and clank their chains, and wave
The torch of hell around the murder's bed."

If the words "of shapes that walk at dead of night" be pronounced in a monotone, it will add wonderfully to the variety and solemnity of the passage.

The rising inflection is that upward turn of the voice we generally use at the comma, or in asking a question beginning with a verb; as, *Nó, say you? did he say Nó.* This is commonly called a suspension of voice, and may not improperly be marked by the acute accent, thus (').

The falling inflection is generally used at the semicolon and colon, and must necessarily be heard in answer to the former question: *He did;* he said *Nó.* This inflection, in a lower tone of voice, is adopted at the end of almost every sentence, except the definite question, or that which begins with the verb. To express this inflection, the grave accent seems adapted, thus (').

The rising circumflex begins with the falling inflection, and ends with the rising upon the same syllable, and seems, as it were, to twist the voice upwards. This inflection may be exemplified by the drawling tone we give to some words spoken ironically; as the word *Clodius* in Cicero's Oration for Milo. This turn of voice may be marked in this manner (*):

"But it is foolish in us to compare Drusus Africanus and ourselves with Clódius; all our other calamities were tolerable, but no one can patiently bear the death of Clódius."

The falling circumflex begins with the rising inflection, and ends with the falling upon the same syllable, and seems to twist the voice downwards. This inflection seems generally to be used in ironical reproach; as on the word *you* in the following example:

"So then you are the author of this conspiracy against me; It is to you that I am indebted for all the mischief that has befallen me?"

If to these inflections we add the distinction of a phrase into accentual portions; as

Prosperity | gains friends | and adversity | tries them, |
and pronounce *friends* like an unaccented syllable of *gains*; and like an unaccented syllable of *adversity*, and *them* like an unaccented syllable of *tries*; we have a clear idea of the relative forces of all the syllables, and approximate closely to a notation of speaking sounds.

OBSERVATIONS

ON THE

GREEK AND LATIN ACCENT, &c.

1. IN order to form an idea of the Accent and Quantity of the dead languages, it will be necessary, first, to understand what we mean by the accent and quantity of our own language: * and, as quantity is supposed by some to regulate the accent in English, as well as in Greek and Latin, it will be necessary first to inquire, what we mean by long and short vowels; or, as some are pleased to term them, syllables.

2. In English, then, we have no conception of quantity arising from any thing but the nature of the vowels, as they are pronounced long or short. Whatever retardation of voice in the sound of a vowel there might be in Greek and Latin before two consonants, and those often twin consonants, we find every vowel in this situation as easily pronounced short as long; and the quantity is found to arise from the length or shortness we give to the vowel, and not from any obstruction of sound occasioned by the succeeding consonants. Thus the *a* in *banish*, *banner*, and *banter*, is short in all these words, and long in *paper*, *taper*, and *vapour*: the *i* long in *miser*, *miner*, and *mitre*, and short in *misery*, *middle*, and *mistress*; and so of the rest of the vowels; and, though the accent is on the first syllable of all these words, we see it perfectly compatible with either long or short quantity.

3. As a farther proof of this, we may observe, that unaccented vowels are frequently pronounced long when the accented vowels are short. Thus the *e* in *Cicero*, in English as well as in Latin pronunciation, is long, though

unaccented; and the *i* short, though under the accent. The same may be observed of the name of our English poet *Lillo*. So in our English words *côn.ave. réconcile*, *châmmole*, and the substantives *cônfine*, *pérfume*, and a thousand others, we see the first accented syllable short, and the final unaccented syllable long. Let those who contend that the acute accent and long quantity are inseparable, call the first vowels of these words long, if they please; but, by those who make their ear, and not their eye, the judge of quantity, when compared with the last vowels, they will always be esteemed short.†

4. The next object of inquiry is, What is the nature of English accent? Mr. Sheridan,† with his usual decision, tells us, that accent is only a greater force upon one syllable than another, without any relation to the elevation or depression of the voice; while almost every other writer on the subject makes the elevation or depression of the voice inseparable from accent. When words are pronounced in a monotone, as the bellman repeats his verses, the crier pronounces his advertisement, or the clerk of a church gives out the psalm, we hear an *ictus* or accentual force upon the several accented syllables, which distinguishes them from the others, but no more variety of tone than if we were to beat the syllables of the same words upon a drum, which may be louder or softer, but cannot be either higher or lower. This is pronouncing according to Mr. Sheridan's definition of accent: and this pronunciation certainly comes under the definition of singing: it is singing ill, indeed, as Julius Cæsar said

* It is not surprising, that the accent and quantity of the ancients should be so obscure and mysterious, when two such learned men, of our own nation, as Mr. Forster and Dr. Gally differ about the very existence of quantity in our own language. The former of these gentlemen maintains, that "the English has both accent and quantity, and that no language can be without them;" but the latter asserts, that, "in the modern languages, the pronunciation doth not depend upon a natural quantity, and therefore a greater liberty may be allowed in the placing of accents." And in another place, speaking of the northern languages of Europe, he says, that "it was made impossible to think of establishing quantity for a foundation of harmony in pronunciation. Hence it became necessary to lay aside the consideration of quantity, and to have recourse to accents." "In these and some other passages, that writer," says Forster, "seems to look upon accents as alone regulating the pronunciation of English, and quantity as excluded from it."—*Forster's Essay on Accent and Quantity*, page 28.

As a farther proof of the total want of ear in a great Greek scholar—Lord Monboddo says, "Our accents differ from the Greek in two material respects: First, they are not appropriated to particular syllables of the word, but are laid upon different syllables, according to the fancy of the speaker, or rather as it happens; for I believe no man speaking English does, by choice, give an accent to one syllable of a word different from that which he gives to another."

"Two things, therefore, that, in my opinion, constitute our verse, are the number of syllables, and the mixture of loud and soft, according to certain rules. As to quantity, it is certainly not essential to our verse, and far less is accent."—See Steele's *Prossodia Rationalis*, page 103, 110.

† A late very learned and ingenious writer tells us, that our accent and quantity always coincide; he objects to himself the words *enrify*, *magnify*, *qualify*, &c., where the final syllable is longer than the accented syllable; but this, he asserts, with the greatest probability, was not the accentuation of our ancestors, who placed the accent on the last syllable, which is naturally the longest. But this sufficiently proves, that the accent does not necessa-

rily lengthen the syllable it falls on; that is, if length consists in pronouncing the vowel long, which is the natural idea of long quantity, and not in the duration of the voice upon a short vowel, occasioned by the retardation of sounding two succeeding consonants, which is an idea, though sanctioned by antiquity, that has no foundation in nature; for who, that is not prejudiced by early opinion, can suppose the first syllable of *elbow* to be long, and the last short?—See *Essay on Greek and Latin Prosodies*.—Printed for Robson.

† The term (accent) with us has no reference to inflections of the voice, or musical notes, but only means a peculiar manner of distinguishing one syllable of a word from the rest.—*Lectures on Elocution*, quarto edition, page 41.

To illustrate the difference between the accent of the ancients and that of ours, (says Mr. Sheridan,) let us suppose the same movements beat upon the drum, and sounded by the trumpet. Take, for instance, a succession of words, where the accent is on every second syllable, which forms an iambick movement; the only way by which a drum (as it is incapable of any change of notes) can mark that movement, is by striking a soft note first, followed by one more forcible, and so in succession. Let the same movement be sounded by the trumpet in an alternation of high and low notes, and it will give a distinct idea of the difference between the English accent and those of the ancients.—*Art of Reading*, page 75.

I am sorry to find one of the most ingenious, learned, and candid inquirers into this subject, of the same opinion as Mr. Sheridan. The authority of Mr. Nares would have gone near to shake my own opinion, if I had not recollected, that this gentleman confesses he cannot perceive the least of a diphthongal sound in the *i* in *strike*, which Dr. Wallis, he observes, excludes from the simple sounds of the vowels. For, if the definition of a vowel sound be, that it is formed by one position of the organs, nothing can be more perceptible than the double position of them in the present case, and that the noun *eye*, which is perfectly equivalent to the pronoun *I*, begins with the sound of a *i* in *father*, and ends in that of *e* in *equal*.—See Nares's *English Orthoëpy*, page 2, 144.

OBSERVATIONS ON THE GREEK AND LATIN ACCENT.

of a bad reader,—but still it is singing, and therefore essentially different from speaking: for, in speaking, the voice is continually *sliding* upwards or downwards; and, in singing, it is *leaping*, as it were, from a lower to a higher, or from a higher to a lower note: the only two possible ways of varying the human voice with respect to elevation or depression; so that, when we are told, by some writers on this subject, that the speaking of the ancients was a *kind* of singing, we are led into the error of supposing, that singing and speaking differ only in degree, and not in kind; whereas they are just as different as motion and rest.*

5. Whenever in speaking we adopt a singing tone, (which was formerly the case with Puritan preachers,) it differs essentially from speaking, and can be picked down upon paper, and be played upon a violin; and whenever in singing we adopt a speaking tone, the slide of this tone is so essentially distinct from singing, as to shock the ear like the harshest discord. Those, therefore, who rank recitative as a medium between singing and speaking, are utterly ignorant of the nature of both. Recitative is just as much singing as what is called air, or any other species of musical composition.

6. If we may have recourse to the eye, the most distinct and definite of all our senses, we may define musical notes to be horizontal lines, and speaking tones oblique lines: the one rises from low to high, or falls from high to low, by distinct intervals, as the following straight lines

to the eye; — — — the other slides upwards or down-

wards, as the following oblique lines;  nor is

the one more different to the eye, than the other is to the ear. Those, therefore, who gravely tell us, that the enunciation of the ancients was a kind of musical speaking, impose upon us with words to which we can annex no ideas; and when they attempt to illustrate this musico-speaking pronunciation, by referring us to the Scotch and other dialects, they give us a rhetorical flourish instead of a real example; for, however the Scotch and other speakers may draw out the accent, and give the vowel a greater length than the English, it is always

* It is not denied, that the slides in speaking may sometimes leap, as it were, from a low to a high, or from a high to a low note; that is, that there may be a very considerable interval between the end of one of those slides and the beginning of another; as between the high note in the word *no* in the question, *Did he say No?* and the low note which the same word may adopt in the answer, *No, he did not*. But the sound which composes the note of speaking, as it may be called, and the sound which composes the note of singing, are essentially distinct; the former is in continual motion, while the latter is for a given time at rest.—See Note to sect. 23.

† How the ancients could make every monosyllable accented, (that is, according to their definition of accent, pronounced with an elevated tone of voice,) without telling us how this elevation happened, whether it was an elevation of one part of the syllable above the other, or the elevation of one word or syllable above other words or syllables,—how these distinctions, I say, so absolutely necessary to a precise idea of accent, should never be once mentioned, can be resolved into nothing but that attachment to words without ideas, and that neglect of experiment, which have involved the moderns in the same mist of ignorance and error.

‡ That excellent scholar, Mr. Forster, furnishes an additional instance of the possibility of uniting a deep and accurate knowledge of what is called the prosody of the ancients, with a total ignorance of the accent and quantity of his own language. After a thousand examples to show how the English is susceptible of every kind of metre among the ancients, (though in all his examples he substitutes English *accent* for Greek and Latin *quantity*,) he proceeds to show the difference between the English, the Irish, and the Scotch pronunciation:—

“The English join the acute and long time together, as in *liberty*; *y* short. The Scotch observe our quantity, and alter our accent, *liberty*!; *y* short. When I say they observe our quantity, I mean, they pronounce the same syllable long which we do, but they make it longer. In respect to the circumflex, with which their pronunciation abounds, it may be remarked, that it is not formed, as the Greek, Latin, and English, of an acute and grave, but of a grave and acute, *voûs*, *rôs*, *rôund*, English; *rôund*, Scotch.

“The Irish observe our quantity and accent too, but with a greater degree of spirit or emphasis, which Scaliger calls *afflatio in latitudine*, giving to most syllables an aspiration.”—*Essay on Accent and Quantity*, page 75

in an oblique, and not in a straight line; for, the moment the straight line of sound, or the monotone, is adopted, we hear something essentially distinct from speaking.

7. As high and low, loud and soft, forcible and feeble, are comparative terms, words of one syllable pronounced alone, and without relation to other words or syllables, cannot be said to have any accent.† The only distinction, to which such words are liable, is an elevation or depression of voice, when we compare the beginning with the end of the word or syllable. Thus a monosyllable, considered singly, rises from a lower to a higher tone in the question *No?* which may therefore be called the acute accent, and falls from a higher to a lower tone upon the same word in the answer *No*, which may therefore be called the grave. But when the accented word or syllable is associated with unaccented words or syllables, the acute accent is louder and higher than the preceding, and louder and lower than the succeeding syllables, as in the question, *Satisfactorily did he say?* and the grave accent both louder and higher than either the preceding or succeeding syllables in the answer, *He said satisfactorily*. Those who wish to see this explained more at large, may consult *Elements of Elocution*, page 183; or *Rhetorical Grammar*, 3d edit., page 77.

8. This idea of accent is so evident, upon experiment, as to defy contradiction; and yet, such is the general ignorance of the modifications of the voice, that we find those, who pretend to explain the nature of accent the most accurately, when they give us an example of the accent in any particular word, suppose it always pronounced affirmatively and alone;‡ that is, as if words were always pronounced with one inflection of voice, and as if there were no difference, with respect to the nature of the accent, whether the word is an affirmation or a question, in one part of the sentence or in another; when nothing can be more palpable, to a correct ear, than that the accents of the word *voluntary*, in the following sentences, are essentially different:

His resignation was *voluntary*.
He made a *voluntary* resignation.

In both, the accent is on the first syllable. In the first sentence, the accented syllable is higher and louder than

Mr. Forster falls exactly into the mistake of Mr. Sheridan, though he has a quite different idea of accent. He supposes *liberty* always pronounced by an Englishman in one manner, and that as a single word, or at the end of a sentence: he has not the least notion of the different inflection the same word may have, accordingly as the accent is differently inflected, as we may plainly perceive in the following question: Is it *liberty* or licentiousness you plead for? where the English raise the voice on the latter syllable, as the Scotch too frequently do. With respect to the quantity of the first syllable, which Mr. Forster says the Scotch preserve in this word, I must dissent from him totally; for they preserve the accent and alter the quantity, by pronouncing the first syllable as if written *leeberty*. If Mr. Forster calls this syllable long in the English pronunciation of it, I should be glad to be told of a shorter accented syllable than the first of *liberty*: if he says the accent being on it renders it long, I answer, this subverts his whole system; for if accent, falling on any vowel, makes it long, the quantity of the Greek and Latin is overturned, and *cane*, in the first line of the *Æneid*, must be a spondee.

This is the consequence of entering on the discussion of a difficult point without first defining the terms: nothing but confusion and contradiction can ensue.

But I must give this writer great credit for his saying the Scotch pronunciation abounds with the circumflex; for this is really the case; and the very circumflex opposite to the Greek and Latin, beginning with the grave and ending with the acute. I am not, however, a little astonished that this did not show him how deficient the ancients were in this modification of the voice, which, though used too frequently in Scotland, is just as much in the human voice as the other circumflex; and may be and is often, used in England with the utmost propriety. With respect to the common circumflex on Greek, Latin, and some French words, the accidental use of it is quite unknown, and it only stands for long quantity; but both these circumflexes are demonstrable upon the human voice in speaking, and may be made as evident by experiment as the stress of an accented syllable by pronouncing the word on which it is placed.—See *Rhetorical Grammar*, 3d edit., page 80.

I must just take notice of the inaccuracy of Mr. Forster in saying the last syllable of *liberty* is short, and yet that it has the circumflex accent: this is contrary to all the prosody of antiquity, and contrary to the truth of the case in this instance; for it is the length of the first syllable, arising from the circumflex on it, which distinguishes the Scotch from the English pronunciation.

OBSERVATIONS ON THE GREEK AND LATIN ACCENT.

In other syllables; and, in the second, it is louder and lower than the rest. The same may be observed of the following question:

Was his resignation *voluntary* or *involuntary*?

where the first syllable of the word *voluntary* is louder and lower than the succeeding syllables; and in the word *involuntary* it is louder and higher. Those, who have not ears sufficiently delicate to discern this difference, ought never to open their lips about the acute or grave accent, as they are pleased to call them; let them speak of accent as it relates to stress only, and not to elevation or depression of voice, and then they may speak intelligibly.

9. A want of this discernment has betrayed Mr. Forster into obscurity and contradiction. To say nothing of his asserting that the English, Irish, and Scotch accents differ, (where accent cannot possibly mean stress, for then English verse would not be verse in Ireland and Scotland,) what shall we think of his telling us, that in England we pronounce the word *majesty** with an acute accent and long quantity upon the first syllable, and the two last syllables with the grave accent and short quantity; and that in Scotland this word is pronounced with a grave accent and long quantity on the first syllable, and with an acute accent and short quantity on the last? Now, if by accent be meant stress, nothing is more evident than that the English and Scotch, with the exception of very few words, place the accent on the same syllable; but, if elevation be included in the idea of accent, it is as evident that the English pronounce the first syllable louder and higher than the two last, when they pronounce the word either singly or as ending a sentence; as,

He spoke against the king's *májesty*:

and louder and lower than the two last, when it is the last accented word but one in a sentence; as,

He spoke against the *májesty* of the king:

or when it is the last word in asking a question beginning with a verb; as,

Did he dare to speak against the king's *májesty*?

10. Where, then, is the difference, it will be asked, between the English and Scotch pronunciation? I answer, precisely in this: that the Scotch are apt to adopt the rising circumflex and long quantity where the English use the simple rising inflection and short quantity. Thus in the word *majesty*, as well as in every other of the same form, they generally adopt the rising inflection, as in the two last sentences, whether it end a question beginning with a verb, as, "Is this the picture of his *májesty*?" or whether it end an affirmative sentence, as, "This is the picture of his *májesty*." And it is the prevalence of this long quantity with the rising inflection, that forms the principal difference between the English and Scotch pronunciation.

11. Having thus endeavoured to ascertain the accent and quantity of our own language, let us next inquire into the nature of the accent and quantity of the ancients.†

* Would not any one suppose, that, by Mr. Forster's producing this word as an example of the English accent, the English always pronounce it one way, and that as if it ended a declarative sentence? This is exactly like the mistake of Priscian in the word *natura*.—See sect. 20, in the Notes.

† So much are the critics puzzled to reconcile the tragick and comick verses of the ancients to the laws of metre, that a learned writer in the *Monthly Review*, for May 1762, speaking of the corrections of Dr. Heath, in his notes or readings of the old Greek tragedies, says—

"These emendations are much more excusable than such as are made merely for the sake of the metre, the rules of which are so extremely vague and various, as they are laid down by the metrical critics, that, we will venture to say, any chapter in *Robinson Crusoe* might be reduced to measure by them. This is not conjecture: the thing shall be proved:—

12. The long quantity of the ancients must arise either from a prolongation of the sound of the vowel, or from that delay of voice which the pronunciation of two or more consonants in succession are supposed naturally to require. Now, vowels were said to be either long by nature, or long by position. Those long by nature† were such as were long, though succeeded by a single consonant, as the *u* in *natura*, and were a sort of exception to the general rule; for a vowel before a single consonant was commonly short, as in every *u* in the word *tumulus*. Those vowels, which were long by position, were such as were succeeded by two or more consonants, as the *a* in *eposus*; but, if the long and short quantity of the ancients was the same distinction of the sound of the vowel as we make in the words *cadence* and *magick*, calling the first *a* long, and the second short, then the *a* in *mater* and *pater* must have been pronounced like our *a* in *later* and *latter*; and those vowels which were long by position, as the *a* in *Bacchus* and *canopus*, must have been sounded by the ancients as we hear them in the English words *bake* and *came*.

13. If, therefore, the long quantity of the ancients were no more than a retardation of voice on the consonants, or that duration of sound which an assemblage of consonants is supposed naturally to produce, without making any alteration in the sound of the vowel, such long quantity as this an English ear has not the least idea of. Unless the sound of the vowel be altered, we have not any conception of a long or short syllable; and the first syllables of *banish*, *banner*, and *banter*, have, to our ears, exactly the same quantity.

14. But, if the long quantity of the ancients arose naturally from the obstruction the voice meets with in the pronunciation of two or more consonants, does not then it happen that the preceding consonants do not lengthen the vowel as much as those which succeed it? Dr. Gally tells us, the reason of this is, "that the vowel being the most essential part of the syllable, the voice hastens to seize it; and, in order to do this, it slurs over all the consonants that are placed before it, so that the voice suffers little or no delay. But the case of the consonant that follows is not the same: it cannot be slurred over, but must be pronounced full and distinct, otherwise it would run into and be confounded with the following syllable. By this means the voice is delayed more in the latter than in the former part of the syllable, and $\sigma\rho\alpha$ is longer than $\sigma\rho\alpha\alpha$, and $\gamma\eta$ longer than $\Sigma\gamma\eta\alpha$."

I must own myself at a loss to conceive the force of this reasoning: I have always supposed the consonant, when it forms part of a syllable, to be as essential to its sound as the vowel: nor can I conceive why the latter consonants of a syllable may not be pronounced as rapidly as the former, without running the former syllable into the latter, and thus confounding them together; since no such confusion arises when we end the first syllable with the vowel, and begin the following syllable with the consonants, as *pro-crastino*, *pro-stratus*, &c., as in this case there is no consonant to stop the first syllable, and prevent its running into the second: so that Dr. Gally seems to have slurred over the matter rather than to have explained it: but, as he is the only writer who has attempted to account for the manner in which quantity is produced by consonants, he is entitled to attention.

15. In the first place, then, in words of more than one syllable, but one consonant can belong to the preceding vowel, as the others must necessarily be considered as belonging to the succeeding vowel; and, according to Dr. Gally, must be hurried over, that the voice may seize its favourite letter. As one consonant, therefore, does not naturally produce long quantity, where is the delay if the other consonants are hurried over? and, consequently, where is the long quantity which the delay is supposed to produce? This is like adding two nothings together to produce a something.

† If the long quantity of the Greek and Latin arose naturally from the retardation of sound occasioned by the succeeding consonants, the long vowels, in this situation, ought to have been termed long by nature; and those long vowels which come before single consonants should have been called long by custom; since it was nothing but custom made the vowel *e* in *decus* (honour) short, and in *dedo* (to give) long; and the vowel *o* in *ovum* (an egg) long, and in *ovo* (to triumph) short.

§ I do not here enter into the question concerning the ancient sound of the Latin *a*, which I am convinced was like our *a* in *water*; but whether it were like the *a* in *paper*, *father*, or *water*, is not of any importance in the present question; the quantity is the same, supposing it to have been any one of them.

|| "Dissertation against pronouncing the Greek Language according to Accents."—Dissert. ii., page 50, second edition.

16. But what does he mean by the necessity there is of pronouncing the latter consonant full and distinct, that it may not run into, and be confounded with, the following syllable? Must not every consonant be pronounced full and distinct, whether we pronounce it rapidly or slowly, whether before or after the vowel? Is not the *str* in *stramen* pronounced as full and distinct as the same letters in *castra*, *castrametor*, &c.? I know there is a shadow of difference by pronouncing the vowel in our short English manner so as to unite with the *s*, as if written *cass*; but, if we make the preceding vowel long, as in *case*, and, according to the rules of syllabication laid down by Ramus, Ward, and the Latin grammarians, carry the consonants to the succeeding syllable, as if written *cas-stray*, we find these consonants pronounced exactly in the same manner: and this leads us to suppose that double consonants were the signs only, and not the efficient, of long quantity; and that this same long quantity was not simply a duration of sound upon the consonants, but exactly what we call long quantity—a lengthening of the sound by pronouncing the vowel open, as if we were to pronounce the *a* long in *mater*, by sounding it as if written *mayter*; and the same letter short in *pater*, as if it were written *patter*.*

17. The reason of our repugnance to admit of this analogy of quantity in the learned languages is, that a diametrically opposite analogy has been adopted in the English, and, I believe, in most modern tongues—an analogy which makes the vowel long before one consonant, and short before more than one.

18. If, however, the quantity of the ancients lay only in the vowel, which was lengthened and shortened in our manner by altering the sound, how strange must have been their poetical language, and how different from the words taken singly! Thus the word *nec*, which, taken singly, must have been pronounced with the vowel short, like our English word *neck*—in composition, as in the line of Virgil, where it is long,

“Fulgura, nec diri toties arserè cometæ;”

must have been pronounced as if written *neck*; just as differently as the words *proper*, *of*, *mankind*, *is*, and *man*, in the line of Pope, would be pronounced by the same rule,—

“The proper study of mankind is man;”

and as if written,

“The proeper study ove mane-kind ees mane.”

When to this alteration of the quantity, by the means of succeeding consonants, we add that rule—

“Finalem cæsura brevem producere gaudet,”—

which makes the short or doubtful vowel long, that either immediately precedes the cæsura, or concludes the hexameter verse—what must be to our astonishment at this very different sound of the words arising merely from a different collocation of them, and at the strange variety and ambiguity to the ear this difference must occasion!†

19. But, if this system of quantity among the ancients appears strange and unaccountable, our wonder will not

* What exceedingly corroborates this idea of quantity is, the common or doubtful vowels, as they are called; that is, such as come before a mute and a liquid, as the first *a* in *patria*, the *e* in *refluo*, &c.; as in these words the vowel preceding the mute and liquid is either long or short, as the writer or speaker pleases to make it; but, if the consonants naturally retarded the sound of the syllable, so as to make it long, how could this be? If the syllable was to be made long, did the speaker dwell longer on the consonants? and if it was to be made short, did he hurry them over? and did this make the difference in the quantity of these syllables?—The utter impossibility of conceiving this to have been the case renders it highly probable that the long or short quantity lay only in the vowel.

† See this idea of the different sound of words, when taken singly, and when in composition, most excellently treated by the author of the Greek and Latin Prosodies, attributed to the present Bishop of St. Asaph, page 101.

‡ Is it not astonishing that learned men will wrangle with each other for whole pages about the sense of a word in Dionysius of Halicarnassus, upon the difference between singing and speaking sounds, when this difference is just as open to them by experiment as it was to him? Who can sufficiently admire the confidence of Isaac Vossius, who says—“In cantu latius evagari sonos, quam in recitatione aut communi sermone, utpote in quo vitiorum habebatur, si vox ultra diapente seu tres tonos et semitonium, accurat.” In singing, the sound has a larger compass than in reading or common speaking, inasmuch that,

be diminished when we inquire into the nature of the accent.

20. From what has been said of accent and quantity in our own language, we may conclude them to be essentially distinct and perfectly separable; nor is it to be doubted that they were equally separable in the learned languages; instances of this from the schoolmen and commentators are innumerable; but, so loose and indefinite are many of their expressions, so little do they seem acquainted with the analysis of the human voice, that a great number of quotations are produced to support the most opposite and contradictory systems. Thus Vossius, Henninius, and Dr. Gally, produce a great number of quotations which seem to confound accent and quantity, by making the acute accent and long quantity signify the same; while Michaëlis, Melancthon, Forster, Primat, and many other men of learning, produce clouds of witnesses from the ancients to prove that accent and quantity are essentially different.‡ The only thing they seem to agree in is, that the acute accent always raises the syllable on which it is placed higher than any other in the word.§ This is certainly true, in English pronunciation, if we pronounce the word singly, and terminate it as if no other were to follow; but, if we pronounce it in a sentence, where it is the last accented word but one, or where it is at the end of a question beginning with a verb, when we suspend the voice in expectation of an answer, we then find the latter syllables of the word, though unaccented, are pronounced higher than the accented syllable in the former part of the word. See No. 7.

21. But what are we to think of their saying, that every monosyllable is either acute or circumflexed.¶ If the acute accent signify an elevation of voice, this, with respect to words of one syllable, must mean elevated above some other word, either preceding or succeeding, since elevation is a mere comparative word; but this is not once mentioned by them; if it have any meaning, therefore, it must imply that the acute accent is the monosyllable, pronounced with what I should call the rising inflection, or upward slide; and then we can comprehend how a monosyllable may have the acute accent, without reference to any other word; as, when we begin a syllable low, and slide it higher, or begin it high, and slide it lower, it may be said to be acute or grave of itself:—that is, when it is pronounced alone, and independent of other words. Unless we adopt this definition of the acute and grave, it will be impossible to conceive what the old grammarians mean, when they speak of a monosyllable having the grave or the acute accent. Thus Diomedes says, on some words changing their accent—“Si, post cum gravi pronunciatum accentum, erit præpositio; si acuto erit adverbium, ut *longo post tempore veni*.”

22. It was a canon in the prosody of the Greeks and Romans, that words of more than one syllable must have either an acute or a circumflex accent; and that the other syllables, without an accent, were to be accounted grave; but, if this be so, what are we to think of those numerous monosyllables, and the final syllables of those dissyllables that we see marked with the grave accent; as, *Mêr*, *πῶρ*, *ὄν*, *Θῶδς*, *Ἀνῖρ*, &c. τ. λ.: “Why, these words,” says Mr. Forster, “whatever Dr. Gally may conceive, had certainly their elevation on the last syllable:” and this opinion of Mr. Forster is supported by some of the most respectable authorities.¶

in common discourse, whatever is higher than the *diapente* is held to be extremely vicious.

§ Thus Priscian: “In unaquaque parte orationis *arsis* et *thesis* sunt velut in hac parte *natura*: ut quando dico *natu*, elevatur vox et est *arsis* in *tu*: quando vero *ra* deprimitur vox et est *thesis*.” Any one would conclude from this description of the rising and falling of the voice upon this word, that it could only be pronounced one way, and that there was no difference in the comparative height of the vowel *u* in the two following sentences:

Lucretius wrote a book *De Rerum Natura*.
Lucretius wrote a book *De Natura Rerum*.

Whereas it is evident that the word *natura* is susceptible of two different pronunciations: in the first sentence the syllable *tu* is louder and higher than the last; and in the second it is louder and lower than the last; and this confounding of loud with high, and soft with low, seems to be the great stumbling block, both of ancients and moderns.—See No. 7, 8, &c.

¶ Ea vero que sunt syllabæ unius erunt acuta aut flexa; ne sit aliqua vox sine acuta.—Quint. lib. i. c. 5.

¶ The seeming impossibility of reconciling accent and quantity made *Herman Vanderhardt*, the author of a small treatise, entitled, “*Aræum Accentuum Græcorum*,” consider the marks of Greek accentuation as referring not to syllabic, but oratorical accent. But, as Mr. Forster observes, if this supposition were true, we should!

OBSERVATIONS ON THE GREEK AND LATIN ACCENT.

23 With respect to the power of the accent in both the Greek and Latin languages, nothing can be better established by the ancient grammarians, than that the acute accent did not lengthen the syllable it fell upon; and that short syllables, remaining short, had often the acute accent. This opinion has been irrefutably maintained by Mr. Forster,* and the author of *Observations on the Greek and Latin Prosodies*; though as strenuously opposed by Isaac Vossius, and Henselius; and these last seem to have been persuaded of the inseparable concomitancy of the acute accent and long quantity, from the impossibility they supposed there was of separating them in any language. But, if we make our ears, and not our eyes, judges of quantity, can any thing be more palpable than the short quantity of the accented syllables of *próselyte*, *ánodynes*, *tribúne*, and *ínmate*; and the long quantity of the final syllables of these words? *próselyte*, *próselyte*, *próselyte*, and *próselyte*, *ánodynes*, *ánodynes*, *ánodynes*, and *ánodynes*, *tribúne*, *tribúne*, *tribúne*, and *tribúne*, *ínmate*, *ínmate*, *ínmate*, and *ínmate*, nothing can be more evident than the long quantity of the final vowel, though without the accent, and the short quantity of the initial and accented syllable.

24. As to the long quantity arising from the succession of two consonants, which the ancients are uniform in asserting, if it did not mean that the preceding vowel was to lengthen its sound, as we should do by pronouncing the *a* in *scatter* as we do in *skater*, (one who skates,) I have no conception of what it meant; for, if it meant that only the time of the syllable was prolonged, the vowel retaining the same sound, I must confess as utter an inability of comprehending this source of quantity in the Greek and Latin as in English. *Banish, banner, and banter*, have, to our ears, the first syllable equally short: the same may be observed of *senate, seminary, sentence, and sentiment*; and if, as an ingenious critic¹ has asserted, the ancients pronounced both the consonants *callicidus, fallo*, &c., that is, finishing one *l* by separating the tongue from the palate before the other is begun, such a pronunciation must necessarily augment the number of syllables, nearly as if written *callicidus, falelo, &c.*, and is therefore contrary to all the rules of ancient prosody: nor would this pronunciation, to our ears, give

not meet with the same word constantly accented in the same manner, as we see it at present. A word's oratorical accent will vary according to the general sentiment of the passage wherein it occurs; but its syllabick accent will be invariably the same, independent of its connexion with other words in the same sentence, except in the case of enclitics, and a few others."—*Essay on Accent and Quantity*, page 25.

* But when Mr. Forster endeavours to explain how this is to be done, he has recourse to musick:—

"Notwithstanding the reluctance of Vossius, Henningius, and thousands after them, to admit the acute as compatible with a short time, if I could have them near me with a flute in my hand, or rather with an organ before us, I would engage to convince them of the consistency of these two. I would take any two keys next to each other, one of which would consequently give a sound lower than the other: suppose the words *αἰεὶ* before *οἱ* or *ἀποῦμαι*; both which words Vossius would circumscribe in the penultimate, instead of giving an acute to the first, according to our present marks: I would, conformably to these marks, just touch the higher key for the initial *αἰ*, and take my finger off immediately; and then touch the lower key, on which I would dwell longer than I did on the higher, and that would give me a grave with a long time for the syllable *οἱ*: the same lower key I would just touch again, and instantly leave it, which would give me a grave with a short time for *οἱ*: *αἰεὶ*. Now, if this can be done on a wind instrument within the narrow compass of two notes, it may be done by the organs of human speech, which are of the nature of a wind instrument, in ordinary pronunciation. For the sounds of our voice in common speech differ from those of such musical instruments, not in *quality*, but in arithmetical discrete quantity or number only, as hath been observed before, and is confirmed by the decisive judgement of that nice and discerning critic, Dionysius of Halicarnassus. Here then is, to demonstration, an acute tone consistent with a short time, and a grave tone with a long one." P. 342, 343.—To this I may add, in observation made by the author of the *Essay on the Harmony of Numbers*,—"Strange it seems, that the opinion contrary to this passage should maintain an opinion so contrary to truth, so repugnant to his own purpose, so belied by daily and hourly experience, as that the union of the acute tone with a short quantity seldom occurs in English pronunciation, and is hardly practicable by an English voice." And still more strange, I may add, is it, that these two authors should not see that the experiment, which is called a demonstration, has nothing to do with *be* point in question. It regards tones that rise or fall

the least length to the preceding vowel, any more than the succeeding mute does in *sentence* and *sentiment*.

25. When those observations on the accent and quantity of the ancients are all put together, shall we wonder that the learned and ingenious author of *Elements of Criticism* should go so far as to assert, that the dactyles and spondee of hexameter verse, with respect to pronunciation, are merely ideal, not only with us, but that they were so with the ancients themselves? Few, however, will adopt an opinion which will necessarily imply that the Greek and Latin critics were utterly ignorant of the nature of their own language: and every admirer of those excellent writers will rather embrace any explanation of accent and quantity, than give up Dionysius of Halicarnassus, Cicero, Quintilian, and Longinus. Suppose, then, as a last refuge, we were to try to read a Greek or Latin verse, both by accent and quantity, in the manner they have prescribed, and see what such a trial will produce.

26. By quantity, let us suppose the vowel lengthened to express the long quantity; and by the acute accent, the rising inflection, as explained above.

Tityrè, tú pátulæ récubans súb tégmíne fági,
Sylvéstrem ténui músam meditáris avéna.

Tītŷrē, tū pātūlā rēcūbāns sūb tēgmīnē fāgī,

27. Now there are but four possible ways of pronouncing these verses without going into a perfect song: Π

by perceptible intervals, and not such as rise or fall by slides, or imperceptible ones. Let it once be allowed that the Greeks and Romans sung their language, instead of speaking it, and then the acute or grave accent, with long or short quantity, is easily conceived: but it is not about musical, but speaking tones that we inquire; and, though the authority of Dionysius of Halicarnassus is cited for the nature of the speaking voice as distinct, in degree only, and not in kind, from singing, I boldly assert that this is not matter of authority but of experiment, and that singing and speaking are as distinct as motion and rest. It is true some motion may be so slow as not to be perceived; but then it is to be considered as rest; as a curve may approach so near to a right line as not to be distinguishable from it; but in these cases, where the senses, and not the understanding, are addressed, things are to be estimated for just what the senses value them at.—De non apparentibus, et de non existentibus, eadem est ratio.

† If the acute accent, or stress, as Dr. Gally calls it, made the short syllable long, what becomes of the metre of verse? How will he scan "*Arma virumque cano*?"

† If the double consonants naturally made a syllable long, I should be glad to know how there could be exceptions to this rule! How could Ammonius say, that the second syllable of *kárayua* was long, when the word was used in one particular sense, and short in another? And how could Cicero say, that the first letter of *inçlytus* was short, and the first of *insanus* and *inçelix* long, if two succeeding consonants naturally lengthened the syllable? Dr. Forster, indeed, attempts to reconcile this contradiction, by observing that Cicero does not say, the first syllable of *inçlytus* is short, but the first letter; but, it may be demanded, what is it that makes the syllable long or short, but the length or shortness of the vowel? If the double consonants necessarily retard the sound of the vowel, the second syllable of *kárayua*, and the first of *inçlytus*, could not possibly be pronounced short; and particularly the latter word could not be so pronounced, as it has the accent on the first syllable. See sect. 16, in the Note.

¶ This, I may be bold to say, is coming to the point at once, without hiding our ignorance by supposing that the ancients had some mysterious way of pronouncing, which we are utterly incapable of conceiving. Mr. Sheridan tells us, that "the ancients did observe the distinction of ac-

one is, to pronounce the accented syllable with the falling inflection, and the unaccented syllable with the same inflection in a lower tone, which is the way we pronounce our own words when we give them the accent with the falling inflection: the second is, to pronounce the accented syllable with the rising inflection, and the unaccented syllables with the same inflection in a lower tone, which we never hear in our own language: the third is, to pronounce the accented syllable with the falling inflection, and the unaccented syllables with the rising, in a lower tone: and the fourth, to pronounce the accented syllable with the rising inflection, and the unaccented with the falling, in a lower tone. None of these modes but the first and last do we ever hear in our own language: the second and third seem too difficult to permit us to suppose that they could be the natural current of the human voice in any language. The first leaves us no possible means of explaining the circumflex; but the last, by doing this, gives us the strongest reason to suppose that the Greek and Latin acute accent was the rising inflection, and the grave accent the falling inflection, in a lower tone.

28. But if the reader were sufficiently acquainted with these inflections of voice, or could be present while I exemplified them to him, I doubt not that he would immediately say, it was impossible so monotonous a pronunciation could be that of the Greeks and Romans;* but when we consider the monotony of the Scotch, Welsh, and Irish, why should we wonder that other nations should be as monotonous? Let us view the Greek and Latin pronunciation on which side we will, we must, to be consistent with their own rules, feel them to be extremely monotonous. According to the laws of ancient prosody, every unaccented syllable must be lower than that which is accented; and, if so, a most disagreeable monotony must necessarily ensue: for, as every word in Latin, and almost every word in Greek, of more than one syllable, ended with the grave accent, that is, in a lower tone than the preceding syllables, almost every word in those languages ended with the same tone, let that tone have been what it would.†

29. I am supported in this conjecture, notwithstanding all the fine things‡ the ancients, and many of the moderns, say of the variety and harmony of the Greek and Latin languages, by the definition which they give of the cir-

cumflex accent; which is, that it was a combination of the acute and grave upon the same syllable. This is so incomprehensible to modern ears, that scarcely any one but the author of the present Observations has attempted to explain it by experiment. It stands for nothing but long quantity in all our schools; and, contrary to the clearest testimonies of antiquity, it has, by Dr. Gallyſ and a late respectable writer on the Greek and Latin Prosodies, been explained away into nothing more than the acute accent. But, if it means a raising and falling of the voice upon the same syllable, which is the definition the ancients uniformly give of it, it is just as easy to conceive as a raising and falling of the voice upon successive syllables; or, in other words, as going from a lower tone to a higher upon one syllable, and from a higher to a lower upon the next: and this consideration leads me to conjecture, that the acute accent of the ancients was really the rising inflection, or upward side of the voice; for, this being once supposed, nothing is so easy as to demonstrate the circumflex in our own language; which, without this clew, it will be impossible to do in the ancient languages; and, even with it, we must be astonished they had but one circumflex; since it is just as easy to fall and raise the voice upon the same syllable, as to raise and fall it.¶

30. But our wonder at these peculiarities of the Greek and Latin languages will cease, when we turn our thoughts to the dramatick performances of the people who spoke these languages. Can any thing astonish us more than that all their tragedies and comedies were set to music, and actually accompanied by musical instruments? How is our laughter, as well as our wonder, excited, when we are told that sometimes one actor gesticulated while another recited a speech, and that the greater admiration was bestowed upon the former! Nay, to raise the ridicule to the highest pitch, we are informed that actors in their speeches, and the chorus in their songs, accompanied the performances by dancing; that the actors wore masks lined with brass, to give an echoing sound to the voice, and that these masks were marked with one passion on one side, and with a contrary passion on the other; and that the actor turned that side to the spectators which corresponded to the passion of the speech he was reciting. These extraordinary cir-

cumstances by an elevation and depression of voice; but the manner in which they did it must remain for ever a secret to us; for, with the living tongue, perished the tones also; which we in vain endeavour to seek for in their visible marks.”—*Lectures on Elocution*, 4th edition, page 39.—From these and similar observations in many of our writers, one would be tempted to imagine, that the organs of speaking in ancient Greece and Rome were totally different from those of the present race of men in Europe.

* Dr. Burney tells us, that Meibomius, the great and learned Meibomius, when prevailed upon at Stockholm to sing Greek strophes, set the whole court of Christina in a roar; as Naudé did in executing a Roman dance. And Scaliger observes, that, if the nice tonical pronunciation of the ancients could be expressed by a modern, it would be disagreeable to our ears.

† This is certainly too general an assertion, if we consider the real pronunciation of the Greek language according to accent; as it must be allowed that a great number of Greek words were accented with the acute or circumflex on the last syllable; but when we consider the modern pronunciation of Greek, which confounds it with the Latin, we shall not have occasion to recall the assertion. To which we may add, that those words in Greek that were circumflexed on the last syllable, may very properly be said to end with the grave accent; and that those which had a grave upon the final syllable altered the grave to an acute only when they were pronounced alone, when they came before an enclitic, or when they were at the end of the sentence.

‡ The Grecian sage, (says Dr. Burney,) according to Gravinus, was at once a philosopher, a poet, and a musician. “In separating these characters,” says he, “they have all been weakened; the system of philosophy has been contracted; ideas have failed in poetry, and force and energy in song. Truth no longer subsists among mankind: the philosopher speaks not at present through the medium of poetry; nor is poetry heard any more through the vehicle of melody.”—“Now, to my apprehension,” says Dr. Burney, “the reverse of all this is exactly true: for, by being separated, each of these professions receives a degree of cultivation which fortifies and renders it more powerful, if not more illustrious. The music of ancient philosophers, and the philosophy of modern musicians, I take to be pretty equal in excellence.”—*History of Music*, vol. i. page 162.—Here we see good sense and sound philosophy contrasted with the

blind admiration and empty flourish of an overgrown schoolboy concluding his theme.

§ Dissertation against Greek Accents, page 53.

|| To add to our astonishment, that the Greek and Latin languages had but one circumflex, what can be more wonderful, than that, among so many of the ancients, who have written on the causes of eloquence, and who have descended to such trifling and childish observations upon the importance of letters and syllables, we should not find a single author who has taken notice of the importance of emphasis upon a *single* word! Our modern books of elocution abound with instances of the change produced in the sense of a sentence by changing the place of the emphasis; but no such instance appears among the ancients; not one poor *Will you ride to town to day?*

Our wonder will increase when we consider that the ancients frequently mention the different meaning of a word as it was differently accented; that is, as the acute or circumflex was placed upon one *syllable* or another; but they never hint that the sense of a sentence is altered by an emphasis being placed upon different *words*. The ambiguity arising from the same word being differently accented is so happily exemplified by the author of the Greek and Latin Prosodies, that I shall use his words:—“*Alexander Aphrodisiensis* illustrates this species of sophism, by a well-chosen example of a law, in which the sense depends entirely upon the accuracy of accentuation. *Ἐταῖρα χρυσά εἰ φορεῖσθι ὀνηόσια ἔστω*. The word *ὀνηόσια*, with the acute accent upon the antepenult, is the neuter nominative plural, in apposition with *χρυσά*. And the sense is, ‘If a courtesan wear golden trinkets, let them (viz. her golden trinkets) be forfeited to the publick use.’ But if the accent be advanced to the penult, the word, without any other change, becomes the feminine nominative singular, and must be taken in apposition with *Ἐταῖρα*. And thus the sense will be, ‘If a courtesan wear golden trinkets, let *her* become publick property.’ This is a very notable instance of the political importance of accents, of written accents, in the Greek language. For, if this law had been put in writing without any accent upon the word *ὀνηόσια*, there would have been no means of deciding between two constructions; either of which, the words, in this state, would equally have admitted; and it must have remained an inexplicable doubt, whether the legislator meant, that the poor woman should only forfeit her trinkets, or become a publick slave.”

cumstances are not gathered from obscure passages of the ancients, picked up here and there, but are brought to us by the general and united voice of all antiquity; and therefore, however surprising, or even ridiculous, they may seem, are undoubtedly true.

31. Perhaps it will be said, Is it possible that those who have left us such proofs of their good sense, and exquisite taste, in their writings, statues, medals, and seals, could be so absurd in their dramatick representations? This thing is wonderful, it may be answered; but not more so than that they should not have seen the use of stirrups in riding, of the polarity of the loadstone in sailing, and of several other modern discoveries, which seem to have stared them full in the face without their perceiving it.* But is there any thing more common than to find not only individuals, but a whole people, who, though remarkably excellent in some things, are surprisingly deficient in others? True is the observation of Middleton, who, speaking of those who have written on the pronunciation of the Greek and Latin languages, says, "Ab illis vix scriptoribus etsi plurima ingeniose atque eruditè disputata sint, nonnulla tamen deesse, multa dubiè, quedam etiam falso posita animadverti; idque hac in causa accidisse, quod in cæteris periculis solet, ut mortalium nemini detur non invenisse simul et perficisse.—*De Lat. Lit. Proem.*"

32. That singing a part in a tragedy should seem so unnatural to us, arises chiefly from our being so little accustomed to it. Singing in the pulpit seems to the full as extraordinary; and yet this song was so powerful about a century or two ago, and later in Scotland,† as to

* We have the strongest proof in the world that the ancient Greeks made use only of capital letters, that they were utterly ignorant of punctuation, and that there was not the least space between words or sentences, but that there was an equal continuation of letters, which the reader was obliged to decipher, without any assistance from points or distances. Without the clearest evidence, could we suppose, that, while composition had reached the perfection it had done in Greece, orthography was in a state of barbarity worthy of the Cape of Good Hope?

Can any thing give us a more ludicrous idea than the practice of the ancients in sometimes splitting a word at the end of the line, and commencing the next line with the latter part of the word? This must have been nearly as ridiculous as the following English verses in imitation of this absurd practice:—

Pyrhus, you tempt a danger high,
When you would steal from angry li-
Oness her cubs, and soon shall fly
inglorious.

For know the Romans you shall find
By virtue more and generous kind-
Ness, than by force or fortune blind,
victorious.

Notwithstanding the hackneyed epithet of Gothick barbarity applied to verse in rhyme, it is not wonderful that a species of versification, approved by Italy, France, and England, in their best periods of poetry, should never once have been tried by the Greeks and Romans:—that they should never have straggled, either by chance or for the sake of change, into so pleasing a jingle of sounds! They who would write poems, and so lengthen or shorten the lines as to form axes, wings, and altars, might, without any imputation on their taste, have, now and then, condescended to rhyme. In short, that the ancients should never have slid into rhyme, is a circumstance which would never have been believed, had it been possible to doubt it: and I fear it must be classed with that long catalogue of unaccountables, with which their prosody, their rhetoric, and their drama, abound.

† Perhaps our unwillingness to believe that the ancient dramas were set to music, arises from a very mistaken notion we have of their skill in that art. It is true we have not the same materials for judging of their music as we have of their poetry and sculpture; but their ignorance of counterpoint, and the poverty of their instruments, sufficiently show what little progress they had made in it. Those very few remains of their music, which have reached us, confirm us in this conjecture; and it is to the indefatigable pains of so good a scholar, and so excellent a musician, as Dr. Burney, that we are indebted for an illustration of it.

"At the end of a Greek edition of the astronomical poem, *Aratus*, called *Phaenomena*," says Dr. Burney, "and *Scholia*, published at Oxford in 1762, the anonymous editor, supposed to be Dr. John Fell, among several other pieces, has enriched the volume with three hymns, which he supposed to have been written by a Greek poet, called *Dionysius*; of which the first is addressed to the muse *Calliope*, the second to *Apollo*, and the third to *Nemesis*; and these hymns are accompanied with the notes of ancient music to which they used to be sung."

make mere speaking, though with the utmost energy, appear flat and insipid. Let the human voice be but in a fine tone, and let this tone be intensely impassioned, and it will infallibly, as Milton expresses it,

"_____ take the prison'd soul,
"And lap it in Elysium _____."

33. What may tend to reconcile us still more to this dramatick musick, is the *sing-song* manner, as it is called, of pronouncing tragedy, which very generally prevailed before the time of Mr. Garrick, and which now prevails among some classes of speakers, and is preferred by them to what we call the more natural manner. This drawing, undulating pronunciation, is what the actors generally burlesque by repeating the line,

Tum ti tum ti, tum ti tum ti tum ti:

and though this mode of declamation is now so much despised, it is highly probable that it was formerly held in estimation. §

34. Now, if we suppose this drawing pronunciation, which, though very sonorous, is precisely *speaking*, and essentially different from singing; if we suppose this to have been the conversation pronunciation of the Greeks and Romans, it may possibly throw some light upon the pronunciation of the ancients, and show the quantity at the same time; for, though we can not sufficiently conceive that, in common speaking, in our own language, we can make the accented syllable short, and the unaccented syllable long, as in the words *qualify*, *specify*, *elbow*, *inmate*, &c.; yet, in the drawing pronunciation

"I know not whether justice has been done to these melodies: all I can say is, that no pains have been spared to place them in the clearest and most favourable point of view: and yet, with all the advantages of modern notes and modern measures, if I had been told that they came from the Cherokees or the Hottentots, I should not have been surprised at their excellence.

“I have tried them in every key and in every measure that the feet of the verses would allow; and, as it has been the opinion of some, that the Greek scale and music should be read Hebrew-wise, I have even inverted the order of the notes, but without being able to augment their grace and elegance. The most charitable supposition that can be admitted concerning them is, that the Greek language, being itself accented and sonorous, wanted less assistance from musical refinements than one that was more harsh and rough; and music, being still a slave to poetry, and wholly governed by its feet, derived all its merit and effects from the excellence of the verse, and sweetness of the voice that sung, or rather recited it: for mellifluous and affecting voices are not common from one to another, nor some gifted mortals in all the habitable regions of the earth; and even the natural effusions of these must ever have been heard with delight. But, *as music*, there needs no other proof of the poverty of ancient melody, than its being confined to long and short syllables. We have some airs of the most graceful and pleasing kind, which will suit no arrangement of syllables: to be found in any poetical numbers, ancient or modern, and which it is impossible to express by mere syllables in any language with which I am at all acquainted.”

Dr. Burney's conjecture, that the Greek *misk* was entirely subservient, *to* verse, accounts for the little attention which was paid to it in a separate state; it accounts for the effects with which their music was accompanied, and for the total uselessness of counterpoint. Simple melody is the fittest music to accompany verse, when the words are not sung in a simple melody, but in the music of the great bulk of mankind; and simple melody is never undervalued, till the ear has been sufficiently disciplined to discover the hidden melody, which is still essential to the most complicated and elaborate harmony.

† The Rev. Mr. Whitfield was a highly animated and energetic preacher, without the least tincture of that tone which is called *canting*. When he went to Scotland, where this tone was in high estimation, though his doctrine was in perfect unison with that of his auditors, his simple and natural, though earnest manner of speaking, was looked upon, at first, as a great defect. He wanted, they said, the holy tone.

§ This cant, which, though disgusting now to all but mere rusticks, on account of its being out of fashion, was very probably the favourite modulation in which heroic verses were recited by our ancestors. So fluctuating are the taste and practices of mankind! But whether the power of language has received any advantage from the change just mentioned, I leave to persons of discernment to determine. It will appear at least, very doubtful when we recollect the stories of its former triumphs, and the inherent charms of musical sounds.—*The Art of delivering Written Language*, page 73.

we have been speaking of, the long unaccented vowels in these words are made much longer, and consequently more perceptible.

35. But, if the accent of our language is so different from that of the Greek and Latin, our pronunciation must necessarily be very different likewise. The acute accent of the ancients being always higher than either the preceding or succeeding syllables, and our accent, though always higher than the preceding, being sometimes lower than the succeeding syllables, (see sect. 7.) there must certainly be a wide difference between our pronunciation and theirs. Let us, however, explain the Greek and Latin accent as we will,—let it be by singing, drawing, or common speaking,—it will be impossible to tell how a monotony could be avoided, when almost every word, of more than one syllable, in these languages must necessarily have ended in the same tone, or, if you will, with the same grave accent.*

36. After all, that the Greeks and Romans, in explaining the causes of metrical and prosaic harmony, should sometimes descend to such minute particulars as appear to us trifling and imaginary, and at the same time neglect things which appear to us so essential;—that they should be so dark, and sometimes so contradictory, in their account of accent and quantity, as to furnish opposite systems among the moderns with ample quotations in favour of each;—is this more wonderful than that Mr. Sheridan,† who was so good an actor, and who had spent so much time in studying and writing on elocution,

should say that accent was only a louder pronunciation of the accented syllable, and not a higher? But, as this same Mr. Sheridan, in his *Art of Reading*,‡ has excellently observed, that our perception of Latin quantity is imaginary, and arises not from the ear, but only from association, like spelling; so it may be observed, that the confusion and obscurity which reign among all our writers on accent and quantity, seem to arise from an ideal perception of long quantity produced by double consonants; from confounding stress and quantity, which are so totally different; and from mistaking loud for high, and soft for low, contrary to the clearest definitions of each.§

37. But till the human voice, which is the same in all ages and nations, is more studied and better understood, and till a notation of speaking sounds is adopted, I despair of conveying my ideas of this subject with sufficient clearness upon paper. I have, however, marked such an outline as may be easily filled up by those who study speaking with half the attention they must do music. From an entire conviction that the ancients had a notation of speaking sounds, and from the actual experience of having formed one myself, I think I can foresee that some future philosophical inquirer, with more learning, more leisure, and more credit with the world than I have, will be able to unravel this mystery in letters, which has so long been the *opprobrium et cruz grammaticorum*, the reproach and torment of grammarians.

* Where was all that endless variety with which the moderns puff off the Greek language, when it had but one circumflex! The human voice is just as capable of falling and rising upon the same syllable as rising and falling; and why so palpable a combination of sounds as the former should be utterly unknown to the Greeks and Latins, can be resolved into nothing but (horresco referens) their ignorance of the principles of human speech.

† Nec illi (Demostheni) turpe videbatur vel optimis relictis magistris ad canes se conferre, et ab illis ꝑ literarum et naturarum petere, illorumque in sonando, quod satis esset, morem imitari.—*Ad. Meker. de vet. et rect. Pron. Ling. Græcæ*, page 14.

It is an observation of Chambers, author of the *Cyclopædia*, that nonsense sounds worse in the English than in any other language: let us try the experiment by translating the above passage:—"Nor did Demosthenes think it below him to leave the company of the most respectable people of Athens, and go to the dogs, in order to learn from them the nature of the letter *r*, and, by observing the sound they gave it, to imitate, as much as was necessary, their manner of pronouncing it."

What encomiums do we meet with in Cicero, of the delicacy of the ears even of the common people of Rome! who, if an actor on the stage made the least error in accent or quantity, were immediately sensible of it, and would express their disapprobation. But I am apt to think that an English actor, who should pronounce *theâtre*, *senátor*, or *conquest*, with the accent on the second syllable, would not escape better than the Roman.

‡ "The Scotchman utters the first syllable of *battle*, *borroa*, *habit*, in the middle tone, dwelling on the vowel; and the second with a sudden elevation of the voice, and short; as, *bā-tle*, *bāu rō*, *hā-bit*. The Englishman utters both syllables without any perceptible change of tone, and in equal time; as, *bat-tle*, *bor-roo*, *hab-it*."—*Art of Reading*, page 77.—The smallest degree of attention might have taught Mr. Sheridan, that, though this is the prevailing, it is not the invariable pronunciation of a Scotchman; and that this elevation of voice, though more perceptible in a Scotchman from his drawing out

his tones, is no less real in an Englishman, who pronounces them quicker, and uses them less frequently; that is, he mixes the downward inflection with them, which produces a variety. But these two inflections of voice Mr. Sheridan was an utter stranger to.—See *Elements of Elocution*, part ii. page 183.

§ Nothing is more fallacious than that perception we seem to have of the sound of words being expressive of the ideas, and becoming, as Pope calls it, *an echo to the sense*. This coincidence, as Dr. Johnson observes in one of his *Ramblers*, seldom exists any where but in the imagination of the reader. Dryden, who often wrote as carelessly as he thought, and often thought as carelessly as he lived, began a commendation of the sweetness and smoothness of two lines of Denham in praise of the Thames—

"Though deep yet clear, though gentle yet not dull;
"Strong without rage, without overflowing full;"

and this commendation of Dryden's has been echoed by all subsequent writers, who have taken it for granted, that there is a flow in the lines similar to that of the object described; while the least attention to those stops, so necessary on the accented and antithetick words, will soon convince us, that, however expressive the lines may be, they are as rugged, and as little musical, as almost any in the language.

A celebrated critic observes—"I am apt to think the harmony of the verse was a secret to Mr. Dryden, since it is evident he was not acquainted with the caesural stops, by which all numbers are harmonized. Dr. Bentley has observed, the beauty of the second verse consists in the *ictus* that sounds on the first syllable of the verse, which, in English heroicks, should sound on the second: for this verse is derived from the *Trimeter Iambick*, *Brachycatalectick*."—*Manning's Stichology*, page 71.

When I read such profound observations in such learned terms, it brings to my mind the Mock Doctor in the farce, who shines away to the illiterate knight by repeating *Propria que maribus*, &c., and makes him most pathetically exclaim—*Oh, why did I neglect my studies!*
